

Table of contents

- **Preface**
- **Chapter 1 Introduction to Electronics** (p. 1)
- **Chapter 2 Theory** (p. 5)
 - **2.1 Current** (p. 5)
 - **2.2 Voltage** (p. 7)
 - **2.3 Resistance** (p. 8)
 - **2.4 DC Power Sources** (p. 9)
 - **2.5 Two Simple Battery Sources** (p. 10)
 - **2.6 Electric Circuits** (p. 10)
 - **2.7 Ohm's Law** (p. 11)
 - **2.8 Circuit Reduction** (p. 11)
 - **2.9 Kirchhoff's Laws** (p. 14)
 - **2.10 Thevenin's Theorem** (p. 17)
 - **2.11 Sinusoidal Power Sources** (p. 20)
 - **2.12 Root Mean Square (rms) Voltages** (p. 20)
 - **2.13 Capacitors** (p. 21)
 - **2.14 Reactance of a Capacitor** (p. 23)
 - **2.15 Inductors** (p. 24)
 - **2.16 Reactance of an Inductor** (p. 26)
 - **2.17 Fundamental Potentials and Circuits** (p. 26)
 - **2.18 DC Sources and RC/RL/RLC Circuits** (p. 28)
 - **2.19 Complex Numbers** (p. 30)
 - **2.20 Circuits with Sinusoidal Sources** (p. 33)
 - **2.21 Analyzing Sinusoidal Circuits with Complex Impedances** (p. 34)
 - **2.22 Impedances in Series and the Voltage Divider** (p. 38)
 - **2.23 Impedances in Parallel and the Current Divider** (p. 39)
 - **2.24 Applying Kirchhoff's Laws in AC Form** (p. 39)
 - **2.25 Thevenin's Theorem in AC Form** (p. 43)
 - **2.26 Power in AC Circuits** (p. 44)
 - **2.27 Decibels** (p. 45)
 - **2.28 Resonance in LC Circuits** (p. 46)
 - **2.29 Resonance in RLC Circuits** (p. 47)
 - **2.30 Filters** (p. 48)
 - **2.31 Circuits with Periodic Nonsinusoidal Sources** (p. 53)
 - **2.32 Circuits with Nonperiodic Sources** (p. 55)
 - **2.33 Nonlinear Circuits and Analyzing Circuits by Intuition** (p. 55)
- **Chapter 3 Basic Electronic Circuit Components** (p. 59)
 - **3.1 Wires, Cables, and Connectors** (p. 59)
 - **3.1.1 Wires** (p. 59)
 - **3.1.2 Cables** (p. 61)
 - **3.1.3 Connectors** (p. 63)
 - **3.1.4 Wiring and Connector Symbols** (p. 66)
 - **3.1.5 High-Frequency Effects within Wires and Cables** (p. 66)
 - **3.2 Batteries** (p. 76)

- **3.2.1 How a Cell Works** (p. 77)
- **3.2.2 Primary Batteries** (p. 79)
- **3.2.3 Comparing Primary Batteries** (p. 80)
- **3.2.4 Secondary Batteries** (p. 81)
- **3.2.5 Battery Capacity** (p. 83)
- **3.2.6 Note on Internal Voltage Drop of a Battery** (p. 83)
- **3.3 Switches** (p. 84)
 - **3.3.1 How a Switch Works** (p. 84)
 - **3.3.2 Describing a Switch** (p. 85)
 - **3.3.3 Kinds of Switches** (p. 86)
 - **3.3.4 Simple Switch Applications** (p. 88)
- **3.4 Relays** (p. 89)
 - **3.4.1 Specific Kinds of Relays** (p. 91)
 - **3.4.2 A Few Notes about Relays** (p. 92)
 - **3.4.3 Some Simple Relay Circuits** (p. 93)
- **3.5 Resistors** (p. 93)
 - **3.5.1 How a Resistor Works** (p. 94)
 - **3.5.2 Basic Resistor Operation** (p. 95)
 - **3.5.3 Types of Fixed Resistors** (p. 96)
 - **3.5.4 Understanding Resistor Labels** (p. 97)
 - **3.5.5 Power Ratings for Resistors** (p. 98)
 - **3.5.6 Variable Resistors** (p. 98)
- **3.6 Capacitors** (p. 99)
 - **3.6.1 How a Capacitor Works** (p. 100)
 - **3.6.2 A Note about $I = CdV/dt$** (p. 101)
 - **3.6.3 Water Analogy of a Capacitor** (p. 101)
 - **3.6.4 Basic Capacitor Functions** (p. 102)
 - **3.6.5 Kinds of Capacitors** (p. 103)
 - **3.6.6 Variable Capacitors** (p. 105)
 - **3.6.7 Reading Capacitor Labels** (p. 105)
 - **3.6.8 Important Things to Know about Capacitors** (p. 105)
 - **3.6.9 Applications** (p. 106)
- **3.7 Inductors** (p. 108)
 - **3.7.1 How an Inductor Works** (p. 108)
 - **3.7.2 Basic Inductor Operation** (p. 110)
 - **3.7.3 Kinds of Coils** (p. 111)
- **3.8 Transformers** (p. 112)
 - **3.8.1 Basic Operation** (p. 115)
 - **3.8.2 Special Kinds of Transformers** (p. 116)
 - **3.8.3 Applications** (p. 117)
 - **3.8.4 Real Kinds of Transformers** (p. 118)
- **3.9 Fuses and Circuit Breakers** (p. 119)
 - **3.9.1 Types of Fuses and Circuit Breakers** (p. 120)
- **Chapter 4 Semiconductors** (p. 123)
 - **4.1 Semiconductor Technology** (p. 123)
 - **4.1.1 What Is a Semiconductor?** (p. 123)

- **4.1.2 Applications of Silicon** (p. 128)
- **4.2 Diodes** (p. 129)
 - **4.2.1 How a pn-Junction Diode Works** (p. 129)
 - **4.2.2 Diode Water Analogy** (p. 131)
 - **4.2.3 Basic Applications** (p. 131)
 - **4.2.4 Important Things to Know about Diodes** (p. 135)
 - **4.2.5 Zener Diodes** (p. 136)
 - **4.2.6 Zener Diode Water Analogy** (p. 136)
 - **4.2.7 Basic Applications for Zener Diodes** (p. 136)
- **4.3 Transistors** (p. 138)
 - **4.3.1 Introduction to Transistors** (p. 138)
 - **4.3.2 Bipolar Transistors** (p. 140)
 - **4.3.3 Junction Field-Effect Transistors** (p. 158)
 - **4.3.4 Metal Oxide Semiconductor Field-Effect Transistors** (p. 168)
 - **4.3.5 Unijunction Transistors** (p. 177)
- **4.4 Thyristors** (p. 181)
 - **4.4.1 Introduction** (p. 181)
 - **4.4.2 Silicon-Controlled Rectifiers** (p. 182)
 - **4.4.3 Silicon-Controlled Switches** (p. 185)
 - **4.4.4 Triacs** (p. 186)
 - **4.4.5 Four-Layer Diodes and Diacs** (p. 189)
- **Chapter 5 Optoelectronics** (p. 191)
 - **5.1 A Little Lecture on Photons** (p. 191)
 - **5.2 Lamps** (p. 193)
 - **5.3 Light-Emitting Diodes** (p. 196)
 - **5.3.1 How an LED Works** (p. 196)
 - **5.3.2 Kinds of LEDs** (p. 197)
 - **5.3.3 Technical Stuff about LEDs** (p. 198)
 - **5.3.4 Basic LED Operations** (p. 200)
 - **5.4 Photoresistors** (p. 201)
 - **5.4.1 How a Photoresistor Works** (p. 202)
 - **5.4.1 Technical Stuff** (p. 202)
 - **5.4.2 Applications** (p. 202)
 - **5.5 Photodiodes** (p. 203)
 - **5.5.1 How a Photodiode Works** (p. 204)
 - **5.5.2 Basic Operations** (p. 204)
 - **5.5.3 Kinds of Photodiodes** (p. 205)
 - **5.6 Solar Cells** (p. 205)
 - **5.6.1 Basic Operations** (p. 206)
 - **5.7 Phototransistors** (p. 206)
 - **5.7.1 How a Phototransistor Works** (p. 207)
 - **5.7.2 Basic Configurations** (p. 208)
 - **5.7.3 Kinds of Phototransistors** (p. 208)
 - **5.7.4 Technical Stuff** (p. 208)
 - **5.7.5 Applications** (p. 209)
 - **5.8 Photothyristors** (p. 210)

- **5.8.1 How LASCRs Work** (p. 210)
- **5.8.1 Basic Operation** (p. 211)
- **5.9 Optoisolators** (p. 211)
- **5.9.1 Integrated Optoisolators** (p. 212)
- **5.9.2 Applications** (p. 212)
- **Chapter 6 Integrated Circuits** (p. 213)
- **6.1 IC Packages** (p. 214)
- **6.2 Some Basic ICs to Get You Started** (p. 216)
- **Chapter 7 Operational Amplifiers** (p. 219)
- **7.1 Operational Amplifier Water Analogy** (p. 220)
- **7.2 How Op Amps Work (The "Cop-Out" Explanation)** (p. 221)
- **7.3 Theory** (p. 222)
- **7.4 Negative Feedback** (p. 223)
- **7.5 Positive Feedback** (p. 228)
- **7.6 Real Kinds of Op Amps** (p. 229)
- **7.7 Op Amp Specifications** (p. 231)
- **7.8 Powering Op Amps** (p. 233)
- **7.9 Some Practical Notes** (p. 234)
- **7.10 Voltage and Current Offset Compensation** (p. 235)
- **7.11 Frequency Compensation** (p. 236)
- **7.12 Comparators** (p. 236)
- **7.13 Comparators with Hysteresis** (p. 238)
- **7.13.1 Inverting Comparator with Hysteresis** (p. 238)
- **7.13.2 Noninverting Comparator with Hysteresis** (p. 239)
- **7.14 Using Single-Supply Comparators** (p. 240)
- **7.15 Window Comparator** (p. 240)
- **7.16 Voltage-Level Indicator** (p. 241)
- **7.17 Applications** (p. 241)
- **Chapter 8 Filters** (p. 247)
- **8.1 Things to Know before You Start Designing Filters** (p. 248)
- **8.2 Basic Filters** (p. 249)
- **8.3 Passive Low-Pass Filter Design** (p. 250)
- **8.4 A Note on Filter Types** (p. 254)
- **8.5 Passive High-Pass Filter Design** (p. 254)
- **8.6 Passive Bandpass Filter Design** (p. 256)
- **8.7 Passive Notch Filter Design** (p. 258)
- **8.8 Active Filter Design** (p. 259)
- **8.8.1 Active Low-Pass Filter Example** (p. 260)
- **8.8.2 Active High-Pass Filter Example** (p. 261)
- **8.8.3 Active Bandpass Filters** (p. 262)
- **8.8.4 Active Notch Filters** (p. 264)
- **8.9 Integrated Filter Circuits** (p. 265)
- **Chapter 9 Oscillators and Timers** (p. 267)
- **9.1 RC Relaxation Oscillators** (p. 268)
- **9.2 The 555 Timer IC** (p. 270)
- **9.2.1 How a 555 Works (Astable Operation)** (p. 271)

- **9.2.2 Basic Astable Operation** (p. 272)
- **9.2.3 How a 555 Works (Monostable Operation)** (p. 273)
- **9.2.4 Basic Monostable Operation** (p. 274)
- **9.2.5 Some Important Notes about 555 Timers** (p. 274)
- **9.2.6 Simple 555 Applications** (p. 275)
- **9.3 Voltage-Controlled Oscillators (VCOs)** (p. 276)
- **9.4 Wien-Bridge and Twin-T Oscillators** (p. 277)
- **9.5 LC Oscillators (Sinusoidal Oscillators)** (p. 277)
- **9.6 Crystal Oscillators** (p. 280)
- **Chapter 10 Voltage Regulators and Power Supplies** (p. 283)
- **10.1 Voltage-Regulator ICs** (p. 285)
 - **10.1.1 Fixed Regulator ICs** (p. 285)
 - **10.1.2 Adjustable Regulator ICs** (p. 285)
 - **10.1.3 Regulator Specifications** (p. 286)
- **10.2 A Quick Look at a Few Regulator Applications** (p. 286)
- **10.3 The Transformer** (p. 286)
- **10.4 Rectifier Packages** (p. 286)
- **10.5 A Few Simple Power Supplies** (p. 287)
- **10.6 Technical Points about Ripple Reduction** (p. 289)
- **10.7 Loose Ends** (p. 291)
- **10.8 Switching Regulator Supplies (Switchers)** (p. 292)
- **10.9 Kinds of Commercial Power Supply Packages** (p. 296)
- **10.10 Power Supply Construction** (p. 297)
- **Chapter 11 Audio Electronics** (p. 299)
 - **11.1 A Little Lecture on Sound** (p. 299)
 - **11.2 Microphones** (p. 301)
 - **11.3 Microphone Specifications** (p. 302)
 - **11.4 Audio Amplifiers** (p. 303)
 - **11.5 Preamplifiers** (p. 304)
 - **11.6 Mixer Circuits** (p. 305)
 - **11.7 A Note on Impedance Matching** (p. 305)
 - **11.8 Speakers** (p. 306)
 - **11.9 Crossover Networks** (p. 307)
 - **11.10 Simple ICs Used to Drive Speakers** (p. 309)
 - **11.11 Audible-Signal Devices** (p. 310)
 - **11.12 Miscellaneous Audio Circuits** (p. 310)
- **Chapter 12 Digital Electronics** (p. 313)
 - **12.1 The Basics of Digital Electronics** (p. 313)
 - **12.1.1 Digital Logic States** (p. 313)
 - **12.1.2 Number Codes Used in Digital Electronics** (p. 314)
 - **12.1.3 Clock Timing and Parallel versus Serial Transmission** (p. 320)
 - **12.2 Logic Gates** (p. 321)
 - **12.2.1 Multiple-Input Logic Gates** (p. 322)
 - **12.2.2 Digital Logic Gate ICs** (p. 322)
 - **12.2.3 Applications for a Single Logic Gate** (p. 323)
 - **12.2.4 Combinational Logic** (p. 325)

- **12.2.5 Keeping Circuits Simple (Karnaugh Maps)** (p. 332)
- **12.3 Combinational Devices** (p. 334)
 - **12.3.1 Multiplexers (Data Selectors) and Bilateral Switches** (p. 334)
 - **12.3.2 Demultiplexers (Data Distributors) and Decoders** (p. 336)
 - **12.3.3 Encoders and Code Converters** (p. 339)
 - **12.3.4 Binary Adders** (p. 342)
 - **12.3.5 Binary Adder/Subtractor** (p. 344)
 - **12.3.6 Arithmetic/Logic Units (ALUs)** (p. 344)
 - **12.3.7 Comparators and Magnitude Comparator ICs** (p. 345)
 - **12.3.8 Parity Generator/Checker** (p. 346)
 - **12.3.9 A Note on Obsolescence and the Trend toward Microcontroller Control** (p. 347)
- **12.4 Logic Families** (p. 348)
 - **12.4.1 TTL Family of ICs** (p. 349)
 - **12.4.2 CMOS Family of ICs** (p. 351)
 - **12.4.3 Input/Output Voltages and Noise Margins** (p. 351)
 - **12.4.4 Current Ratings, Fanout, and Propagation Delays** (p. 352)
 - **12.4.5 A Detailed Look at the Various TTL and CMOS Subfamilies** (p. 353)
 - **12.4.6 A Look at a Few Other Logic Series** (p. 356)
 - **12.4.7 Logic Gates with Open-Collector Outputs** (p. 357)
 - **12.4.8 Schmitt-Triggered Gates** (p. 358)
 - **12.4.9 Interfacing Logic Families** (p. 359)
- **12.5 Powering and Testing Logic ICs and General Rules of Thumb** (p. 360)
 - **12.5.1 Powering Logic ICs** (p. 360)
 - **12.5.2 Power Supply Decoupling** (p. 361)
 - **12.5.3 Unused Inputs** (p. 361)
 - **12.5.4 Logic Probes and Logic Pulsers** (p. 362)
- **12.6 Sequential Logic** (p. 363)
 - **12.6.1 SR Flip-Flops** (p. 363)
 - **12.6.2 SR Flip-Flop (Latch) ICs** (p. 368)
 - **12.6.3 D Flip-Flops** (p. 369)
 - **12.6.4 A Few Simple D-Type Flip-Flop Applications** (p. 371)
 - **12.6.5 Quad and Octal D Flip-Flops** (p. 372)
 - **12.6.6 JK Flip-Flops** (p. 373)
 - **12.6.7 Applications for JK Flip-Flops** (p. 375)
 - **12.6.8 Practical Timing Considerations with Flip-Flops** (p. 378)
 - **12.6.9 Digital Clock Generator and Single-Pulse Generators** (p. 379)
 - **12.6.10 Automatic Power-Up Clear (Reset) Circuits** (p. 382)
 - **12.6.11 More on Switch Debouncers** (p. 382)
 - **12.6.12 Pullup and Pulldown Resistors** (p. 383)
- **12.7 Counter ICs** (p. 384)
 - **12.7.1 Asynchronous Counter (Ripple Counter) ICs** (p. 384)
 - **12.7.2 Synchronous Counter ICs** (p. 387)
 - **12.7.3 A Note on Counters with Displays** (p. 393)
- **12.8 Shift Registers** (p. 394)
 - **12.8.1 Serial-In/Serial-Out Shifter Registers** (p. 395)

- **12.8.2 Serial-In/Parallel-Out Shift Registers** (p. 395)
- **12.8.3 Parallel-In/Serial-Out Shift Register** (p. 396)
- **12.8.4 Ring Counter (Shift Register Sequencer)** (p. 396)
- **12.8.5 Johnson Shift Counter** (p. 397)
- **12.8.6 Shift Register ICs** (p. 398)
- **12.8.7 Simple Shift Register Applications** (p. 401)
- **12.9 Three-State Buffers, Latches, and Transceivers** (p. 404)
- **12.9.1 Three-State Octal Buffers** (p. 404)
- **12.9.2 Three-State Octal Latches and Flip-Flops** (p. 405)
- **12.9.3 Transceivers** (p. 407)
- **12.10 Additional Digital Topics** (p. 407)
- **Chapter 13 DC Motors, RC Servos, and Stepper Motors** (p. 409)
- **13.1 DC Continuous Motors** (p. 409)
- **13.2 Speed Control of DC Motors** (p. 410)
- **13.3 Directional Control of DC Motors** (p. 411)
- **13.4 RC Servos** (p. 412)
- **13.5 Stepper Motors** (p. 414)
- **13.6 Kinds of Stepper Motors** (p. 415)
- **13.7 Driving Stepper Motors** (p. 417)
- **13.8 Controlling the Driver with a Translator** (p. 419)
- **13.9 A Final Word on Identifying Stepper Motors** (p. 421)
- **Chapter 14 Hands-on Electronics** (p. 423)
- **14.1 Safety** (p. 423)
- **14.1.1 Some Safety Tips** (p. 424)
- **14.1.2 Damaging Components with Electrostatic Discharge** (p. 425)
- **14.1.3 Handling Precautions** (p. 426)
- **14.2 Constructing Circuits** (p. 426)
- **14.2.1 Drawing a Circuit Schematic** (p. 426)
- **14.2.2 A Note on Circuit Simulator Programs** (p. 428)
- **14.2.3 Making a Prototype of Your Circuit** (p. 428)
- **14.2.4 The Final Circuit** (p. 429)
- **14.2.5 A Note about Board Layout** (p. 433)
- **14.2.6 Special Pieces of Hardware Used in Circuit Construction** (p. 433)
- **14.2.7 Soldering** (p. 434)
- **14.2.8 Desoldering** (p. 434)
- **14.2.9 Enclosing the Circuit** (p. 435)
- **14.2.10 Useful Items to Keep Handy** (p. 435)
- **14.2.11 Troubleshooting the Circuits You Build** (p. 436)
- **14.3 Multimeters** (p. 437)
- **14.3.1 Basic Operation** (p. 437)
- **14.3.2 How Analog VOMs Work** (p. 438)
- **14.3.3 How Digital Multimeters Work** (p. 439)
- **14.3.4 A Note on Measurement Errors** (p. 440)
- **14.4 Oscilloscopes** (p. 441)
- **14.4.1 How Scopes Work** (p. 441)
- **14.4.2 Interior Circuitry of a Scope** (p. 443)

- **14.4.3 Aiming the Beam** (p. 444)
- **14.4.4 Scope Applications** (p. 445)
- **14.4.5 What All the Little Knobs and Switches Do** (p. 446)
- **14.4.6 Measuring Things with Scopes** (p. 450)
- **14.4.7 Scope Applications** (p. 455)
- **Appendices** (p. 459)
- **Appendix A Power Distribution and Home Wiring** (p. 459)
- **A.1 Power Distribution** (p. 459)
- **A.2 A Closer Look at Three-Phase Electricity** (p. 460)
- **A.3 Home Wiring** (p. 462)
- **A.4 Electricity in Other Countries** (p. 463)
- **Appendix B Electronic Symbols** (p. 465)
- **Appendix C Useful Facts and Formulas** (p. 467)
- **C.1 Greek Alphabet** (p. 467)
- **C.2 Powers of 10 Unit Prefixes** (p. 467)
- **C.3 Linear Functions ($y = mx + b$)** (p. 467)
- **C.4 Quadratic Equation ($y = ax^2 + bx + c$)** (p. 468)
- **C.5 Exponents and Logarithms** (p. 468)
- **C.6 Trigonometry** (p. 468)
- **C.7 Complex Numbers** (p. 469)
- **C.8 Differential Calculus** (p. 469)
- **Appendix D Finding Components** (p. 471)
- **Appendix E A Note on Injection Molding and Patents** (p. 473)
- **Appendix F History of Electronics Timeline** (p. 477)
- **Appendix G Component Data, List of Logic ICs, Foreign Semiconductor Codes** (p. 483)
- **G.1 Standard Resistance Values for 5% Carbon-Film Resistors** (p. 483)
- **G.2 Selection of Diodes** (p. 483)
- **G.3 Selection of Zener Diodes** (p. 485)
- **G.4 General Purpose Bipolar Transistors** (p. 486)
- **G.5 General Purpose Power Bipolar Transistors** (p. 487)
- **G.6 Selection of RF Transistors** (p. 488)
- **G.7 Selection of Small-Signal JFETs** (p. 488)
- **G.8 Selection of Power FETs** (p. 489)
- **G.9 Selection of Op Amps** (p. 490)
- **G.10 Common 4000 Series Logic ICs** (p. 491)
- **G.11 Common 7000 Series Logic ICs** (p. 492)
- **G.12 Semiconductor Codes** (p. 494)
- **Appendix H Analog/Digital Interfacing** (p. 497)
- **H.1 Triggering Simple Logic Responses from Analog Signals** (p. 497)
- **H.2 Using Logic to Drive External Loads** (p. 498)
- **H.3 Analog Switches** (p. 499)
- **H.4 Analog Multiplexer/Demultiplexer** (p. 500)
- **H.5 Analog-to-Digital and Digital-to-Analog Conversion** (p. 501)
- **H.6 Analog-to-Digital Converters** (p. 508)
- **Appendix I Displays** (p. 515)

- **I.1 LED Displays** (p. 515)
- **I.2 Alphanumeric LED Displays** (p. 518)
- **I.3 Liquid-Crystal Displays** (p. 521)
- **Appendix J Memory Devices** (p. 535)
- **J.1 Read-Only Memories (ROMs)** (p. 535)
- **J.2 Simple ROM Made Using Diodes** (p. 536)
- **J.3 Terms Used to Describe Memory Size and Organization** (p. 537)
- **J.4 Simple Programmable ROM** (p. 538)
- **J.5 Various Kinds of ROM Devices** (p. 539)
