

Table of contents

- **Preface** (p. ix)
- **Chapter 1 Introduction** (p. 1)
- **Motivation** (p. 1)
- **Autonomous Vehicles** (p. 3)
- **Organization of This Book** (p. 4)
- **Chapter 2 Overall System Structure** (p. 9)
- **Actuation** (p. 11)
- **DC motor** (p. 11)
- **Servomotor** (p. 13)
- **Sensors** (p. 14)
- **Infrared (IR)** (p. 14)
- **Magnetic** (p. 16)
- **Vision** (p. 17)
- **Headway sensing** (p. 19)
- **Optical encoder** (p. 20)
- **Processors** (p. 21)
- **PIC microcontroller** (p. 21)
- **Digital signal processor (DSP)** (p. 22)
- **Power** (p. 23)
- **Batteries** (p. 23)
- **Automatic recharging** (p. 25)
- **Chapter 3 Construction** (p. 27)
- **Chapter 4 Environment Sensing** (p. 47)
- **Lateral Displacement** (p. 47)
- **IR circuitry** (p. 49)
- **Magnetic circuitry** (p. 51)
- **Headway Measurement** (p. 51)
- **IR range finder** (p. 52)
- **Battery Voltage Measurement** (p. 54)
- **Headway circuitry** (p. 52)
- **Speed Measurement** (p. 52)
- **Encoder circuitry** (p. 53)
- **Voltage-sensing circuitry** (p. 56)
- **Current-sensing circuitry** (p. 57)
- **A/D Conversion** (p. 57)
- **Data Bus Interface** (p. 59)
- **Chapter 5 DC Motors and Servos** (p. 69)
- **Magnetic Forces on a Moving Charge** (p. 69)
- **Magnetic Forces on a Conductor** (p. 70)
- **Magnetic Forces on a Loop** (p. 72)
- **Commutation** (p. 75)
- **DC Motor Power Control** (p. 75)
- **LMD18200 H-Bridge** (p. 85)

- **H-Bridge for the FLASH Car** (p. 87)
- **DC Motor Dynamics** (p. 87)
- **DC Motor Steady-State Analysis** (p. 95)
- **Static Friction Coefficient** (p. 97)
- **Identification of DC Motor Parameters** (p. 96)
- **Motor Resistance** (p. 97)
- **Torque and Back Emf Constants** (p. 97)
- **Viscous Friction Coefficient** (p. 97)
- **Others** (p. 97)
- **RC Servomotor** (p. 98)
- **MATLAB Models** (p. 101)
- **MATLAB Model for DC Motor** (p. 101)
- **MATLAB Model for the Futaba Servomotor** (p. 106)
- **Servo Hack** (p. 107)
- **Chapter 6 Low-Level Control** (p. 113)
- **Tutorial** (p. 113)
- **Features of the PIC16F874** (p. 117)
- **Program Details** (p. 119)
- **Initialization** (p. 119)
- **Main Program Loop** (p. 128)
- **Interrupts** (p. 130)
- **Programming the PIC** (p. 139)
- **MPLAB** (p. 140)
- **PIC programmers** (p. 143)
- **Chapter 7 Microprocessor Control** (p. 147)
- **Tutorial** (p. 147)
- **Using code composer** (p. 147)
- **Using the Flash Programming Utility** (p. 150)
- **Features of the DSP** (p. 151)
- **The DSP Program Flow** (p. 156)
- **Program Details** (p. 156)
- **Initialization** (p. 157)
- **Main program** (p. 158)
- **Programming the DSP** (p. 169)
- **Code Composer Studio** (p. 169)
- **Chapter 8 Modeling and Control Basics** (p. 177)
- **What Is Modeling?** (p. 177)
- **Closed-loop control** (p. 180)
- **A Little Bit of Math** (p. 181)
- **Mobile Robot Modeling and Control** (p. 183)
- **Kinematic vs. dynamic modeling** (p. 183)
- **Control objectives** (p. 183)
- **Control approach** (p. 185)
- **Chapter 9 Mathematical Modeling** (p. 187)
- **Kinematic Modeling** (p. 187)
- **Nonholonomic constraints** (p. 188)

- **Unicycle kinematic model** (p. 189)
- **Global coordinate model** (p. 190)
- **Path coordinate model** (p. 192)
- **Ground curves** (p. 194)
- **Image dynamics** (p. 194)
- **Dynamic Model** (p. 200)
- **Traction Control** (p. 206)
- **Nonlinear vehicle model** (p. 206)
- **Chapter 10 Control Design** (p. 213)
- **Path Following** (p. 213)
- **Path model controller** (p. 213)
- **Image controller** (p. 223)
- **Automatic Cruise Control** (p. 225)
- **Actuator Control** (p. 227)
- **Lateral controller** (p. 228)
- **Velocity controller** (p. 229)
- **Traction Control** (p. 231)
- **Chapter 11 Simulation Environment** (p. 233)
- **Simulation Overview** (p. 234)
- **The Simulation Program** (p. 234)
- **Path creation** (p. 234)
- **Error calculation** (p. 235)
- **Heading angle calculation** (p. 239)
- **Control input calculation** (p. 239)
- **Car model** (p. 240)
- **Control using the $[\phi]$ estimator** (p. 243)
- **What Is Control?** (p. 179)
- **Open-loop control** (p. 179)
- **Animation** (p. 240)
- **Simulation Results** (p. 241)
- **Control using the actual curvature** (p. 241)
- **Control using the model estimator** (p. 247)
- **Appendix A Bibliography** (p. 249)
- **Appendix B Schematics** (p. 253)
- **Appendix C Parts Information** (p. 263)
- **Appendix D Hardware Sources** (p. 267)
- **Index** (p. 273)
