

- Most chapters end with a Chapter Summary
- Problems, References, and a list of related Articles and World Wide Web Sites
- Preface
- Chapter 1 Introduction
 - 1.1 Evolution of Data Communications and Networks
 - 1.1.1 Changes in Telecommunications in the Late Twentieth Century
 - 1.1.2 The Progress and Future of Telecommunications
 - 1.1.3 Present Solutions
 - 1.2 Telephone Systems and Computer Telephony
 - 1.2.1 Telephone Functioning
 - 1.2.2 Telephone Networks
 - 1.2.3 Telephone Numbering
 - 1.3 Overview of Computer Telephony
 - 1.3.1 Computer Telephony
 - 1.3.2 Internet Telephony
 - 1.3.3 Unified Messaging
 - 1.3.4 Network Structures and Network Topologies
 - 1.4 Distributed Systems and Client-Server Models
 - 1.4.1 Centralized Computing vs. Distributed and Client-Server Systems
 - 1.4.2 Three-Tier Client-Server Systems
 - 1.4.3 Web-Based Application Servers and Electronic Commerce
 - 1.5 Protocols and Standardization
 - 1.5.1 Protocol Syntax and Semantics
 - 1.5.2 National and International Standards
 - 1.5.3 Telecommunication Standards and Organizations
 - 1.5.4 Networks Standards and Organizations
- Chapter 2 Data Communications
 - 2.1 Advantages of Digital Communications
 - 2.2 Transmission Media
 - 2.2.1 Shielded and Unshielded Twisted Pair (STP and UTP) Wiring
 - 2.2.2 Coaxial Cable
 - 2.2.3 Optical Fiber
 - 2.2.4 Radio and Microwave
 - 2.2.5 Satellite Communications
 - 2.3 Fundamentals of Digital Transmission
 - 2.3.1 Frequency Spectrum, Bandwidth, and Data Rate
 - 2.3.2 Shannon's Law
 - 2.3.3 The Sampling (Nyquist) Theorem
 - 2.4 Digitization and Multilevel Transmission
 - 2.4.1 Pulse Code Modulation (PCM)
 - 2.4.2 Advanced Digitization Techniques: CPCM, DPCM and ADPCM
 - 2.5 Modulation Techniques and Modems
 - 2.5.1 Amplitude Modulation
 - 2.5.2 Frequency Modulation

- 2.5.3 Phase Modulation
- 2.5.4 Modem Technologies
- 2.6 Terminal Devices
 - 2.6.1 Dumb and Intelligent Terminals
 - 2.6.2 Data Terminal Equipment and Data Communications Equipment
- 2.7 Wireless Communication
 - 2.7.1 Digital Cellular Telephone and Personal Communication Services (PCS)
 - 2.7.2 Wireless Data Services
 - 2.7.3 Geographic Position Systems and Their Applications
- 2.8 Videoconferencing
 - 2.8.1 Desktop Videoconference Systems
 - 2.8.2 Document Conference Systems
 - 2.8.3 Videoconference Standards
- Chapter 3 The OSI Seven-Layer Network Model
 - 3.1 Physical Layer
 - 3.1.1 Data Encoding
 - 3.1.2 Multiplexing Schemes
 - 3.2 Data Link Layer
 - 3.2.1 Asynchronous and Synchronous Communications
 - 3.2.2 Error Detection and Correction
 - 3.2.3 Framing and Flow Control
 - 3.2.4 High-Level Data Link Control (HDLC)
 - 3.3 Network Layer
 - 3.3.1 Subnet Concept
 - 3.3.2 Overview of Switching Techniques
 - 3.3.3 Routing Strategies
 - 3.3.4 Congestion Control
 - 3.4 Transport Layer and Session Layer
 - 3.5 Presentation Layer and Application Layer
 - 3.5.1 Data Compression
 - 3.5.2 Encryption and Decryption
 - 3.5.3 Network Applications
 - 3.6 Network Performance
 - 3.6.1 Delay
 - 3.6.2 Throughput
 - 3.6.3 Bandwidth Utilization
 - 3.6.4 Error Rate, Congestion, and Network Reliability
- Chapter 4 LAN Technologies
 - 4.1 LAN Overview
 - 4.2 Protocols and Standards
 - 4.2.1 IEEE Standards
 - 4.2.2 CSMA/CD, Ethernet, and IEEE 802.3
 - 4.2.3 Token Bus and IEEE 802.4
 - 4.2.4 Token Ring and IEEE 802.5

- 4.2.5 Commercial LAN Systems
- 4.2.6 Wireless LAN and IEEE 802.11
- 4.3 LAN Hardware
 - 4.3.1 Connecting Components: Cabling, Connectors, Transceivers, Repeaters, and Network Interface Cards
 - 4.3.2 Workstations and Network Servers
 - 4.3.3 Network Storage Systems and Hierarchical Storage Management (HSM)
- 4.4 LAN Services and LAN Operating Systems
 - 4.4.1 Network File System
 - 4.4.2 Network Directory Services
 - 4.4.3 Network Printing and Fax Services
 - 4.4.4 Backup
 - 4.4.5 LAN Operating Systems
- Chapter 5 TCP/IP and the Internet
 - 5.1 Internet Architecture
 - 5.1.1 Internet Addresses
 - 5.1.2 Gateway Addressing
 - 5.1.3 Network and Broadcast Addressing
 - 5.1.4 Dotted Decimal Notation
 - 5.1.5 Loopback Addressing
 - 5.1.6 Weaknesses in Internet Addressing
 - 5.1.7 Mapping of Physical and IP Addresses
 - 5.1.8 Reverse Address Resolution Protocol (RARP)
 - 5.2 Internet Protocol (IP) and Datagrams
 - 5.2.1 IP Datagram Format and Types of Services
 - 5.2.2 Dat
