

- Preface p. xiii
- 1 Signals and Signal Processing p. 1
  - 1.1 Characterization and Classification of Signals p. 1
  - 1.2 Typical Signal Processing Operations p. 3
  - 1.3 Examples of Typical Signals p. 12
  - 1.4 Typical Signal Processing Applications p. 22
  - 1.5 Why Digital Signal Processing? p. 37
- 2 Discrete-Time Signals and Systems in the Time-Domain p. 41
  - 2.1 Discrete-Time Signals p. 42
  - 2.2 Typical Sequences and Sequence Representation p. 53
  - 2.3 The Sampling Process p. 60
  - 2.4 Discrete-Time Systems p. 63
  - 2.5 Time-Domain Characterization of LTI Discrete-Time Systems p. 71
  - 2.6 Finite-Dimensional LTI Discrete-Time Systems p. 80
  - 2.7 Correlation of Signals p. 88
  - 2.8 Random Signals p. 94
  - 2.9 Summary p. 105
  - 2.10 Problems p. 106
  - 2.11 Matlab Exercises p. 115
- 3 Discrete-Time Signals in the Transform-Domain p. 117
  - 3.1 The Discrete-Time Fourier Transform p. 117
  - 3.2 The Discrete Fourier Transform p. 131
  - 3.3 Relation between the DTFT and the DFT, and Their Inverses p. 137
  - 3.4 Discrete Fourier Transform Properties p. 140
  - 3.5 Computation of the DFT of Real Sequences p. 146
  - 3.6 Linear Convolution Using the DFT p. 149
  - 3.7 The z-Transform p. 155
  - 3.8 Region of Convergence of a Rational z-Transform p. 159
  - 3.9 Inverse z-Transform p. 167
  - 3.10 z-Transform Properties p. 173
  - 3.11 Transform-Domain Representations of Random Signals p. 176
  - 3.12 Summary p. 179
  - 3.13 Problems p. 180
  - 3.14 Matlab Exercises p. 199
- 4 LTI Discrete-Time Systems in the Transform-Domain p. 203
  - 4.1 Finite-Dimensional Discrete-Time Systems p. 203
  - 4.2 The Frequency Response p. 204
  - 4.3 The Transfer Function p. 215
  - 4.4 Types of Transfer Functions p. 222
  - 4.5 Simple Digital Filters p. 234
  - 4.6 Allpass Transfer Function p. 243
  - 4.7 Minimum-Phase and Maximum-Phase Transfer Functions p. 246
  - 4.8 Complementary Transfer Functions p. 248
  - 4.9 Inverse Systems p. 253

- 4.10 System Identification p. 256
- 4.11 Digital Two-Pairs p. 259
- 4.12 Algebraic Stability Test p. 261
- 4.13 Discrete-Time Processing of Random Signals p. 267
- 4.14 Matched Filter p. 272
- 4.15 Summary p. 275
- 4.16 Problems p. 277
- 4.17 Matlab Exercises p. 295
- 5 Digital Processing of Continuous-Time Signals p. 299
- 5.1 Introduction p. 299
- 5.2 Sampling of Continuous-Time Signals p. 300
- 5.3 Sampling of Bandpass Signals p. 310
- 5.4 Analog Lowpass Filter Design p. 313
- 5.5 Design of Analog Highpass, Bandpass, and Bandstop Filters p. 329
- 5.6 Anti-Aliasing Filter Design p. 335
- 5.7 Sample-and-Hold Circuit p. 337
- 5.8 Analog-to-Digital Converter p. 338
- 5.9 Digital-to-Analog Converter p. 344
- 5.10 Reconstruction Filter Design p. 348
- 5.11 Effect of Sample-and-Hold Operation p. 351
- 5.12 Summary p. 352
- 5.13 Problems p. 353
- 5.14 Matlab Exercises p. 356
- 6 Digital Filter Structures p. 359
- 6.1 Block Diagram Representation p. 359
- 6.2 Equivalent Structures p. 363
- 6.3 Basic FIR Digital Filter Structures p. 364
- 6.4 Basic IIR Digital Filter Structures p. 368
- 6.5 Realization of Basic Structures Using Matlab p. 374
- 6.6 Allpass Filters p. 378
- 6.7 Tunable IIR Digital Filters p. 387
- 6.8 IIR Tapped Cascaded Lattice Structures p. 389
- 6.9 FIR Cascaded Lattice Structures p. 395
- 6.10 Parallel Allpass Realization of IIR Transfer Functions p. 401
- 6.11 Digital Sine-Cosine Generator p. 405
- 6.12 Computational Complexity of Digital Filter Structures p. 408
- 6.13 Summary p. 408
- 6.14 Problems p. 409
- 6.15 Matlab Exercises p. 421
- 7 Digital Filter Design p. 423
- 7.1 Preliminary Considerations p. 423
- 7.2 Bilinear Transformation Method of IIR Filter Design p. 430
- 7.3 Design of Lowpass IIR Digital Filters p. 435
- 7.4 Design of Highpass, Bandpass, and Bandstop IIR Digital Filters p. 437

- 7.5 Spectral Transformations of IIR Filters p. 441
- 7.6 FIR Filter Design Based on Windowed Fourier Series p. 446
- 7.7 Computer-Aided Design of Digital Filters p. 460
- 7.8 Design of FIR Digital Filters with Least-Mean-Square Error p. 468
- 7.9 Constrained Least-Square Design of FIR Digital Filters p. 469
- 7.10 Digital Filter Design Using Matlab p. 472
- 7.11 Summary p. 497
- 7.12 Problems p. 498
- 7.13 Matlab Exercises p. 510
- 8 DSP Algorithm Implementation p. 515
- 8.1 Basic Issues p. 515
- 8.2 Structure Simulation and Verification Using Matlab p. 523
- 8.3 Computation of the Discrete Fourier Transform p. 535
- 8.4 Number Representation p. 552
- 8.5 Arithmetic Operations p. 556
- 8.6 Handling of Overflow p. 562
- 8.7 Tunable Digital Filters p. 562
- 8.8 Function Approximation p. 568
- 8.9 Summary p. 571
- 8.10 Problems p. 572
- 8.11 Matlab Exercises p. 581
- 9 Analysis of Finite Wordlength Effects p. 583
- 9.1 The Quantization Process and Errors p. 584
- 9.2 Quantization of Fixed-Point Numbers p. 585
- 9.3 Quantization of Floating-Point Numbers p. 587
- 9.4 Analysis of Coefficient Quantization Effects p. 588
- 9.5 A/D Conversion Noise Analysis p. 600
- 9.6 Analysis of Arithmetic Round-Off Errors p. 611
- 9.7 Dynamic Range Scaling p. 614
- 9.8 Signal-to-Noise Ratio in Low-Order IIR Filters p. 625
- 9.9 Low-Sensitivity Digital Filters p. 629
- 9.10 Reduction of Product Round-Off Errors Using Error Feedback p. 635
- 9.11 Limit Cycles in IIR Digital Filters p. 639
- 9.12 Round-Off Errors in FFT Algorithms p. 646
- 9.13 Summary p. 649
- 9.14 Problems p. 650
- 9.15 Matlab Exercises p. 657
- 10 Multirate Digital Signal Processing p. 659
- 10.1 The Basic Sample Rate Alteration Devices p. 660
- 10.2 Filters in Sampling Rate Alteration Systems p. 671
- 10.3 Multistage Design of Decimator and Interpolator p. 680
- 10.4 The Polyphase Decomposition p. 684
- 10.5 Arbitrary-Rate Sampling Rate Converter p. 690
- 10.6 Digital Filter Banks p. 696

- 10.7 Nyquist Filters p. 700
- 10.8 Two-Channel Quadrature-Mirror Filter Bank p. 705
- 10.9 Perfect Reconstruction Two-Channel FIR Filter Banks p. 714
- 10.10 L-Channel QMF Banks p. 722
- 10.11 Cosine-Modulated L-Channel Filter Banks p. 730
- 10.12 Multilevel Filter Banks p. 734
- 10.13 Summary p. 738
- 10.14 Problems p. 739
- 10.15 Matlab Exercises p. 750
- 11 Applications of Digital Signal Processing p. 753
- 11.1 Dual-Tone Multifrequency Signal Detection p. 753
- 11.2 Spectral Analysis of Sinusoidal Signals p. 758
- 11.3 Spectral Analysis of Nonstationary Signals p. 764
- 11.4 Spectral Analysis of Random Signals p. 771
- 11.5 Musical Sound Processing p. 780
- 11.6 Digital FM Stereo Generation p. 790
- 11.7 Discrete-Time Analytic Signal Generation p. 794
- 11.8 Subband Coding of Speech and Audio Signals p. 800
- 11.9 Transmultiplexers p. 803
- 11.10 Discrete Multitone Transmission of Digital Data p. 807
- 11.11 Digital Audio Sampling Rate Conversion p. 811
- 11.12 Oversampling A/D Converter p. 813
- 11.13 Oversampling D/A Converter p. 822
- 11.14 Sparse Antenna Array Design p. 826
- 11.15 Summary p. 829
- 11.16 Problems p. 830
- 11.17 Matlab Exercises p. 834
- Bibliography p. 837
- Index p. 855
