

- Contributors
- Preface
- Pt. 1 Technology Advances
- Ch. 1 History of Fiber Optics
- Ch. 2 Market Analysis and Business Planning
- Ch. 3 Small Form Factor Fiber Optic Connector
- Ch. 4 Specialty Fiber Optic Cables
- Ch. 5 Optical Wavelength Division Multiplexing for Data Communication Networks
- Ch. 6 Optical Backplanes, Board and Chip Interconnects
- Ch. 7 Parallel Computer Architectures Using Fiber Optics
- Pt. 2 The Future
- Ch. 8 Packaging Assembly Techniques
- Ch. 9 InfiniBand - The Interconnect from Backplane to Fiber
- Ch. 10 New Devices for Optoelectronics: Smart Pixels
- Ch. 11 Emerging Technology for Fiber Optic Data Communication
- Ch. 12 Manufacturing Challenges
- App. A Measurement Conversion Tables
- App. B Physical Constants
- App. C Index of Professional Organizations
- App. D OSI Model
- App. E Network Standards and Documents
- App. F Data Network Rates
- App. G Other Datacom Developments
- Acronyms
- Glossary
- Index
