

- Contributors p. xi
- Preface p. xiii
- Chapter 1. Introduction George Tchobanoglous and Frank Kreith and Marcia E. Williams p. 1
- 1.1 Waste Generation and Management in a Technological Society p. 1
- 1.2 Issues in Solid Waste Management p. 2
- 1.3 Integrated Waste Management p. 8
- 1.4 Implementing Integrated Waste Management Strategies p. 11
- 1.5 Typical Costs for Major Waste Management Options p. 13
- 1.6 Framework for Decision Making p. 19
- 1.7 Key Factors for Success p. 22
- 1.8 Philosophy and Organization of this Handbook p. 24
- 1.9 Concluding Remarks p. 25
- Chapter 2. Federal Role in Municipal Solid Waste Management Barbara Foster and Edward W. Repa p. 1
- 2.1 Resource Conservation and Recovery Act p. 1
- 2.2 Clean Air Act p. 22
- 2.3 Clean Water Act p. 35
- 2.4 Federal Aviation Administration Guidelines p. 38
- 2.5 Flow Control Implications p. 38
- Chapter 3. Solid Waste State Legislation Kelly Hill and Jim Glenn p. 1
- 3.1 Introduction p. 1
- 3.2 Trends in Municipal Waste Generation and Management p. 1
- 3.3 The Waste Reduction Legislation Movement p. 3
- 3.4 The Effect of Legislation p. 5
- 3.5 State Municipal Solid Waste Legislation p. 8
- 3.6 State Planning Provisions p. 8
- 3.7 Permitting and Regulation Requirements p. 9
- 3.8 Waste Reduction Legislation p. 9
- 3.9 Establishing Waste Reduction Goals p. 10
- 3.10 Legislating Local Government Responsibility p. 12
- 3.11 Making Producers and Retailers Responsible for Waste p. 16
- 3.12 Advanced Disposal Fees p. 18
- 3.13 Special Waste Legislation p. 20
- 3.14 Market Development Initiatives p. 21
- 3.15 State Funding p. 25
- 3.16 Flow Control Legislation: Interstate Movement of Unprocessed and Processed Solid Waste p. 25
- References p. 27
- Appendix State Solid Waste Regulatory Agencies p. 28
- Chapter 4. Planning for Municipal Solid Waste Management Programs James E. Kundell and Deanna L. Ruffer p. 1
- 4.1 State Solid Waste Management Planning p. 1
- 4.2 Local and Regional Solid Waste Management Planning p. 7
- 4.3 Conclusions p. 13

- References p. 14
- Chapter 5. Solid Waste Stream Characteristics Marjorie A. Franklin p. 1
- 5.1 Municipal Solid Waste Defined p. 1
- 5.2 Methods of Characterizing Municipal Solid Waste p. 2
- 5.3 Materials in Municipal Solid Waste by Weight p. 3
- 5.4 Products in Municipal Solid Waste by Weight p. 11
- 5.5 Municipal Solid Waste Management p. 19
- 5.6 Discards of Municipal Solid Waste by Volume p. 24
- 5.7 The Variability of Municipal Solid Waste Generation p. 25
- References p. 30
- Chapter 6. Source Reduction: Quantity and Toxicity
- Part 6A. Quantity Reduction Harold Leverenz p. 1
- 6A.1 Introduction p. 1
- 6A.2 Effects of Source Reduction p. 2
- 6A.3 Involvement by Government p. 6
- 6A.4 Developing a Source Reduction Plan p. 15
- 6A.5 Strategies for Source Reduction p. 17
- References p. 25
- Part 6B. Toxicity Reduction Ken Geiser
- 6B.1 The Toxicity of Trash p. 27
- 6B.2 Waste Management Policy p. 30
- 6B.3 Product Management Policy p. 33
- 6B.4 Production Management Policy p. 37
- 6B.5 A Sustainable Economy p. 39
- References p. 40
- Chapter 7. Collection of Solid Waste Hilary Theisen p. 1
- 7.1 The Logistics of Solid Waste Collection p. 1
- 7.2 Types of Waste Collection Services p. 2
- 7.3 Types of Collection Systems, Equipment, and Personnel Requirements p. 14
- 7.4 Collection Routes p. 22
- 7.5 Management of Collection Systems p. 25
- 7.6 Collection System Economics p. 25
- References p. 27
- Chapter 8. Recycling Harold Leverenz and George Tchobanoglous and David B. Spencer p. 1
- 8.1 Overview of Recycling p. 1
- 8.2 Recovery of Recyclable Materials from Solid Waste p. 3
- 8.3 Development and Implementation of Materials Recovery Facilities p. 10
- 8.4 Unit Operations and Equipment for Processing of Recyclables p. 38
- 8.5 Environmental and Public Health and Safety Issues p. 70
- 8.6 Recycling Economics p. 74
- References p. 77
- Chapter 9. Markets and Products for Recycled Material Harold Leverenz and Frank Kreith p. 1
- 9.1 Sustainable Recycling p. 1
- 9.2 Recycling Markets p. 3

- 9.3 Market Development p. 8
- 9.4 Trade Issues p. 16
- References p. 17
- Chapter 10. Household Hazardous Wastes (HHW) David E.B. Nightingale and Rachel Donnette p. 1
  - 10.1 Introduction p. 1
  - 10.2 Problems of Household Hazardous Products p. 3
  - 10.3 HHW Regulation and Policy p. 16
  - 10.4 Product Stewardship and Sustainability p. 21
  - 10.5 Education and Outreach p. 26
  - 10.6 HHW Collection, Trends, and Infrastructure p. 29
  - References p. 33
- Chapter 11. Other Special Wastes
  - Part 11A. Batteries Gary R. Brenniman and Stephen D. Casper and William H. Hallenbeck and James M. Lyznicki p. 1
    - 11A.1 Automobile and Household Batteries p. 1
    - References p. 14
  - Part 11B. Used Oil Stephen D. Casper and William H. Hallenbeck and Gary R. Brenniman
    - 11B.1 Used Oil p. 15
  - Part 11C. Scrap Tires John K. Bell
    - 11C.1 Background p. 31
    - 11C.2 Source Reduction and Reuse p. 32
    - 11C.3 Disposal of Waste Tires p. 33
    - 11C.4 Alternatives to Disposal p. 34
    - References p. 36
  - Part 11D. Construction and Demolition (C&D) Debris George Tchobanoglous
    - 11D.1 Sources, Characteristics, and Quantities of C&D Debris p. 39
    - 11D.2 Regulations Governing C&D Materials and Debris p. 42
    - 11D.3 Management of C&D Debris p. 42
    - 11D.4 Specifications for Recovered C&D Debris p. 11.44
    - 11D.5 Management of Debris from Natural and Humanmade Disasters p. 11.46
    - References p. 11.47
  - Part 11E. Computer and Other Electronic Solid Waste Gary R. Brenniman and William H. Hallenbeck
    - 11E.1 Introduction p. 11.49
    - 11E.2 Hazardous Components in Computers and Electronic Waste p. 11.50
    - 11E.3 Disposing of Computers is Hazardous p. 11.53
    - 11E.4 Extended Producer Responsibility and Electronic Toxin Phaseouts p. 11.55
    - 11E.5 Can a Clean Computer Be Designed? p. 11.57
    - 11E.6 What Can You Do As a Computer Owner? p. 11.58
    - 11E.7 Contacts and Resources for Dealing with Computer Waste p. 11.58
    - References p. 11.60
- Chapter 12. Composting of Municipal Solid Wastes Luis F. Diaz and George M. Savage and Clarence G. Golueke p. 12.1

- 12.1 Principles p. 12.3
- 12.2 Technology p. 12.14
- 12.3 Economics p. 12.27
- 12.4 Marketing Principles and Methods p. 12.33
- 12.5 Environmental, Public, and Industrial Health Considerations p. 12.40
- 12.6 Case Study p. 12.45
- 12.7 Conclusions p. 12.45
- References p. 12.47
- Appendix 12A. Partial Listing of Vendors of Equipment and Systems for Composting MSW and Other Organic Wastes p. 12.50
- Appendix 12B. Costs for Composting MSW and Yard Wastes p. 12.68
- Chapter 13. Waste-to-Energy Combustion Introduction Frank Kreith
- Part 13A. Incineration Technologies Calvin R. Brunner p. 13.1
- 13A.1 Incineration p. 13.3
- References p. 13.84
- Part 13B. Ash Management and Disposal Floyd Hasselriis
- 13B.1 Sources and Types of Ash Residues p. 13.85
- 13B.2 Properties of Ash Residues p. 13.86
- 13B.3 Ash Management p. 13.93
- 13B.4 Landfill Disposal p. 13.95
- 13B.5 Regulatory Aspects p. 13.97
- 13B.6 Actual Leaching of MWC Ash p. 13.99
- 13B.7 Treatment of Ash Residues p. 13.100
- 13B.8 Environmental Impact of Ash Residue Use p. 13.101
- 13.B9 Ash Management Around the World p. 13.102
- 13.B10 Beneficial Use of Residues p. 13.104
- 13B.11 Analysis of Ash Residue Test Data p. 13.109
- References p. 13.116
- Part 13C. Emission Control Floyd Hasselriis
- 13C.1 Introduction p. 13.121
- 13C.2 Emissions from Combustion p. 13.124
- 13C.3 Emission Standards and Guidelines p. 13.126
- 13C.4 Emission Control Devices p. 13.132
- 13C.5 Controlled and Uncontrolled Emission Factors p. 13.154
- 13C.6 Variability of Emissions p. 13.160
- 13C.7 Dispersion of Pollutants from Stack to Ground p. 13.161
- 13C.8 Risk Assessment p. 13.165
- 13C.9 Calculation of Municipal Waste Combustor Emissions p. 13.168
- 13C.10 Conversions and Corrections p. 13.171
- References p. 13.174
- Chapter 14. Landfilling Philip R. O'Leary and George Tchobanoglous p. 14.1
- 14.1 The Landfill Method of Solid Waste Disposal p. 14.2
- 14.2 Generation and Composition of Landfill Gases p. 14.10
- 14.3 Formation, Composition, and Management of Leachate p. 14.30

- 14.4 Intermediate and Final Landfill Cover p. 14.47
- 14.5 Structural and Settlement Characteristics of Landfills p. 14.54
- 14.6 Landfill Design Considerations p. 14.58
- 14.7 Landfill Operation p. 14.69
- 14.8 Environmental Quality Monitoring at Landfills p. 14.77
- 14.9 Landfill Closure, Postclosure Care, and Remediation p. 14.84
- References p. 14.88
- Chapter 15. Siting Municipal Solid Waste Facilities David Laws and Lawrence Susskind and Jason Corburn p. 15.1
- 15.1 Introduction p. 15.1
- 15.2 Understanding the Sources of Public Concern p. 15.1
- 15.3 A Typical Siting Chronology p. 15.4
- 15.4 Building Consensus on Siting Choices p. 15.8
- 15.5 Conclusions p. 15.16
- References p. 15.17
- Chapter 16. Financing and Life-Cycle Costing of Solid Waste Management Systems Nicholas S. Artz and Jacob E. Beachey and Philip R. O'Leary p. 16.1
- 16.1 Financing Options p. 16.2
- 16.2 Issues in Financing Choices p. 16.5
- 16.3 Steps to Secure System Financing p. 16.8
- 16.4 Life-Cycle Costing p. 16.10
- 16.5 Summary p. 16.16
