

- Preface p. xv
- Acknowledgments p. xvii
- Introduction p. xix
- Acronym List p. xxi
- Chapter 1 Signaling System #7 p. 1
- Introduction to Telephony Signaling p. 2
- Conventional Signaling p. 7
- In-Band Signaling p. 8
- Out-of-Band Signaling p. 9
- Digital Signaling p. 9
- Common Channel Signaling (CCS) p. 10
- Basic Telephony p. 10
- Bell System Hierarchy p. 10
- Local Access Transport Areas (LATAs) p. 13
- Who Are the Players? p. 14
- Hierarchy of the Synchronization Network p. 16
- Digital Signaling Hierarchy p. 17
- Current Trends in Telecommunications Technology p. 19
- Introduction to the Intelligent Network p. 20
- The Integrated Services Digital Network (ISDN) p. 26
- The Wireless Network and SS7 p. 30
- Video and the Telephone Network p. 37
- Broadband Data Communications p. 38
- The Information Highway p. 40
- Convergent Networks and Packet Telephony p. 41
- New Architecture p. 42
- Standards Organizations p. 47
- International Telecommunications Union--Telecommunications Standardization Sector (ITU-TS) p. 50
- American National Standards Institute (ANSI) p. 51
- Telcordia (Formerly Bellcore) p. 55
- Electronic Industries Association (EIA) p. 57
- ATM Forum p. 57
- Federal Communications Commission (FCC) p. 58
- Underwriters Laboratories (UL) p. 59
- Canadian Standards Association (CSA) p. 59
- International Standards Organization (ISO) p. 59
- Internet Engineering Task Force (IETF) p. 60
- Other Agencies p. 60
- Chapter 2 The SS7 Network p. 63
- Service Switching Point (SSP) p. 64
- Signal Transfer Point (STP) p. 65
- Service Control Point (SCP) p. 69
- Call Management Services Database (CMSDB) p. 70

- Local Number Portability (LNP) p. 71
- Line Information Database (LIDB) p. 71
- Calling Name (CNAM) p. 72
- Business Services Database (BSDB) p. 72
- Home Location Register (HLR) p. 72
- Visitor Location Register (VLR) p. 73
- Operations Support Systems (OSS) p. 73
- Network Monitoring p. 75
- Signaling Data Links p. 75
- Link Implementation p. 78
- Access Links (A-Links) p. 80
- Bridge Links (B-Links) p. 80
- Cross Links (C-Links) p. 80
- Diagonal Links (D-Links) p. 82
- Extended Links (E-Links) p. 83
- Fully Associated Links (F-Links) p. 83
- Link Performance p. 84
- Physical Link Interfaces p. 86
- V.35 p. 86
- DS0A (Digital Signal 0) p. 88
- High-Speed Links p. 88
- TCP/IP Links p. 88
- Miscellaneous Interfaces p. 89
- Chapter 3 Overview of a Protocol p. 93
- Overview of the OSI Model p. 96
- Physical Layer p. 97
- Data Link Layer p. 100
- Network Layer p. 102
- Transport Layer p. 105
- Session Layer p. 106
- Presentation Layer p. 107
- Application Layer p. 108
- Overview of the SS7 Protocol Stack p. 108
- Level 1 Physical Level p. 109
- Level 2 Data Link Level p. 110
- Level 3 Network Level p. 111
- Level 4 User Parts p. 113
- SS7 Protocols p. 114
- Chapter 4 Overview of Signal Units p. 117
- Overview of Signal Units p. 117
- Fill-In Signal Unit (FISU) p. 120
- Link Status Signal Unit (LSSU) p. 121
- Message Signal Unit (MSU) p. 123
- Primitives p. 124

- Overview of SS7 Protocols p. 126
- Message Transfer Part (MTP) p. 127
- M2UA p. 130
- M2PA p. 131
- M3UA p. 131
- SCCP User Adaptation (SUA) p. 132
- Simple Control Transmission Protocol (SCTP) p. 132
- Signaling Connection Control Part (SCCP) p. 133
- ISDN User Part (ISUP) p. 134
- Broadband ISDN User Part (BISUP) p. 135
- Telephone User Part (TUP) p. 135
- Transaction Capabilities Application Part (TCAP) p. 136
- Chapter 5 Message Transfer Part (MTP) p. 137
- Overview of MTP Level 2 p. 137
- Performance p. 138
- Signaling Link Error Monitoring p. 138
- Signal Unit Error Detection p. 140
- Signal Unit Error Correction p. 140
- Signal Unit Alignment p. 140
- Signal Unit Delimitation p. 141
- Flow Control p. 141
- Structure of MTP Level 2 p. 142
- Flag p. 142
- Sequence Numbering p. 143
- Indicator Bits p. 143
- Length Indicator (LI) p. 144
- Cyclic Redundancy Check (CRC) p. 144
- Description of MTP Level 2 Procedures p. 145
- Basic Error Control Method p. 145
- Preventative Cyclic Retransmission (PCR) p. 147
- Structure of the LSSU p. 148
- Signal Unit Alignment Procedure p. 151
- State 00 Idle p. 152
- State 01 Not Aligned p. 152
- State 02 Aligned p. 153
- State 03 Proving p. 153
- Level 3 Alignment Processes p. 153
- Level 2 Signaling Link Test Procedures p. 154
- Chapter 6 Message Transfer Part (MTP) Level 3 p. 155
- Message Handling Overview p. 156
- Message Discrimination Overview p. 156
- Message Distribution Overview p. 158
- Message Routing Overview p. 158
- Normal Routing Procedures p. 160

- Link Selection p. 161
- Network Management Overview p. 164
- Signaling Network Management Procedures p. 164
- Link Management Procedures p. 165
- Traffic Management Procedures p. 169
- Routing Management Procedures p. 184
- Network Maintenance Procedures p. 196
- Congestion Management p. 197
- Failure Management p. 202
- TCP/IP Networks p. 205
- Chapter 7 General Description of SCCP Functions p. 207
- Services of SCCP p. 208
- Routing Services of SCCP p. 211
- Global Title Translation p. 212
- Flow Control p. 213
- Flow Control Procedures p. 214
- Connection-Oriented Services p. 214
- Connection-Oriented Procedures p. 216
- Connectionless Services p. 221
- Connectionless Procedures p. 222
- SCCP Management (SCMG) p. 223
- Signaling Point Status Management p. 224
- Subsystem Status Management p. 225
- SCCP Message Structure p. 226
- Mandatory Fixed Part p. 227
- Mandatory Variable Part p. 227
- Optional Part p. 228
- Message Types p. 228
- SCCP Parameters p. 235
- Chapter 8 Overview of TCAP p. 247
- TCAP Functionality p. 250
- Description of TCAP p. 250
- ASP Services p. 253
- TCAP Message Structure p. 253
- Tag Class p. 255
- Form p. 256
- Tag Code p. 256
- Package Type Identifiers p. 256
- Unidirectional p. 257
- Query with Permission p. 258
- Response p. 259
- Conversation with Permission p. 260
- P-Abort p. 261
- U-Abort p. 262

- Connectionless TCAP Functionality p. 265
- Handover Procedures p. 266
- Recovery Procedures p. 266
- Protocol Errors p. 266
- Application Errors p. 267
- End-User Abnormalities p. 267
- Reject Component p. 267
- Return Error Component p. 269
- Return Result Component p. 269
- Definition of TCAP Parameters p. 270
- Transaction Portion p. 270
- Dialog Portion p. 274
- Component Portion p. 275
- Operation Codes p. 277
- Error Codes p. 280
- Parameters p. 281
- Parameter Values p. 282
- Business Group Identifier p. 293
- Summary p. 296
- Chapter 9 Overview of ISUP p. 299
- ISUP Services p. 301
- Call Setup and Teardown p. 304
- Call Setup and Teardown of ISDN Circuits p. 310
- Call Setup and Teardown of BISDN Circuits p. 312
- Interworking with Non-SS7 Networks p. 314
- Circuit Testing p. 315
- Continuity Testing p. 316
- Circuit Validation Test p. 317
- Functionality of the ISUP Protocol p. 318
- ISUP Services p. 319
- Basic Service p. 319
- Supplementary Service p. 319
- End-to-End Signaling p. 320
- SCCP Method p. 320
- Pass-Along Method p. 320
- Message Format p. 320
- Circuit Identification Code (CIC) p. 321
- Message Type Codes for Normal ISUP p. 321
- Message Type Structure p. 324
- ISUP Parameters p. 353
- Access Transport p. 354
- Call Reference p. 358
- Connection Request p. 372
- Egress Service p. 373

- Network-Specific Facility p. 385
- Network Transport p. 385
- Outgoing Trunk Group Number p. 391
- Redirection Number p. 397
- Service Code p. 398
- Transaction Request p. 399
- BISUP Message Types p. 407
- Address Complete (ACM) p. 409
- Answer (ANM) p. 410
- Call Progress (CPG) p. 411
- Confusion (CFN) p. 412
- Exit (EXM) p. 413
- Initial Address Message (IAM) p. 413
- Release (REL) p. 414
- Release Complete (RLC) p. 414
- Subsequent Address (SAM) p. 414
- User-to-User Information (USIS) p. 414
- Forward Transfer (FOT) p. 415
- Suspend (SUS) p. 415
- Resume (RES) p. 416
- Blocking (BLO) p. 416
- Reset (RSM) p. 417
- Unblocking (UBL) p. 418
- Blocking Acknowledgment (BLA) p. 418
- Reset Acknowledgment Message (RAM) p. 418
- Unblocking Acknowledgment (UBA) p. 419
- User Part Test (UPT) p. 419
- User Part Available (UPA) p. 420
- Network Resource Management (NRM) p. 420
- Segmentation Message (SGM) p. 421
- IAM Acknowledgment (IAA) p. 422
- IAM Reject (IAR) p. 422
- Consistency Check Request (CCR) p. 423
- Consistency Check Request Acknowledgment (CCRA) p. 423
- Consistency Check End (CCE) p. 424
- Consistency Check End Acknowledgment (CCE) p. 424
- Broadband Parameters p. 424
- Chapter 10 Local Number Portability (LNP) p. 433
- Introduction p. 434
- LNP Impact p. 435
- The LNP Elements p. 439
- Number Portability Administration Centers (NPACs) p. 439
- Local Service Order Administration (LSOA) p. 440
- Local Service Management System (LSMS) p. 440

- LNP Database p. 441
- Summary p. 441
- The Wireline Solution p. 442
- Porting a Number in the Wireline Network p. 443
- Routing a Call with LNP in the Wireline Network p. 443
- The Wireless Solution p. 446
- Porting a Number in the Wireless Network p. 447
- Routing a Call with LNP in the Wireless Network p. 447
- Summary p. 449
- Chapter 11 IP Telephony p. 451
- What Is IP Telephony? p. 452
- The Signaling Challenge in IP p. 453
- IP Telephony Network Architectures p. 454
- Standardization p. 456
- ITU H.323 p. 457
