

- Preface p. xv
- Chapter 1. Introduction p. 1
- 1.1 Communication History p. 2
- 1.2 Cellular p. 3
- 1.3 PCS p. 6
- 1.4 WLL p. 8
- 1.5 LMDS p. 8
- 1.6 MMDS, MDS, ITFS p. 13
- 1.7 Cable Systems p. 14
- 1.8 WAP p. 14
- 1.9 Bluetooth p. 17
- 1.10 Wireless LAN (802.11) p. 18
- 1.11 VoIP p. 20
- 1.12 Typical Central Office p. 21
- Chapter 2. Radio Engineering Topics p. 25
- 2.1 Electromagnetic Waves p. 25
- 2.2 Radio Systems p. 26
- 2.3 Transmitters p. 26
- 2.4 Transmitter System Building Blocks p. 27
- 2.5 Information Bandwidth p. 29
- 2.6 Modulation p. 29
- 2.7 Antennas p. 32
- 2.8 Filters p. 34
- 2.9 Receivers p. 39
- 2.10 Radio Performance Criteria p. 41
- 2.10.1 Sensitivity p. 41
- 2.10.2 Selectivity p. 41
- 2.10.3 Dynamic Range p. 41
- 2.10.4 Noise p. 43
- 2.10.5 1-dB Compression p. 45
- 2.10.6 Third-Order Intercept p. 45
- 2.10.7 Desense p. 46
- 2.11 Propagation Model p. 48
- 2.11.1 Free Space p. 48
- 2.11.2 Hata p. 49
- 2.11.3 Cost231 Walfish/Ikegami p. 50
- 2.11.4 Environmental Attenuation p. 55
- 2.12 Diffraction p. 55
- 2.13 Effective Radiated Power (ERP) p. 56
- 2.14 Link Budget p. 59
- 2.15 Path Clearance p. 60
- 2.16 Tower-Top Amplifiers p. 63
- 2.17 Intelligent Antennas p. 64
- Chapter 3. Wireless Mobile Radio Technologies p. 67

- 3.1 AMPS p. 69
- 3.1.1 AMPS Cell Site Configuration p. 70
- 3.1.2 AMPS Call Setup Scenarios p. 71
- 3.1.3 Handoff p. 71
- 3.1.4 AMPS Spectrum Allocation p. 72
- 3.1.5 AMPS Frequency Reuse p. 74
- 3.1.6 AMPS Channel Band Plan p. 77
- 3.2 2G Digital Wireless Systems p. 80
- 3.3 IS-136 and TDMA (D-AMPS) p. 84
- 3.3.1 Voice Channel Structure p. 86
- 3.3.2 Offset between Transmit and Receive p. 88
- 3.3.3 Speech Coding p. 89
- 3.3.4 Time Alignment p. 90
- 3.3.5 Control Channel p. 91
- 3.3.6 MAHO p. 100
- 3.3.7 Frequency Reuse p. 100
- 3.4 CDMA p. 101
- 3.4.1 IS-95 System Description p. 103
- 3.4.2 CDMA2000 p. 104
- 3.4.3 CDMA Radio Network p. 105
- 3.4.4 PDSN p. 107
- 3.4.5 CDMA Channel Allocation p. 110
- 3.4.6 Forward Channel p. 111
- 3.4.7 Reverse Channel p. 116
- 3.4.8 SR and RC p. 119
- 3.4.9 Power Control p. 121
- 3.4.10 Walsh Codes p. 122
- 3.4.11 Call and Data Processing p. 123
- 3.4.12 CDMA Handoffs p. 132
- 3.4.13 Pilot Channel PN Assignment p. 137
- 3.5 GSM p. 140
- 3.5.1 GSM Air Interface p. 146
- 3.5.2 Types of Air Interface Channels p. 147
- 3.5.3 Air Interface Channel Structure p. 148
- 3.5.4 Location Update p. 150
- 3.5.5 Mobile-Originated Voice Call p. 153
- 3.5.6 Mobile-Terminated Voice Call p. 155
- 3.5.7 Handoff p. 157
- 3.5.8 Traffic Calculation Methods p. 160
- 3.6 GPRS p. 161
- 3.6.1 GPRS Services p. 161
- 3.6.2 GPRS User Devices p. 163
- 3.6.3 GPRS Air Interface p. 164
- 3.6.4 GPRS Control Channels p. 164

- 3.6.5 Packet Data Traffic Channels p. 165
- 3.6.6 GPRS Network Architecture p. 166
- 3.6.7 GPRS Network Nodes p. 166
- 3.6.8 GPRS Traffic Scenarios p. 169
- 3.6.9 GPRS Attach p. 170
- 3.6.10 Combined GPRS and GSM Attach p. 173
- 3.6.11 Establishing a PDP Context p. 173
- 3.6.12 Inter-SGSN Routing Area Update p. 177
- 3.6.13 Traffic Calculation and Network Dimensioning for GPRS p. 180
- 3.6.14 Air Interface Dimensioning p. 180
- 3.6.15 GPRS Network Node Dimensioning p. 181
- 3.7 IDEN p. 181
- 3.8 CDPD p. 190
- Chapter 4. RF Design Guidelines p. 195
- 4.1 RF Design Process p. 197
- 4.2 Cell Site Design p. 201
- 4.3 Search Area Request (SAR) p. 201
- 4.4 Site Qualification Test (SQT) p. 205
- 4.5 Site Acceptance (SA) p. 208
- 4.6 Site Rejection (SR) p. 209
- 4.7 FAA Guidelines p. 211
- 4.8 EMF Compliance p. 212
- 4.9 Planning and Zoning Board p. 216
- 4.10 Design Guidelines p. 217
- 4.10.1 Performance Criteria p. 217
- 4.10.2 AMPS p. 218
- 4.10.3 IS-136 p. 219
- 4.10.4 IS-95/CDMA2000 (1XRTT) p. 219
- 4.10.5 IDEN p. 219
- 4.10.6 GSM/GPRS p. 221
- 4.11 Link Budgets p. 221
- 4.12 Frequency Planning p. 224
- 4.12.1 Frequency Plan and Alteration Test Plans p. 230
- 4.12.2 System Radio Channel Expansion p. 233
- 4.13 Antenna Systems p. 235
- 4.13.1 Base Station Antennas p. 235
- 4.13.2 Diversity p. 236
- 4.13.3 Installation Issues p. 237
- 4.13.4 Wall Mounting p. 241
- 4.13.5 Antenna Installation Tolerances p. 241
- 4.13.6 Cross-Pole Antennas p. 242
- 4.13.7 Antenna Change or Alteration p. 245
- 4.14 Site Types p. 246
- 4.15 Reradiators p. 246

- 4.16 Inbuilding and Tunnel Systems p. 247
- 4.16.1 Antenna System p. 250
- 4.16.2 Inbuilding Application p. 251
- 4.16.3 Tunnel Applications p. 251
- 4.16.4 Planning p. 253
- 4.17 Isolation p. 254
- 4.17.1 Isolation Requirements p. 256
- 4.17.2 Calculating Needed Isolation p. 257
- 4.17.3 Isolation Requirements p. 259
- 4.17.4 Free Space p. 259
- 4.17.5 Antenna Patterns p. 260
- 4.17.6 Vertical Separation p. 260
- 4.17.7 Horizontal Separation p. 261
- 4.17.8 Slant Separation p. 264
- 4.18 Base Station Site Checklist p. 265
- Chapter 5. RF System Performance and Troubleshooting p. 269
- 5.1 Key Factors p. 271
- 5.2 Performance Analysis Methodology p. 274
- 5.3 Lost Calls p. 281
- 5.4 Access Failures p. 292
- 5.5 Radio Blocking (Congestion) p. 298
- 5.6 Technology-Specific Troubleshooting Guides p. 304
- 5.7 IS-136 p. 304
- 5.7.1 Lost Calls p. 305
- 5.7.2 Handoff Failures p. 307
- 5.7.3 All Servers Busy (ASB) p. 308
- 5.7.4 Insufficient Signal Strength (IS) p. 309
- 5.7.5 Static p. 309
- 5.8 iDEN p. 310
- 5.8.1 Lost Calls p. 311
- 5.8.2 Access Problems p. 312
- 5.9 CDMA p. 315
- 5.9.1 Lost Calls p. 316
- 5.9.2 Handoff Failures (Problems) p. 319
- 5.9.3 All Servers Busy p. 321
- 5.9.4 Access Problems p. 323
- 5.9.5 Packet Session Access p. 324
- 5.9.6 Packet Session Throughput Problems p. 326
- 5.10 GSM p. 329
- 5.10.1 Lost Calls p. 329
- 5.10.2 Handoff Failures p. 336
- 5.10.3 All Servers Busy p. 338
- 5.10.4 Insufficient Signal Strength p. 339
- 5.10.5 Packet Session Access p. 340

- 5.10.6 Packet Session Throughput p. 343
- 5.11 Retunes p. 346
- 5.12 Drive Testing p. 358
- 5.13 Site Activation p. 364
- 5.14 Site Investigations p. 374
- 5.14.1 New Sites p. 374
- 5.14.2 Existing Cell Sites p. 379
- 5.15 Orientation p. 382
- 5.16 Downtilting p. 383
- 5.17 Intermodulation p. 385
- 5.18 System Performance Action Plan p. 388
- 5.18.1 TIC Lists p. 388
- 5.18.2 Weekly Reports p. 389
- 5.18.3 Monthly Plan Format p. 389
- Chapter 6. Circuit Switch Performance Guidelines p. 393
- 6.1 Network Performance Measurement and Optimization p. 393
- 6.1.1 Switch CPU Loading p. 393
- 6.1.2 Switch Call-Processing Efficiency p. 398
- 6.1.3 Switch/Node Downtime (Service Outage) p. 399
- 6.1.4 Switch Service Circuit Loading p. 400
- 6.1.5 Switch/Node Total Erlangs and Calls Volume p. 400
- 6.1.6 Switch/Node Alarms p. 401
- 6.1.7 Switch Memory Settings and Utilization p. 401
- 6.1.8 Switch Timing Source Accuracy p. 401
- 6.1.9 Auxiliary Node Performances p. 402
- 6.1.10 Node Performance Summary p. 402
- 6.2 Network Link Performance Measurement and Optimization p. 403
- 6.2.1 Network Link Performance p. 403
- 6.2.2 Link Traffic Loading p. 403
- 6.2.3 Link Retransmissions p. 404
- 6.2.4 Link Errors p. 404
- 6.2.5 Link Changeovers p. 405
- 6.2.6 Link Active Time p. 405
- 6.2.7 Link Performance Summary p. 405
- 6.3 Network Routing Performance Monitoring and Management p. 406
- 6.3.1 Routing Efficiency (Voice and Data) p. 406
- 6.3.2 Network Routing Performance Summary p. 409
- 6.4 Network Software Performance p. 410
- 6.5 Network Performance (General Data) p. 410
- 6.6 Network Call Delivery Troubleshooting p. 411
- 6.6.1 Network Call Delivery Troubleshooting Procedures (Initial Steps) p. 411
- 6.6.2 Troubleshooting Procedures (First Level) p. 413
- 6.6.3 Troubleshooting Procedures (Second Level) p. 413
- 6.6.4 Troubleshooting Call Testing Procedures p. 415

- 6.6.5 Network Call Delivery Troubleshooting Summary p. 418
- 6.7 Network Call Delivery Troubleshooting Examples p. 419
- Chapter 7. Billing and Charging in a Wireless Network p. 423
- 7.1 Basic Billing Process p. 423
- 7.1.1 Billing Process Description p. 423
- 7.1.2 Billing Cycles and Billing Data Filtering p. 424
- 7.1.3 Call Detail Record Description p. 427
- 7.1.4 Call Detail Record Generation and Collection p. 428
- 7.1.5 Call Detail Record Back-Office Processing p. 429
- 7.2 Call Test Plan for Billing Verification p. 431
- 7.3 Billing Verification Methods p. 432
- 7.4 Nonbillable Billing Events p. 433
- Chapter 8. Revenue Assurance in a Wireless Network p. 435
- 8.1 Revenue Assurance Basics p. 435
- 8.2 Analysis and Reconciliation of Customer Databases within a Wireless System p. 436
- 8.2.1 Wireless Network Customer Database Types and Description p. 436
- 8.2.2 Customer Database Provisioning p. 437
- 8.2.3 Determining the Total Number of Subscribers in a System Customer Database p. 438
- 8.2.4 Postpaid and Prepaid Service Issues p. 440
- 8.3 Revenue Assurance Billing Verification p. 440
- 8.3.1 CDR Volume Benchmarks p. 440
- 8.3.2 Verification of Bill Contents p. 442
- 8.4 Comparison, Analysis, and Verification of System Usage and Performance Data p. 443
- 8.4.1 CDR and Switch Statistical Call Data Comparison p. 443
- 8.4.2 System Usage Data Applications p. 444
- 8.5 Summary p. 447
- Chapter 9. System Documentation and Reports p. 449
- 9.1 Reports p. 451
- 9.2 Objectives p. 452
- 9.3 Bouncing Congestion Hour Traffic Report (Node and Service) p. 454
- 9.4 RF Network Performance Report p. 457
- 9.5 Packet Switch Performance Report p. 460
- 9.6 Circuit Switch/Node Performance Report p. 462
- 9.7 Telephone Number Inventory Report p. 464
- 9.8 IP Number Inventory Report p. 465
- 9.9 Facility Usage Report p. 465
- 9.10 Facilities Interconnect Report (Data) p. 467
- 9.11 System Circuit Switch Traffic Forecast Report p. 469
- 9.12 Network Configuration Report p. 470
- 9.13 System Growth Status Report p. 471
- 9.14 Exception Report p. 471
- 9.14.1 Weekly and Regional Exception Report p. 475
- 9.15 Customer Care Report p. 476
- 9.16 System Status Bulletin Board p. 476

- 9.17 Project Status Report (Current and Pending) p. 479
- 9.18 System Software Report p. 480
- 9.19 Upper Management Report p. 480
- 9.20 Company Meetings p. 481
- 9.21 Network Briefings p. 485
- 9.22 Reporting Frequency p. 485
- Chapter 10. Network and RF Planning p. 487
- 10.1 Planning Process Flow p. 487
- 10.2 Methodology p. 489
- 10.3 Traffic Tables p. 492
- 10.4 System Expansion p. 494
- 10.4.1 New Wireless System Procedure p. 495
- 10.4.2 2.5G or 3G Migration Design Procedure p. 496
- 10.5 Traffic Projections p. 497
- 10.6 Radio Voice Traffic Projections p. 498
- 10.6.1 IS-136 p. 500
- 10.6.2 CDMA p. 501
- 10.6.3 GSM/GPRS p. 505
- 10.7 Radio Data Traffic Projection p. 511
- 10.8 RF System Growth p. 515
- 10.8.1 Coverage Requirements p. 517
- 10.8.2 Capacity Cell Sites Required p. 518
- 10.8.3 RF Traffic Off-Loading p. 521
- 10.9 Fixed Network p. 522
- 10.10 Circuit Switch Growth p. 524
- 10.10.1 Switch Processor Capacity Study p. 524
- 10.10.2 Switch Port Capacity Study p. 526
- 10.10.3 Switch Subscriber Capacity Study p. 528
- 10.11 Network Interconnect Growth Study (Voice) p. 531
- 10.12 Network Interconnect Growth Study (Data) p. 532
- 10.13 PDSN p. 534
- 10.14 IP Addressing p. 536
- 10.15 Head Count Requirements p. 539
- 10.16 Budgeting p. 539
- 10.17 Final Report p. 541
- 10.18 Presentation p. 542
- Chapter 11. Organization and Training p. 543
- 11.1 Technical Organization's Structure p. 543
- 11.2 Technical Organization's Departments p. 544
- 11.3 Engineering Organization p. 545
- 11.4 Operations p. 548
- 11.5 Real Estate and Implementation p. 548
- 11.6 New Technology and Budget Directorates p. 552
- 11.7 Head Count Drivers p. 552

- 11.8 Hiring p. 553
- 11.9 Smart Outsourcing p. 555
- 11.10 Training p. 556
- Appendix A Erlang B Grade of Service p. 561
- Appendix B Erlang C Grade of Service p. 565
- Appendix C PCS 1900 GSM Channel Chart p. 567
- Bibliography p. 569
- Index p. 573
