

Table of Contents

- Part I Vapor Liquid Equilibrium
- Basic Principles
- K-Value Calculation
- Experimental and Literature Sources
- Part II Key Fractionation Concepts
- Theoretical Stages
- x-y Diagrams - Simple Columns
- x-y Diagrams-Complex Columns
- Application to Multicomponent Distillation-Simple Columns
- Application to Multicomponent Distillation-Complex Columns
- Part III Column Process Design
- Problem Definition and Basic Decisions
- Reflux and Stages: Shortcut Methods
- Rigorous Stage by Stage Computation
- Part IV Energy Savings
- Energy Saving Designs
- Energy Saving Operations
- Part V Tray Efficiency
- The Tray Efficiency Concept
- Tray Efficiency Prediction
- Tray Efficiency in Industrial Columns
- Tray Efficiency Testing
