

- Part I. Fundamentals
- 1. Units p. 3
- 2. Fundamentals of Electricity, Magnetism, and Circuits p. 15
 - Electromagnetism
- 3. Fundamentals of Mechanics and Heat p. 50
- Part II. Electrical Machines and Transformers
- 4. Direct-Current Generators p. 71
 - Construction of Direct-Current Generators
- 5. Direct-Current Motors p. 96
- 6. Efficiency and Heating of Electrical Machines p. 120
- 7. Active, Reactive, and Apparent Power p. 134
- 8. Three-Phase Circuits p. 158
- 9. The Ideal Transformer p. 183
- 10. Practical Transformers p. 197
- 11. Special Transformers p. 225
- 12. Three-Phase Transformers p. 243
- 13. Three-Phase Induction Motors p. 263
- 14. Selection and Application of Three-Phase Induction Motors p. 299
- 15. Equivalent Circuit of the Induction Motor p. 322
- 16. Synchronous Generators p. 335
- 17. Synchronous Motors p. 369
- 18. Single-Phase Motors p. 391
 - Equivalent Circuit of a Single-Phase Motor
- 19. Stepper Motors p. 417
- Part III. Electrical and Electronic Drives
- 20. Basics of Industrial Motor Control p. 439
 - Electric Drives
- 21. Fundamental Elements of Power Electronics p. 472
 - The Diode and Diode Circuits
 - The Thyristor and Thyristor Circuits
 - DC-to-DC Switching Converters
 - DC-to-AC Switching Converters
- 22. Electronic Control of Direct-Current Motors p. 541
- 23. Electronic Control of Alternating Current Motors p. 575
 - Self-Commutated Inverters
 - Pulse-Width Modulation Drives
 - Torque and Speed Control of Induction Motors
- Part IV. Electric Utility Power Systems
- 24. Generation of Electrical Energy p. 635
 - Hydropower Generating Stations
 - Thermal Generating Stations
 - Nuclear Generating Stations
- 25. Transmission of Electrical Energy p. 664
- 26. Distribution of Electrical Energy p. 698
 - Substations
 - Protection of Medium-Voltage Distribution Systems

- Low-Voltage Distribution
- 27. The Cost of Electricity p. 729
- 28. Direct-Current Transmission p. 746
- 29. Transmission and Distribution Solid-State Controllers p. 768
 - Transmission Power Flow Controllers
 - Distribution Custom Power Products
- 30. Harmonics p. 799
 - Effect of Harmonics
 - Harmonic Analysis
- 31. Programmable Logic Controllers p. 831
 - Modernization of an Industry
