

- Preface (p. xiii)
- **Part 1 Measuring, Recording and Monitoring Instruments**
- **1 Fundamentals of Medical Instrumentation (p. 3)**
- 1.1 Anatomy and Physiology (p. 3)
- 1.2 Physiological Systems of the Body (p. 4)
- 1.3 Sources of Biomedical Signals (p. 12)
- 1.4 Basic Medical Instrumentation System (p. 14)
- 1.5 Performance Requirements of Medical Instrumentation Systems (p. 16)
- 1.6 Intelligent Medical Instrumentation Systems (p. 18)
- 1.7 General Constraints in Design of Medical Instrumentation Systems (p. 26)
- 1.8 Regulation of Medical Devices (p. 28)
- **2 Bioelectric Signals and Electrodes (p. 32)**
- 2.1 Origin of Bioelectric Signals (p. 32)
- 2.2 Recording Electrodes (p. 39)
- 2.3 Silver-silver Chloride Electrodes (p. 48)
- 2.4 Electrodes for ECG (p. 50)
- 2.5 Electrodes for EEG (p. 58)
- 2.6 Electrodes for EMG (p. 59)
- 2.7 Electrical Conductivity of Electrode Jellies and Creams (p. 61)
- 2.8 Microelectrodes (p. 63)
- **3 Physiological Transducers (p. 66)**
- 3.1 Introduction (p. 66)
- 3.2 Classification of Transducers (p. 66)
- 3.3 Performance Characteristics of Transducers (p. 67)
- 3.4 Displacement, Position and Motion Transducers (p. 71)
- 3.5 Pressure Transducers (p. 78)
- 3.6 Transducers for Body Temperature Measurement (p. 83)
- 3.7 Photoelectric Transducers (p. 94)
- 3.8 Optical Fibre Sensors (p. 101)
- 3.9 Biosensors (p. 106)
- 3.10 Smart Sensors (p. 109)
- **4 Recording Systems (p. 111)**
- 4.1 Basic Recording System (p. 111)
- 4.2 General Considerations for Signal Conditioners (p. 112)
- 4.3 Preamplifiers (p. 114)
- 4.4 Sources of Noise in Low Level Measurements (p. 125)
- 4.5 Biomedical Signal Analysis Techniques (p. 128)
- 4.6 Signal Processing Techniques (p. 130)
- 4.7 The Main Amplifier and Driver Stage (p. 131)
- 4.8 Writing Systems (p. 132)
- 4.9 Direct Writing Recorders (p. 133)
- 4.10 The Ink Jet Recorder (p. 142)
- 4.11 Potentiometric Recorder (p. 143)
- 4.12 Digital Recorders (p. 146)
- 4.13 Instrumentation Tape Recorders (p. 151)
- **5 Biomedical Recorders (p. 154)**

- **5.1 Electrocardiograph** (p. 154)
- **5.2 Vectorcardiograph (VCG)** (p. 166)
- **5.3 Phonocardiograph (PCG)** (p. 167)
- **5.4 Electroencephalograph (EEG)** (p. 170)
- **5.5 Electromyograph (EMG)** (p. 178)
- **5.6 Other Biomedical Recorders** (p. 182)
- **5.7 Biofeedback Instrumentation** (p. 183)
- **6 Patient Monitoring Systems** (p. 186)
- **6.1 System Concepts** (p. 186)
- **6.2 Cardiac Monitor** (p. 187)
- **6.3 Bedside Patient Monitoring Systems** (p. 196)
- **6.4 Central Monitors** (p. 198)
- **6.5 Measurement of Heart Rate** (p. 202)
- **6.6 Measurement of Pulse Rate** (p. 204)
- **6.7 Blood Pressure Measurement** (p. 208)
- **7.2 Arrhythmia Monitor** (p. 244)
- **6.8 Measurement of Temperature** (p. 232)
- **6.9 Measurement of Respiration Rate** (p. 232)
- **6.10 Catheterization Laboratory Instrumentation** (p. 238)
- **7 Arrhythmia and Ambulatory Monitoring Instruments** (p. 243)
- **7.1 Cardiac Arrhythmias** (p. 243)
- **7.3 QRS Detection Techniques** (p. 247)
- **7.4 Exercise Stress Testing** (p. 254)
- **7.5 Ambulatory Monitoring Instruments** (p. 256)
- **8 Foetal Monitoring Instruments** (p. 263)
- **8.1 Cardiotocograph** (p. 263)
- **8.2 Methods of Monitoring Foetal Heart Rate** (p. 264)
- **8.3 Monitoring Labour Activity** (p. 278)
- **8.4 Recording System** (p. 281)
- **9 Biomedical Telemetry and Telemedicine** (p. 283)
- **9.1 Wireless Telemetry** (p. 283)
- **9.2 Single Channel Telemetry Systems** (p. 287)
- **9.3 Multi-channel Wireless Telemetry Systems** (p. 292)
- **9.4 Multi-patient Telemetry** (p. 296)
- **9.5 Implantable Telemetry Systems** (p. 298)
- **9.6 Transmission of Analog Physiological Signals Over Telephone** (p. 300)
- **9.7 Telemedicine** (p. 303)
- **10 Oximeters** (p. 312)
- **10.1 Oximetry** (p. 312)
- **10.2 Ear Oximeter** (p. 316)
- **10.3 Pulse Oximeter** (p. 318)
- **10.4 Skin Reflectance Oximeters** (p. 322)
- **10.5 Intravascular Oximeter** (p. 323)
- **11 Blood Flowmeters** (p. 325)
- **11.1 Electromagnetic Blood Flowmeter** (p. 325)
- **11.2 Types of Electromagnetic Flowmeters** (p. 328)

- **11.3 Ultrasonic Blood Flowmeters** (p. 331)
- **11.4 NMR Blood Flowmeter** (p. 340)
- **11.5 Laser Doppler Blood Flowmeter** (p. 341)
- **12 Cardiac Output Measurement** (p. 344)
- **12.1 Indicator Dilution Method** (p. 344)
- **12.2 Dye Dilution Method** (p. 346)
- **12.3 Thermal Dilution Techniques** (p. 347)
- **12.4 Measurement of Continuous Cardiac Output Derived from the Aortic Pressure Waveform** (p. 353)
- **12.5 Impedance Technique** (p. 354)
- **12.6 Ultrasound Method** (p. 356)
- **13 Pulmonary Function Analysers** (p. 358)
- **13.1 Pulmonary Function Measurements** (p. 358)
- **13.2 Spirometry** (p. 362)
- **13.3 Pneumotachometers** (p. 368)
- **13.4 Measurement of Volume** (p. 370)
- **13.5 Pulmonary Function Analyzers** (p. 375)
- **13.6 Respiratory Gas Analyzers** (p. 379)
- **14 Clinical Laboratory Instruments** (p. 387)
- **14.1 Medical Diagnosis with Chemical Tests** (p. 387)
- **14.2 Spectrophotometry** (p. 387)
- **14.3 Spectrophotometer Type Instruments** (p. 390)
- **14.4 Colorimeters** (p. 397)
- **14.5 Spectrophotometers** (p. 399)
- **14.6 Automated Biochemical Analysis Systems** (p. 403)
- **14.7 Clinical Flame Photometers** (p. 411)
- **14.8 Selective-ion Electrodes Based Electrolytes Analyzer** (p. 415)
- **15 Blood Gas Analyzers** (p. 420)
- **15.1 Acid-base Balance** (p. 420)
- **15.2 Blood pH Measurement** (p. 421)
- **15.3 Measurement of Blood PCO₂** (p. 425)
- **15.4 Blood pO₂ Measurement** (p. 428)
- **15.5 Intra-arterial Blood Gas Monitoring** (p. 430)
- **15.6 A Complete Blood Gas Analyzer** (p. 433)
- **16 Blood Cell Counters** (p. 444)
- **16.1 Types of Blood Cells** (p. 444)
- **16.2 Methods of Cell Counting** (p. 446)
- **16.3 Coulter Counters** (p. 449)
- **16.4 Automatic Recognition and Differential Counting of Cells** (p. 457)
- **17 Audiometers and Hearing Aids** (p. 463)
- **17.1 Mechanism of Hearing** (p. 463)
- **17.2 Measurement of Sound** (p. 467)
- **17.3 Basic Audiometer** (p. 468)
- **17.4 Pure Tone Audiometer** (p. 471)
- **17.5 Speech Audiometer** (p. 471)
- **17.6 Audiometer System Bekesy** (p. 472)

- **17.7 Evoked Response Audiometry System** (p. 476)
- **17.8 Calibration of Audiometers** (p. 478)
- **17.9 Hearing Aids** (p. 479)
- **18 Patient Safety** (p. 486)
- **18.1 Electric Shock Hazards** (p. 486)
- **18.2 Leakage Currents** (p. 495)
- **18.3 Safety Codes for Electromedical Equipment** (p. 498)
- **18.4 Electrical Safety Analyzer** (p. 499)
- **18.5 Testing of Biomedical Equipment** (p. 500)
- **Part 2 Modern Imaging Systems**
- **19 X-ray Machines and Digital Radiography** (p. 507)
- **19.1 Basis of Diagnostic Radiology** (p. 507)
- **19.2 Nature of X-rays** (p. 509)
- **19.3 Production of X-rays** (p. 510)
- **19.4 X-ray Machine** (p. 513)
- **19.5 Visualization of X-rays** (p. 526)
- **19.6 Dental X-ray Machines** (p. 530)
- **19.7 Portable and Mobile X-ray Units** (p. 531)
- **19.8 Physical Parameters for X-ray Detectors** (p. 532)
- **19.9 Digital Radiography** (p. 533)
- **20 X-ray Computed Tomography** (p. 538)
- **20.3 Gantry Geometry** (p. 561)
- **20.4 Patient Dose in CT Scanners** (p. 562)
- **21 Nuclear Medical Imaging Systems** (p. 563)
- **21.1 Radio-isotopes in Medical Diagnosis** (p. 563)
- **21.2 Physics of Radioactivity** (p. 564)
- **21.3 Radiation Detectors** (p. 567)
- **21.4 Pulse Height Analyser** (p. 570)
- **21.5 Uptake Monitoring Equipment** (p. 571)
- **21.6 Radio-isotope Rectilinear Scanner** (p. 572)
- **21.7 The Gamma Camera** (p. 574)
- **21.8 Multi-crystal Gamma Cameras** (p. 576)
- **21.9 Emission Computed Tomography (ECT)** (p. 581)
- **21.10 Single-photon Emission Computed Tomography (SPECT)** (p. 582)
- **21.11 Positron Emission Tomography (PET Scanner)** (p. 587)
- **22 Magnetic Resonance Imaging System** (p. 592)
- **22.1 Principles of NMR Imaging Systems** (p. 592)
- **22.2 Image Reconstruction Techniques** (p. 600)
- **22.3 Basic NMR Components** (p. 611)
- **22.4 Biological Effects of NMR Imaging** (p. 621)
- **22.5 Advantages of NMR Imaging System** (p. 621)
- **23 Ultrasonic Imaging Systems** (p. 623)
- **23.1 Diagnostic Ultrasound** (p. 623)
- **23.2 Physics of Ultrasonic Waves** (p. 623)
- **23.3 Medical Ultrasound** (p. 631)
- **23.4 Basic Pulse-echo Apparatus** (p. 631)

- 23.5 A-Scan (p. 638)
- 23.6 Echocardiograph (M-mode) (p. 640)
- 23.7 B-Scanner (p. 644)
- 23.8 Real-time Ultrasonic Imaging Systems (p. 646)
- 23.9 Multi-element Linear Array Scanners (p. 649)
- 23.10 Digital Scan Converter (p. 667)
- 23.11 Biological Effects of Ultrasound (p. 668)
- 24 Thermal Imaging Systems (p. 670)
- 24.1 Medical Thermography (p. 670)
- 24.2 Physics of Thermography (p. 672)
- 24.3 Infrared Detectors (p. 675)
- 24.4 Thermographic Equipment (p. 675)
- 24.5 Quantitative Medical Thermography (p. 678)
- 24.6 Pyroelectric Vidicon Camera (p. 681)
- 24.7 Thermal Camera Based on IR Sensor with Digital Focal Plane Array (p. 683)
- Part 3 Therapeutic Equipment
- 25 Cardiac Pacemakers (p. 687)
- 25.1 Need for Cardiac Pacemaker (p. 687)
- 25.2 External Pacemakers (p. 688)
- 25.3 Implantable Pacemakers (p. 691)
- 25.4 Recent Developments in Implantable Pacemakers (p. 710)
- 25.5 Pacing System Analyser (p. 713)
- 26 Cardiac Defibrillators (p. 714)
- 26.1 Need for a Defibrillator (p. 714)
- 26.2 DC Defibrillator (p. 715)
- 26.3 Implantable Defibrillators (p. 722)
- 26.4 Pacer-cardioverter-defibrillator (p. 725)
- 26.5 Defibrillator Analysers (p. 727)
- 27 Instruments for Surgery (p. 728)
- 27.1 Principle of Surgical Diathermy (p. 728)
- 27.2 Surgical Diathermy Machine (p. 731)
- 27.3 Safety Aspects in Electro-surgical Units (p. 739)
- 27.4 Surgical Diathermy Analysers (p. 741)
- 28 Laser Applications in Biomedical Field (p. 743)
- 28.1 The Laser (p. 743)
- 28.2 Pulsed Ruby Laser (p. 747)
- 28.3 Nd-YAG Laser (p. 749)
- 28.4 Helium-Neon Laser (p. 750)
- 28.5 Argon Laser (p. 751)
- 28.6 CO₂ Laser (p. 755)
- 28.7 Excimer Lasers (p. 758)
- 28.8 Semiconductor Lasers (p. 758)
- 28.9 Laser Safety (p. 759)
- 29 Physiotherapy and Electrotherapy Equipment (p. 760)
- 29.1 High Frequency Heat Therapy (p. 760)
- 29.2 Short-wave Diathermy (p. 760)

- **29.3 Microwave Diathermy** (p. 765)
- **29.4 Ultrasonic Therapy Unit** (p. 767)
- **29.5 Electrodiagnostic/Therapeutic Apparatus** (p. 769)
- **29.6 Pain Relief Through Electrical Stimulation** (p. 779)
- **29.7 Diaphragm Pacing by Radio-frequency for the Treatment of Chronic Ventilatory Insufficiency** (p. 783)
- **29.8 Bladder Stimulators** (p. 784)
- **30.2 Artificial Kidney** (p. 788)
- **20.1 Computed Tomography** (p. 538)
- **20.2 System Components** (p. 545)
- **29.9 Cerebellar Stimulators** (p. 784)
- **30 Haemodialysis Machines** (p. 785)
- **30.1 Function of the Kidneys** (p. 785)
- **30.3 Dialyzers** (p. 789)
- **30.4 Membranes for Haemodialysis** (p. 795)
- **30.5 Haemodialysis Machine** (p. 797)
- **30.6 Portable Kidney Machines** (p. 807)
- **31 Lithotriptors** (p. 810)
- **31.1 The Stone Disease Problem** (p. 810)
- **31.2 First Lithotripter Machine** (p. 811)
- **31.3 Modern Lithotripter Systems** (p. 813)
- **31.4 Extra-corporeal Shock-wave Therapy** (p. 822)
- **32 Anaesthesia Machine** (p. 825)
- **32.1 Need for Anaesthesia** (p. 825)
- **32.2 Anaesthesia Machine** (p. 826)
- **32.3 Electronics in the Anaesthetic Machine** (p. 835)
- **33 Ventilators** (p. 837)
- **33.1 Mechanics of Respiration** (p. 837)
- **33.7 Pressure-volume-flow Diagrams** (p. 848)
- **33.2 Artificial Ventilation** (p. 839)
- **33.3 Ventilators** (p. 840)
- **33.4 Types of Ventilators** (p. 841)
- **33.5 Ventilator Terms** (p. 841)
- **33.6 Classification of Ventilators** (p. 845)
- **33.8 Modern Ventilators** (p. 848)
- **33.9 High Frequency Ventilators** (p. 851)
- **33.10 Humidifiers, Nebulizers and Aspirators** (p. 852)
- **34 Radiotherapy Equipment** (p. 853)
- **34.1 Use of High Voltage X-ray Machines** (p. 853)
- **34.2 Development of Betatron** (p. 853)
- **34.3 Cobalt-60 Machine** (p. 854)
- **34.4 Medical Linear Accelerator Machine** (p. 859)
- **35 Automated Drug Delivery Systems** (p. 870)
- **35.1 Infusion Pumps** (p. 870)
- **35.2 Components of Drugs Infusion Systems** (p. 871)
- **35.3 Implantable Infusion Systems** (p. 874)

- **35.4 Closed-loop Control in Infusion Systems** (p. 876)
- **35.5 Examples of Typical Infusion Pumps** (p. 877)
- **References** (p. 885)
- **Index** (p. 902)
