

- I Introduction To Cim And The Manufacturing Enterprise
- 1 The Manufacturing Enterprise
  - Introduction
  - External Challenges
  - Internal Challenges
  - World-Class Order-Winning Criteria
  - The Problem and a Solution
  - Learning CIM Concepts
  - Going for the Globe
  - Summary
  - References
  - Questions
  - Problems
  - Projects
- Appendix 1-1 The Benefits of a CIM Implementation
- Appendix 1-2 The Parable of the Two Farmers
- 2 Manufacturing Systems
  - Manufacturing Classifications
  - Product Development Cycle
  - Enterprise Organization
  - Manual Production Operations
  - Summary
  - References
  - Questions
  - Problems
- Appendix 2-1 CIM as a Competitive Weapon
  - Case Study: Evolution and Progress-One World-Class Company's Measurement System
- II The Design Elements And Production Engineering
- 3 Product Design and Production Engineering
  - Product Design and Production Engineering
  - Organization Model
  - The Design Process: A Model
  - Concurrent Engineering
  - Production Engineering
  - Summary
  - References
  - Questions
  - Projects
  - Case Study: Repetitive Design
- 4 Design Automation: CAD
  - Introduction to CAD Systems
  - General System Operation
  - CAD Classification: Hardware Platforms
  - CAD Classification: Software
  - Application of CAD to Manufacturing Systems

- Summary
- References
- Questions
- Problems
- Projects
- Appendix 4-1 B-Splines to Nurb
- Appendix 4-1 Web Sites for CAD Vendors
- Appendix 4-3 Web Sites for Computer Systems
- 5 Design Automation: Computer-Aided Engineering
  - Design for Manufacturing and Assembly
  - Computer-Aided Engineering Analysis
  - Computer-Aided Engineering Evaluation
  - Group Technology
  - Production Engineering Strategies
  - Design and Production Engineering Network
  - Summary
  - References
  - Questions
  - Problems
  - Projects
- Appendix 5-1 Ten Guidelines for Design for Assembly
- Appendix 5-2 Web Sites for CAE Vendors
- Appendix 5-3 Web Sites for Rapid Prototyping Vendors
- III Managing The Enterprise Resources
- 6 Introduction to Production/Operations Planning
  - Operations Management
  - Manufacturing Planning and Control
  - Manufacturing Planning and Control Model-Manufacturing Resource Planning (MRP2).  
Material Requirements Planning
  - Introduction to Production Activity Control
  - Gantt Charts and Schedule Boards
  - Priority Control and Dispatching Techniques
  - Shop Loading
  - Input/Output Control
  - Automating the MPC Function
  - Summary
  - References
  - Questions
  - Problems
  - Projects
- 7 Introduction to Manufacturing Planning and Control
  - Planning in the MPC System
  - Production Planning
  - Master Production Schedule
  - Inventory Management
  - Product Data Management

- Summary
- References
- Questions
- Problems
- Projects
- Case Study 7-1: Production System at New United Motor Manufacturing, Part 1
- 8 Material Planning, Production Scheduling, and Operating Systems
  - Material Requirements Planning
  - Capacity Requirements Planning
  - From Reorder-Point Systems to Manufacturing Resource Planning (MRP II). Just-in-Time Manufacturing
    - Synchronized Production
    - The Emergence of Lean Production
- Summary
- References
- Questions
- Problems
- Projects
- Case Study: Production System at New United Motor Manufacturing, Part 2
- Appendix 8-1 Wright's Bicycle Example
