

Table of contents

- **I SINGLE-DEGREE-OF-FREEDOM SYSTEMS**
- **1 Equations of Motion, Problem Statement, and Solution Methods**
- Simple Structures
- Single-Degree-of-Freedom System
- Force-Displacement Relation
- Damping Force
- Equation of Motion: External Force
- Mass-Spring-Damper System
- Equation of Motion: Earthquake Excitation
- Problem Statement and Element Forces
- Combining Static and Dynamic Responses
- Methods of Solution of the Differential Equation
- Study of SDF Systems: Organization
- Appendix 1: Stiffness Coefficients for a Flexural Element
- **2 Free Vibration**
- Undamped Free Vibration
- Viscously Damped Free Vibration
- Energy in Free Vibration
- Coulomb-Damped Free Vibration
- **3 Response to Harmonic and Periodic Excitations**
- Viscously Damped Systems: Basic Results
- Harmonic Vibration of Undamped Systems
- Harmonic Vibration with Viscous Damping
- Viscously Damped Systems: Applications
- Response to Vibration Generator
- Natural Frequency and Damping from Harmonic Tests
- Force Transmission and Vibration Isolation
- Response to Ground Motion and Vibration Isolation
- Vibration-Measuring Instruments
- Energy Dissipated in Viscous Damping
- Equivalent Viscous Damping
- Systems with Nonviscous Damping
- Harmonic Vibration with Rate-Independent Damping
- Harmonic Vibration with Coulomb Friction
- Response to Periodic Excitation
- Fourier Series Representation
- Response to Periodic Force
- Appendix 3: Four-Way Logarithmic Graph Paper
- **4 Response to Arbitrary, Step, and Pulse Excitations**
- Response to Arbitrarily Time-Varying Forces
- Response to Unit Impulse
- Response to Arbitrary Force
- Response to Step and Ramp Forces
- Step Force

- **Ramp or Linearly Increasing Force**
- **Step Force with Finite Rise Time**
- **Response to Pulse Excitations**
- **Solution Methods**
- **Rectangular Pulse Force**
