

- **1 General Principles** (p. 3)
- **Chapter Objectives** (p. 3)
- **1.1 Mechanics** (p. 3)
- **1.2 Fundamental Concepts** (p. 4)
- **1.3 Units of Measurement** (p. 6)
- **1.4 The International System of Units** (p. 8)
- **1.5 Numerical Calculations** (p. 10)
- **1.6 General Procedure for Analysis** (p. 14)
- **2 Force Vectors** (p. 17)
- **Chapter Objectives** (p. 17)
- **2.1 Scalars and Vectors** (p. 17)
- **2.2 Vector Operations** (p. 18)
- **2.3 Vector Addition of Forces** (p. 20)
- **2.4 Addition of a System of Coplanar Forces** (p. 31)
- **2.5 Cartesian Vectors** (p. 43)
- **2.6 Addition and Subtraction of Cartesian Vectors** (p. 46)
- **2.7 Position Vectors** (p. 55)
- **2.8 Force Vector Directed along a Line** (p. 58)
- **2.9 Dot Product** (p. 68)
- **Chapter Review** (p. 77)
- **3 Equilibrium of a Particle** (p. 83)
- **Chapter Objectives** (p. 83)
- **3.1 Condition for the Equilibrium of a Particle** (p. 83)
- **3.2 The Free-Body Diagram** (p. 83)
- **3.3 Coplanar Force Systems** (p. 87)
- **3.4 Three-Dimensional Force Systems** (p. 100)
- **Chapter Review** (p. 111)
- **4 Force System Resultants** (p. 117)
- **Chapter Objectives** (p. 117)
- **4.1 Moment of a Force-Scalar Formulation** (p. 117)
- **4.2 Cross Product** (p. 122)
- **4.3 Moment of a Force-Vector Formulation** (p. 125)
- **4.4 Principle of Moments** (p. 130)
- **4.5 Moment of a Force about a Specified Axis** (p. 142)
- **4.6 Moment of a Couple** (p. 152)
- **4.7 Equivalent System** (p. 165)
- **4.8 Resultants of a Force and Couple System** (p. 167)
- **4.9 Further Reduction of a Force and Couple System** (p. 171)
- **4.10 Reduction of a Simple Distributed Loading** (p. 185)
- **Chapter Review** (p. 195)
- **5 Equilibrium of a Rigid Body** (p. 201)
- **Chapter Objectives** (p. 201)
- **5.1 Conditions for Rigid-Body Equilibrium** (p. 201)
- **Equilibrium in Two Dimensions** (p. 203)
- **5.2 Free-Body Diagrams** (p. 203)
- **5.3 Equations of Equilibrium** (p. 217)

- **5.4 Two- and Three-Force Members** (p. 226)
- **Equilibrium in Three Dimensions** (p. 239)
- **5.5 Free-Body Diagrams** (p. 239)
- **5.6 Equations of Equilibrium** (p. 245)
- **5.7 Constraints for a Rigid Body** (p. 246)
- **Chapter Review** (p. 261)
- **6 Structural Analysis** (p. 267)
- **Chapter Objectives** (p. 267)
- **6.1 Simple Trusses** (p. 267)
- **6.2 The Method of Joints** (p. 270)
- **6.3 Zero-Force Members** (p. 276)
- **6.4 The Method of Sections** (p. 283)
- **6.5 Space Trusses** (p. 293)
- **6.6 Frames and Machines** (p. 297)
- **Chapter Review** (p. 328)
- **7 Internal Forces** (p. 337)
- **Chapter Objectives** (p. 337)
- **7.1 Internal Forces Developed in Structural Members** (p. 337)
- **7.2 Shear and Moment Equations and Diagrams** (p. 354)
- **7.3 Relations between Distributed Load, Shear, and Moment** (p. 362)
- **7.4 Cables** (p. 373)
- **Chapter Review** (p. 389)
- **8 Friction** (p. 393)
- **Chapter Objectives** (p. 393)
- **8.1 Characteristics of Dry Friction** (p. 393)
- **8.2 Problems Involving Dry Friction** (p. 397)
- **8.3 Wedges** (p. 418)
- **8.4 Frictional Forces on Screws** (p. 420)
- **8.5 Frictional Forces on Flat Belts** (p. 428)
- **8.6 Frictional Forces on Collar Bearings, Pivot Bearings, and Disks** (p. 436)
- **8.7 Frictional Forces on Journal Bearings** (p. 439)
- **8.8 Rolling Resistance** (p. 441)
- **Chapter Review** (p. 449)
- **9 Center of Gravity and Centroid** (p. 455)
- **Chapter Objectives** (p. 455)
- **9.1 Center of Gravity and Center of Mass for a System of Particles** (p. 455)
- **9.2 Center of Gravity, Center of Mass, and Centroid for a Body** (p. 457)
- **9.3 Composite Bodies** (p. 478)
- **9.4 Theorems of Pappus and Guldinus** (p. 492)
- **9.5 Resultant of a General Distributed Loading** (p. 500)
- **9.6 Fluid Pressure** (p. 501)
- **Chapter Review** (p. 513)
- **10 Moments of Inertia** (p. 519)
- **Chapter Objectives** (p. 519)
- **10.1 Definition of Moments of Inertia for Areas** (p. 519)
- **10.2 Parallel-Axis Theorem for an Area** (p. 521)

- **10.3 Radius of Gyration of an Area** (p. 521)
- **10.4 Moments of Inertia for an Area by Integration** (p. 522)
- **10.5 Moments of Inertia for Composite Areas** (p. 530)
- **10.6 Product of Inertia for an Area** (p. 538)
- **10.7 Moments of Inertia for an Area about Inclined Axes** (p. 542)
- **10.8 Mohr's Circle for Moments of Inertia** (p. 545)
- **10.9 Mass Moment of Inertia** (p. 555)
- **Chapter Review** (p. 568)
- **11 Virtual Work** (p. 573)
- **Chapter Objectives** (p. 573)
- **11.1 Definition of Work and Virtual Work** (p. 573)
- **11.2 Principle of Virtual Work for a Particle and a Rigid Body** (p. 576)
- **11.3 Principle of Virtual Work for a System of Connected Rigid Bodies** (p. 577)
- **11.4 Conservative Forces** (p. 590)
- **11.5 Potential Energy** (p. 591)
- **11.6 Potential-Energy Criterion for Equilibrium** (p. 592)
- **11.7 Stability of Equilibrium** (p. 594)
- **Chapter Review** (p. 606)
- **Appendices**
- **A Mathematical Review and Expressions** (p. 608)
- **B Numerical and Computer Analysis** (p. 612)
- **C Review for the Fundamentals of Engineering Examination** (p. 618)
- **Answers to Selected Problems** (p. 638)
- **Index** (p. 652)
