

Table of Contents

- Preface p. ix
- Topic 1 Vapor Analysis in Fractional Distillation p. 1
 - Summary of Equations p. 3
 - Worked Examples p. 4
- Topic 2 Partial Pressure Analysis in Towers p. 7
 - Summary of Equations p. 9
 - Latent Heat, Fractional Cuts in Oil Distillation, and Temperature Dependence p. 10
 - Worked Examples p. 12
- Topic 3 Liquid-Liquid Extraction p. 19
 - Worked Example p. 19
- Topic 4 Compressor Head Calculation p. 23
 - Worked Example p. 24
- Topic 5 Compressor Gas Horsepower Calculation p. 27
 - Summary of Equations p. 28
 - Worked Example p. 28
- Topic 6 Temperature of Gas Exiting the Compressor p. 29
 - Summary of Equations p. 30
 - Worked Example p. 30
- Topic 7 Energy Content of Gas Exiting the Compressor p. 33
- Topic 8 Temperature of Gas Exiting the Expander p. 35
 - Summary of Equations p. 36
 - Conclusions p. 36
 - Worked Examples p. 37
- Topic 9 Pump Specification Calculations p. 43
 - Summary of Equations p. 45
 - Worked Examples p. 46
 - Conclusion p. 50
- Topic 10 Estimation of Important Steam Utility Variables p. 53
 - Steam Temperature Calculation at a Given Pressure p. 53
 - Steam Pressure Calculation at a Given Temperature p. 54
 - Summary of Equations p. 55
 - Calculation of Steam Heat Content and Heat Duty p. 56
 - Summary of Equations p. 57
 - Worked Examples p. 58
- Steam Molar Volume and Mass Density Calculation p. 60
 - Worked Examples p. 61
- Topic 11 Steam Balance Calculations in Cogeneration p. 65
 - Steam Extraction in an Expander p. 65
 - Energy Balance Calculation for Steam Extraction p. 65
 - Condensate Adiabatic and Nonadiabatic Flashing p. 66
 - Summary of Equations p. 68
 - Discussion p. 69
 - Worked Examples p. 69
- Topic 12 Gaseous Volume, Molar Mass, and Heat Flow Rate Calculations p. 73

- Summary of Equations p. 75
- Worked Examples p. 77
- Topic 13 Deduction of Specific Heats of Liquids from Heat Exchanger Calculations p. 79
- Summary of Equations p. 81
- Conclusion p. 81
- Worked Example p. 81
- Topic 14 Deduction of Deadweight of Material in Heat Exchangers p. 83
- Summary of Equations p. 86
- Worked Examples p. 87
- Topic 15 Estimation of Gas Densities at Different Temperatures and Pressures p. 91
- Worked Example p. 93
- Topic 16 Reactor Loop Material Balance Calculations p. 95
- Worked Example p. 97
- Topic 17 Catalysis in Chemical Reactors p. 101
- Types of Chemical Reactions and Influences on Catalysis p. 102
- Topic 18 Technologies for Acid Gas Removal Process p. 109
- Physical Absorber Technologies p. 110
- Chemical Absorber Technology p. 112
- Topic 19 Heat Exchanger Specification p. 115
- Summary of Equations p. 116
- Worked Examples p. 118
- Topic 20 Fuel Conversion p. 121
- Coal Conversion p. 122
- Coal Utilization p. 127
- Petroleum Processing p. 137
- Topic 21 Electrochemical Processing p. 155
- Electricity Conversion p. 155
- Water Treatment and Purification p. 158
- Electrochemical Refining of Metal Ores and Minerals p. 166
- Electroplating of Metals p. 171
- Seawater Desalination and Nonmetal Elements Recovery p. 176
- Topic 22 Process Plant Economics p. 183
- Capital Investment Costs p. 183
- Annual Operating Cost p. 190
- Cost of Production p. 197
- Plant Annual Earnings p. 199
- Plant Profitability p. 200
- Plant Breakeven Point p. 202
- Topic 23 Computer Simulations p. 205
- Calculate Actual Operating Gas Volume p. 206
- Calculate Adiabatic Steam Generation Rate p. 209
- Calculate Coal Elemental Composition p. 212
- Calculate Coal HHV, LHV p. 215
- Calculate Compressor Gas Heat Duty p. 218
- Calculate Compressor Head p. 221

- Calculate Compressor Horsepower p. 224
- Calculate Compressor Outlet Temperature p. 227
- Calculate Cut Fraction API p. 230
- Calculate Fluid Specific Heat (C_p) Estimate p. 233
- Calculate Fuel Cell Electric Power Generation p. 236
- Calculate Fuel Gas HHV p. 239
- Calculate Gas Specific Volume p. 242
- Calculate Gas Standard Volume p. 245
- Calculate Gas Volume p. 248
- Calculate Gasolin Blend Characteristics (API) p. 251
- Calculate Heat Exchanger Total Gas Dead Weight (lb) p. 254
- Calculate Heat Exchanger Total Gas/Liquid Dead Weight (lb) p. 257
- Calculate Molecular Weight p. 260
- Calculate Naphtha Cut Fraction API p. 263
- Calculate Nonadiabatic Steam Generation Rate p. 266
- Calculate Partial Pressure p. 269
- Calculate Power Extraction p. 272
- Calculate Pump Impeller Speed RPM p. 275
- Calculate Pump NPSH p. 278
- Calculate Pump Pressure p. 281
- Calculate Reactor Material Balance p. 284
- Calculate Saturated Steam Pressure p. 288
- Calculate Saturated Steam Temperature p. 291
- Calculate Steam Enthalpy and Duty p. 294
- Calculate Steam Enthalpy and Super Heat Duty p. 297
- Calculate Temperature and Pressure p. 300
- Calculate Turbine Exit Gs Energy p. 303
- Calculate Turbine Gas Outlet Temperature p. 306
- Calculate Turbine Work Output p. 309
- Calculate Vapor Density p. 312
- Appendix A Pipe Dimensions, Capacities, and Weights p. 315
- Appendix B Unit Conversions p. 317
- Index p. 319
