

- Contributors p. xi
- Preface p. xiii
- 1. A Primer on UHMWPE p. 1
  - Introduction p. 1
  - What Is a Polymer? p. 2
  - What Is Polyethylene? p. 4
  - Crystallinity p. 6
  - Thermal Transitions p. 7
  - Overview of the Handbook p. 9
- 2. From Ethylene Gas to UHMWPE Component: The Process of Producing Orthopedic Implants p. 13
  - Introduction p. 13
  - Polymerization: From Ethylene Gas to UHMWPE Powder p. 14
  - Conversion: From UHMWPE Powder to Consolidated Form p. 22
  - Machining: From Consolidated Form to Implant p. 31
  - Conclusion p. 32
- 3. Packaging and Sterilization of UHMWPE p. 37
  - Introduction p. 37
  - Gamma Sterilization in Air p. 38
  - Gamma Sterilization in Barrier Packaging p. 41
  - Ethylene Oxide Gas Sterilization p. 44
  - Gas Plasma Sterilization p. 45
  - Shelf Life of UHMWPE Components for Total Joint Replacement p. 47
  - Overview of Current Trends p. 48
- 4. The Origins of UHMWPE in Total Hip Arthroplasty p. 53
  - Introduction and Timeline p. 53
  - The Origins of a Gold Standard (1958-1982) p. 55
  - Charnley's First Hip Arthroplasty Design with PTFE (1958) p. 56
  - Implant Fixation with Pink Dental Acrylic Cement (1958-1966) p. 56
  - Interim Hip Arthroplasty Designs with PTFE (1958-1960) p. 58
  - Final Hip Arthroplasty Design with PTFE (1960-1962) p. 58
  - Implant Fabrication at Wrightington p. 61
  - The First Wear Tester p. 62
  - Searching to Replace PTFE p. 64
  - UHMWPE Arrives at Wrightington p. 66
  - Implant Sterilization Procedures at Wrightington p. 66
  - Overview p. 68
- 5. The Clinical Performance of UHMWPE in Hip Replacements p. 71
  - Introduction p. 71
  - Joint Replacements Do Not Last Forever p. 73
  - Range of Clinical Wear Performance in Cemented Acetabular Components p. 75
  - Wear Versus Wear Rate of Hip Replacements p. 77
  - Comparing Wear Rates Between Different Clinical Studies p. 79
  - Comparison of Wear Rates in Clinical and Retrieval Studies p. 82

- Current Methods for Measuring Clinical Wear in Total Hip Arthroplasty p. 83
- Range of Clinical Wear Performance in Modular Acetabular Components p. 85
- Conclusion p. 86
- 6. Alternatives to Conventional UHMWPE for Hip Arthroplasty p. 93
  - Introduction p. 93
  - Metal-on-Metal Alternative Hip Bearings p. 94
  - Ceramics in Hip Arthroplasty p. 101
  - Highly Crosslinked and Thermally Stabilized UHMWPE p. 109
  - Summary p. 114
- 7. The Origins and Adaptations of UHMWPE for Knee Replacements p. 123
  - Introduction p. 123
  - Frank Gunston and the Wrightington Connection to Total Knee Arthroplasty p. 126
  - Polycentric Knee Arthroplasty p. 129
  - Unicondylar Polycentric Knee Arthroplasty p. 132
  - Bicondylar Total Knee Arthroplasty p. 134
  - Patello-Femoral Arthroplasty p. 141
  - UHMWPE with Metal Backing p. 142
  - Conclusion p. 146
- 8. The Clinical Performance of UHMWPE in Knee Replacements p. 151
  - Introduction p. 151
  - Biomechanics of Total Knee Arthroplasty p. 153
  - Clinical Performance of UHMWPE in Knee Arthroplasty p. 160
  - Osteolysis and Wear in Total Knee Arthroplasty p. 172
  - UHMWPE Is the Only Alternative for Knee Arthroplasty p. 182
- 9. The Clinical Performance of UHMWPE in Shoulder Replacements Stefan Gabriel p. 189
  - Introduction p. 189
  - The Shoulder Joint p. 190
  - Shoulder Replacement p. 191
  - Biomechanics of Total Shoulder Replacement p. 195
  - Future Directions in Total Shoulder Arthroplasty p. 211
  - Contemporary Total Shoulder Replacements p. 197
  - Clinical Performance of Total Shoulder Arthroplasty p. 203
  - Controversies in Shoulder Replacement p. 207
  - Conclusion p. 213
- 10. The Clinical Performance of UHMWPE in the Spine Marta L. Villarraga and Peter A. Cripton p. 219
  - Introduction p. 219
  - Biomechanical Considerations for UHMWPE in the Spine p. 222
  - Total Disc Replacement Designs Using UHMWPE p. 226
  - Clinical Performance of UHMWPE in the Spine p. 237
  - Alternatives to UHMWPE for Total Disc Arthroplasty in the Spine p. 239
  - Conclusion p. 240
- 11. Mechanisms of Crosslinking and Oxidative Degradation of UHMWPE Luigi Costa and Pierangiola Bracco p. 245

- Introduction p. 245
- Mechanisms of Crosslinking p. 245
- UHMWPE Oxidation p. 250
- Oxidative Degradation after Implant Manufacture p. 256
- In Vivo Absorption of Lipids p. 257
- 12. Characterization of Physical, Chemical, and Mechanical Properties of UHMWPE Stephen Spiegelberg p. 263
  - Introduction p. 263
  - What Does the Food and Drug Administration Require? p. 264
  - Physical Property Characterization p. 265
  - Intrinsic Viscosity p. 269
  - Chemical Property Characterization p. 274
  - Mechanical Property Characterization p. 280
  - Other Testing p. 284
  - Conclusion p. 284
- 13. Development and Application of the Small Punch Test to UHMWPE Avram Allan Edidin p. 287
  - Introduction p. 287
  - Overview and Metrics of the Small Punch Test p. 288
  - Accelerated and Natural Aging of UHMWPE p. 291
  - In Vivo Changes in Mechanical Behavior of UHMWPE p. 294
  - Effect of Crosslinking on Mechanical Behavior and Wear p. 295
  - Shear Punch Testing of UHMWPE p. 298
  - Fatigue Punch Testing of UHMWPE p. 301
  - Conclusion p. 305
- 14. Computer Modeling and Simulation of UHMWPE Jorgen Bergstrom p. 309
  - Introduction p. 309
  - Overview of Available Modeling and Simulation Techniques p. 310
  - Characteristic Material Behavior of UHMWPE p. 311
  - Material Models for UHMWPE p. 317
  - Discussion p. 334
- 15. Compendium of Highly Crosslinked and Thermally Treated UHMWPEs p. 337
  - Introduction p. 337
  - Honorable Mention p. 338
  - Crossfire p. 339
  - DURASUL p. 342
  - Longevity p. 345
  - Marathon p. 348
  - Prolong p. 351
  - XLPE p. 352
  - Current Trends and Prevalence in Total Hip and Total Knee Arthroplasty p. 353
  - The Future for Highly Crosslinked UHMWPE p. 357
  - Appendix p. 365
  - Index p. 369
