

- Preface p. ix
- Introduction p. 1
- Part I The Natural System p. 9
- 1. Earth's Lithosphere: Geologic Time and Building Blocks p. 11
- 2. Earth's Lithosphere: Plate Tectonics p. 43
- 3. The Fluid Earth: Atmosphere p. 71
- 4. The Fluid Earth: Hydrosphere p. 99
- 5. Earth's Ecosphere p. 135
- 6. Biogeochemical Cycles of Carbon, Nutrients, and Oxygen p. 171
- 7. Historical Framework of Global Environmental Change p. 197
- Part II The Human Dimension p. 223
- 8. World Population, Development, and Resource Consumption p. 225
- 9. The Changing Earth Surface: Terrestrial Vegetation p. 265
- 10. The Changing Earth Surface: Land and Water p. 301
- 11. The Changing Atmosphere: Acid Deposition and Photochemical Smog p. 343
- 12. The Changing Atmosphere: Pleistocene and Holocene Environmental Change p. 383
- 13. The Changing Atmosphere: Global Warming and Stratospheric Ozone Depletion p. 419
- 14. Human Dimensions of Global Environmental Change p. 487
- Appendix Minerals p. 509
- Elements p. 509
- Oxides p. 509
- Silicates p. 514
- Aluminosilicates p. 515
- Layered Aluminosilicates p. 516
- Carbonates p. 516
- Sulfates p. 517
- Sulfides p. 517
- Answers to Study Questions p. 519
- Glossary p. 541
- References p. 551
- Index p. 563
