

- 1 Extracting Metals from Ores
- 2 The Casting of Metals
- 3 The Physical and Mechanical Properties of Metals
- 4 The Crystal Structure of Metals, Basic Phase Diagrams and the Metallographic Sample Preparation Laboratory
- 5 Classification, Identification and Selection of Iron Alloys
- 6 The Manufacturing of Steel Products
- 7 Heat Treating Equipment
- 8 The Iron-Carbon Phase Diagram
- 9 The Hardenability of Steels, I-T T-T-T Diagrams and Cooling Curves
- 10 Annealing, Stress Relieving, Normalizing, Hardening and Tempering of Steels
- 11 Welding Processes for Iron and Iron Alloys
- 12 Identification and Heat Treatment of Nonferrous Metals
- 13 Metallurgy of Welds: Nonferrous Metals
- 14 Powder Metallurgy
- 15 Corrosion of Metals
- 16 Composite Materials
- 17 Nondestructive Testing
- 18 Plastics and Elastomers
- 19 Ceramic Materials
- 20 Wood and Paper Products
- 21 Adhesives and Industrial Lubricants and Gasses
- 22 Hardness Testing
- 23 Failure Analysis and Materials Characterization Techniques
- Appendix
- Glossary
