

- Preface p. xi
- Introduction p. xiii
- Part 1 Foundations p. 1
- Chapter 1 Basics p. 3
 - Voice Services p. 4
 - Quality of Service (QoS) p. 5
 - Objectives of Measurement and Evaluation p. 6
 - Principal User Concerns p. 7
 - Applications p. 8
- Chapter 2 Principal System-Level Determinants of Connection Quality p. 9
 - Voice Codecs p. 10
 - Packetization p. 13
 - Jitter Buffer p. 17
 - Implications p. 18
- Chapter 3 Quality Expectations and Requirements p. 19
 - Service Models p. 20
 - Hybrid Transport (tpt) p. 20
 - Packet-Switched Telephony (tel) p. 21
 - Interactive Multimedia Exchange (ime) p. 22
 - Summary p. 23
 - Implications for Codec Selection p. 25
- Chapter 4 Impairments Created or Exacerbated by Packet Switching p. 27
 - Noise on Speech p. 28
 - Echo p. 29
 - Speech Distortion p. 30
 - Voice Clipping p. 33
 - Disruption of Conversational Rhythms p. 33
- Part 2 Measurement and Evaluation of Voice Quality p. 35
- Chapter 5 Voice Quality p. 37
 - User Assessment of Voice Quality p. 38
 - Connection Quality p. 39
 - Connection Usability p. 39
 - Measure of Connection Quality p. 40
 - Definition p. 40
 - Mean Opinion Scores p. 41
 - Pitfalls in Interpretation of MOS p. 42
 - Measurement of Connection Usability p. 45
 - Definition p. 45
 - Interpretation p. 46
 - Measurement and Evaluation Tools p. 48
 - Subjective Testing p. 48
 - User-Perception Models p. 51
 - Summary and Preview p. 59
- Chapter 6 Service Attribute Tests p. 61
 - Basic Test Structure p. 63
 - Data on Calls p. 63

- Call Identification p. 64
- Outcome of Failed Call Attempts p. 64
- Impairments Noted p. 65
- Inherent Credibility p. 70
- Assessment of Overall Connection Quality p. 68
- Description of Effects p. 69
- Features of the SAT p. 70
- Extensibility p. 71
- Manipulability of Results p. 73
- Design for Effectiveness p. 74
- Principles of Test Design p. 74
- Data-Collection Plans for SATs p. 77
- Decision Makers' Questions p. 77
- Measures and Comparisons p. 79
- Principal Factors p. 82
- Selection of Factors and Categories p. 86
- Design Effectiveness p. 87
- Examples p. 90
- Level Problems p. 90
- Characterization of Quality without an External Basis for Comparison p. 91
- What-if? Analysis p. 92
- SAT-Based Analysis Tools p. 93
- Chapter 7 Measurement of Speech Distortion p. 97
- A Very Short Course in the Physiology of Speech and Hearing p. 98
- Speech Production p. 98
- Speech and Hearing p. 104
- Hearing p. 106
- Implications p. 110
- Types of Speech Distortion Measurement p. 114
- Active Measurement Techniques p. 116
- Electroacoustic Experiments p. 116
- Psychoacoustic Standards p. 121
- Passive Measurement Techniques p. 130
- Psychoacoustic-PAMS Extensions p. 131
- An Electroacoustic Technique p. 132
- Comment p. 134
- Chapter 8 Multiple-Effects Models p. 135
- A Modern Fable--The Three Little Phonemes and the Big, Bad Network p. 136
- First Little Phoneme p. 137
- Second Little Phoneme p. 139
- Third Little Phoneme p. 141
- Multiple-Effects Models p. 146
- Loss/Noise Grade of Service Model p. 146
- Background p. 147
- Transmission Ratings p. 147
- Lessons Learned p. 149

- The E-Model p. 152
- E-Model Extensions to Packet-Switched Voice Services p. 153
- Voice Quality Evaluation System p. 154
- VQES Inputs p. 156
- Transforms p. 157
- Limitation p. 164
- Features p. 165
- Comment p. 168
- Chapter 9 Applications p. 169
- Analytical Procedure p. 170
- Objectives p. 172
- Measures p. 179
- Alternatives for Quantification p. 180
- Data Acquisition p. 184
- Examples p. 193
- Problem 1 Marketing's Nightmare p. 193
- Problem 2 The Designers' Dilemma p. 195
- Problem 3 Your Customer Wants a Service-Level Agreement for Voice Quality p. 197
- Part 3 Other Aspects of Quality of Service p. 203
- Chapter 10 Other Quality of Service Concerns p. 205
- The Quality of Service (QoS) Model p. 206
- Accessibility p. 206
- Routing Speed p. 207
- Connection Reliability p. 208
- Routing Reliability p. 208
- Connection Continuity p. 209
- Hybrid Transport p. 213
- Disconnection Reliability p. 209
- Call Routing across Packet-Switched Networks p. 210
- Implications for QoS p. 211
- Packet-Switched Telephony p. 218
- Chapter 11 Quality of Voice for Interactive Multimedia Exchange p. 223
- User Concerns p. 224
- Implications p. 225
- Afterword p. 227
- Appendix A Types of Codecs p. 229
- Appendix B How a Jitter Buffer Works p. 235
- Appendix C Extensions of the Loss/Noise Grade of Service Model p. 237
- Appendix D U.S. Patents for Voice Quality Measurement and Analysis Technology p. 241
- References p. 303
- Index p. 305
