

- Preface p. xxv
- About the Author p. xxxiii
- Chapter 1 Chemical Bonding and Chemical Structure p. 1
 - 1.1 Introduction p. 1
 - 1.2 Classical Theories of Chemical Bonding p. 3
 - 1.3 Structures of Covalent Compounds p. 11
 - 1.4 Resonance Structures p. 18
 - 1.5 Wave Nature of the Electron p. 20
 - 1.6 Electronic Structure of the Hydrogen Atom p. 21
 - 1.7 Electronic Structures of More Complex Atoms p. 27
 - 1.8 Another Look at the Covalent Bond: Molecular Orbitals p. 30
 - 1.9 Hybrid Orbitals p. 35
 - Key Ideas in Chapter 1 p. 38
 - Additional Problems p. 39
- Chapter 2 Alkanes p. 43
 - 2.1 Hydrocarbons p. 43
 - 2.2 Unbranched Alkanes p. 45
 - 2.3 Conformations of Alkanes p. 47
 - 2.4 Constitutional Isomers and Nomenclature p. 53
 - 2.5 Cycloalkanes and Skeletal Structures p. 62
 - 2.6 Physical Properties of Alkanes p. 65
 - 2.7 Combustion and Elemental Analysis p. 70
 - 2.8 Occurrence and Use of Alkanes p. 73
 - 2.9 Functional Groups, Compound Classes, and the "R" Notation p. 76
 - Key Ideas in Chapter 2 p. 78
 - Additional Problems p. 78
- Chapter 3 Acids and Bases: The Curved-Arrow Notation p. 82
 - 3.1 Lewis Acid-Base Association Reactions p. 82
 - 3.2 Electron-Pair Displacement Reactions p. 85
 - 3.3 Review of the Curved-Arrow Notation p. 89
 - 3.4 Bronsted-Lowry Acids and Bases p. 91
 - 3.5 Free Energy and Chemical Equilibrium p. 96
 - 3.6 Relationship of Structure to Acidity p. 99
 - Key Ideas in Chapter 3 p. 105
 - Additional Problems p. 106
- Chapter 4 Introduction to Alkenes: Structure and Reactivity p. 111
 - 4.1 Structure and Bonding in Alkenes p. 111
 - 4.2 Nomenclature of Alkenes p. 119
 - 4.3 Unsaturation Number p. 126
 - 4.4 Physical Properties of Alkenes p. 127
 - 4.5 Relative Stabilities of Alkene Isomers p. 128
 - 4.6 Addition Reactions of Alkenes p. 133
 - 4.7 Addition of Hydrogen Halides to Alkenes p. 134
 - 4.8 Reaction Rates p. 142
 - 4.9 Catalysis p. 150
 - Key Ideas in Chapter 4 p. 155

- Additional Problems p. 156
- Chapter 5 Addition Reactions of Alkenes p. 160
- 5.1 Reactions of Alkenes with Halogens p. 160
- 5.2 Writing Organic Reactions p. 164
- 5.3 Conversion of Alkenes Into Alcohols p. 165
- 5.4 Ozonolysis of Alkenes p. 173
- 5.5 Free-Radical Addition of Hydrogen Bromide to Alkenes p. 177
- 5.6 Polymers: Free-Radical Polymerization of Alkenes p. 190
- 5.7 Alkenes in the Chemical Industry p. 192
- Key Ideas in Chapter 5 p. 195
- Additional Problems p. 195
- Chapter 6 Principles of Stereochemistry p. 201
- 6.1 Enantiomers, Chirality, and Symmetry p. 201
- 6.2 Nomenclature of Enantiomers: The R,S System p. 206
- 6.3 Physical Properties of Enantiomers: Optical Activity p. 209
- 6.4 Racemates p. 213
- 6.5 Stereochemical Correlation p. 215
- 6.6 Diastereomers p. 217
- 6.7 Meso Compounds p. 221
- 6.8 Enantiomeric Resolution p. 224
- 6.9 Chiral Molecules Without Asymmetric Atoms p. 226
- 6.10 Conformational Stereoisomers p. 228
- 6.11 Fischer Projections p. 231
- 6.12 The Postulation of Tetrahedral Carbon p. 235
- Key Ideas in Chapter 6 p. 239
- Additional Problems p. 239
- Chapter 7 Cyclic Compounds: Stereochemistry of Reactions p. 244
- 7.1 Relative Stabilities of the Monocyclic Alkanes p. 244
- 7.2 Conformations of Cyclohexane p. 245
- 7.3 Monosubstituted Cyclohexanes: Conformational Analysis p. 253
- 7.4 Disubstituted Cyclohexanes p. 257
- 7.5 Cyclopentane, Cyclobutane, and Cyclopropane p. 265
- 7.6 Bicyclic and Polycyclic Compounds p. 268
- 7.7 Relative Reactivities of Stereoisomers p. 275
- 7.8 Reactions That Form Stereoisomers p. 278
- 7.9 Stereochemistry of Chemical Reactions p. 283
- Key Ideas in Chapter 7 p. 293
- Additional Problems p. 294
- Chapter 8 Introduction to Alkyl Halides, Alcohols, Ethers, Thiols, and Sulfides p. 301
- 8.1 Nomenclature p. 302
- 8.2 Structures p. 310
- 8.3 Effect of Molecular Polarity and Hydrogen Bonding on Physical Properties p. 311
- 8.4 Solvents in Organic Chemistry p. 316
- 8.5 Applications of Solubility and Solvation Principles p. 322
- 8.6 Acidity of Alcohols and Thiols p. 328
- 8.7 Basicity of Alcohols and Ethers p. 333

- 8.8 Grignard and Organolithium Reagents p. 334
- 8.9 Industrial Preparation and Use of Alkyl Halides, Alcohols, and Ethers p. 338
- Key Ideas in Chapter 8 p. 346
- Additional Problems p. 347
- Chapter 9 Chemistry of Alkyl Halides p. 351
- 9.1 An Overview of Nucleophilic Substitution and [beta]-Elimination Reactions p. 351
- 9.2 Equilibrium in Nucleophilic Substitution Reactions p. 356
- 9.3 Reaction Rates p. 357
- 9.4 The S_N2 Reaction p. 360
- 9.5 The E2 Reaction p. 371
- 9.6 The S_N1 and E1 Reactions p. 382
- 9.7 Summary of Substitution and Elimination Reactions of Alkyl Halides p. 391
- 9.8 Carbenes and Carbenoids p. 394
- Key Ideas in Chapter 9 p. 399
- Additional Problems p. 400
- Chapter 10 Chemistry of Alcohols and Thiols p. 408
- 10.1 Dehydration of Alcohols p. 408
- 10.2 Reactions of Alcohols with Hydrogen Halides p. 411
- 10.3 Sulfonate and Inorganic Ester Derivatives of Alcohols p. 414
- 10.4 Conversion of Alcohols into Alkyl Halides: Summary p. 422
- 10.5 Oxidation and Reduction in Organic Chemistry p. 423
- 10.6 Oxidation of Alcohols p. 430
- 10.7 Biological Oxidation of Ethanol p. 433
- 10.8 Chemical and Stereochemical Group Equivalence p. 436
- 10.9 Oxidation of Thiols p. 443
- 10.10 Synthesis of Alcohols p. 446
- 10.11 Design of Organic Synthesis p. 447
- Key Ideas in Chapter 10 p. 449
- Additional Problems p. 450
- Chapter 11 Chemistry of Ethers, Epoxides, Glycols, and Sulfides p. 455
- 11.1 Synthesis of Ethers and Sulfides p. 455
- 11.2 Synthesis of Epoxides p. 461
- 11.3 Cleavage of Ethers p. 464
- 11.4 Nucleophilic Substitution Reactions of Epoxides p. 467
- 11.5 Preparation and Oxidative Cleavage of Glycols p. 473
- 11.6 Oxonium and Sulfonium Salts p. 479
- 11.7 Neighboring-Group Participation: Intramolecular Reactions p. 481
- 11.8 Oxidation of Ethers and Sulfides p. 484
- 11.9 The Three Fundamental Operations of Organic Synthesis p. 485
- Key Ideas in Chapter 11 p. 487
- Additional Problems p. 488
- Chapter 12 Introduction to Spectroscopy: Infrared Spectroscopy and Mass Spectrometry p. 497
- 12.1 Introduction to Spectroscopy p. 497
- 12.2 Infrared Spectroscopy p. 502
- 12.3 Infrared Absorption and Chemical Structure p. 505

- 12.4 Functional-Group Infrared Absorptions p. 512
- 12.5 The Infrared Spectrometer p. 517
- 12.6 Introduction to Mass Spectrometry p. 518
- Key Ideas in Chapter 12 p. 531
- Additional Problems p. 531
- Chapter 13 Nuclear Magnetic Resonance Spectroscopy p. 539
- 13.1 An Overview of Proton NMR Spectroscopy p. 539
- 13.2 Physical Basis of NMR Spectroscopy p. 542
- 13.3 The NMR Spectrum: Chemical Shift and Integral p. 544
- 13.4 The NMR Spectrum: Spin-Spin Splitting p. 557
- 13.5 Complex NMR Spectra p. 566
- 13.6 USE of Deuterium in Proton NMR p. 573
- 13.7 Characteristic Functional-Group NMR Absorptions p. 574
- 13.8 NMR Spectroscopy of Dynamic Systems p. 581
- 13.9 Carbon NMR p. 584
- 13.10 Solving Structure Problems with Spectroscopy p. 591
- 13.11 The NMR Spectrometer p. 594
- 13.12 Other uses of NMR p. 596
- Key Ideas in Chapter 13 p. 597
- Additional Problems p. 597
- Chapter 14 Chemistry of Alkynes p. 606
- 14.1 Nomenclature of Alkynes p. 606
- 14.2 Structure and Bonding In Alkynes p. 608
- 14.3 Physical Properties of Alkynes p. 611
- 14.4 Introduction to Addition Reactions of the Triple Bond p. 614
- 14.5 Conversion of Alkynes Into Aldehydes and Ketones p. 615
- 14.6 Reduction of Alkynes p. 620
- 14.7 Acidity of 1-Alkynes p. 623
- 14.8 Organic Synthesis Using Alkynes p. 627
- 14.9 Pheromones p. 628
- 14.10 Occurrence and use of Alkynes p. 630
- Key Ideas in Chapter 14 p. 631
- Additional Problems p. 632
- Chapter 15 Dienes, Resonance, and Aromaticity p. 637
- 15.1 Structure and Stability of Dienes p. 638
- 15.2 Ultraviolet Spectroscopy p. 642
- 15.3 The Diels-Alder Reaction p. 648
- 15.4 Addition of Hydrogen Halides to Conjugated Dienes p. 658
- 15.5 Diene Polymers p. 664
- 15.6 Resonance p. 666
- 15.7 Introduction to Aromatic Compounds p. 673
- Key Ideas in Chapter 15 p. 684
- Additional Problems p. 685
- Chapter 16 Chemistry of Benzene and Its Derivatives p. 694
- 16.1 Nomenclature of Benzene Derivatives p. 694
- 16.2 Physical Properties of Benzene Derivatives p. 697

- 16.3 Spectroscopy of Benzene Derivatives p. 698
- 16.4 Electrophilic Aromatic Substitution Reactions of Benzene p. 704
- 16.5 Electrophilic Aromatic Substitution Reactions of Substituted Benzenes p. 716
- 16.6 Hydrogenation of Benzene Derivatives p. 731
- 16.7 Source and Industrial use of Aromatic Hydrocarbons p. 732
- Key Ideas in Chapter 16 p. 735
- Additional Problems p. 735
- Chapter 17 Allylic and Benzylic Reactivity p. 743
- 17.1 Reactions Involving Allylic and Benzylic Carbocations p. 744
- 17.2 Reactions Involving Allylic and Benzylic Radicals p. 748
- 17.3 Reactions Involving Allylic and Benzylic Anions p. 753
- 17.4 Allylic and Benzylic S_N2 Reactions p. 757
- 17.5 Benzylic Oxidation of Alkylbenzenes p. 758
- 17.6 Terpenes p. 759
- Key Ideas in Chapter 17 p. 766
- Additional Problems p. 767
- Chapter 18 Chemistry of Aryl Halides, Vinylic Halides, and Phenols: Transition-Metal Catalysis p. 775
- 18.1 Lack of Reactivity of Vinylic and Aryl Halides Under S_N2 Conditions p. 776
- 18.2 Elimination Reactions of Vinylic Halides p. 778
- 18.3 Lack of Reactivity of Vinylic and Aryl Halides Under S_N1 Conditions p. 779
- 18.4 Nucleophilic Substitution Reactions of Aryl Halides p. 781
- 18.5 Transition-Metal Catalyzed Coupling Reactions p. 788
- 18.6 Acidity of Phenols p. 807
- 18.7 Oxidation of Phenols to Quinones p. 811
- 18.8 Electrophilic Aromatic Substitution Reactions of Phenols p. 815
- 18.9 Reactivity of the Aryl-Oxygen Bond p. 819
- 18.10 Industrial Preparation and use of Phenol p. 823
- Key Ideas in Chapter 18 p. 824
- Additional Problems p. 825
- Chapter 19 Chemistry of Aldehydes and Ketones: Carbonyl-Addition Reactions p. 836
- 19.1 Nomenclature of Aldehydes and Ketones p. 838
- 19.2 Physical Properties of Aldehydes and Ketones p. 842
- 19.3 Spectroscopy of Aldehydes and Ketones p. 843
- 19.4 Synthesis of Aldehydes and Ketones p. 851
- 19.5 Introduction to Aldehyde and Ketone Reactions p. 851
- 19.6 Basicity of Aldehydes and Ketones p. 852
- 19.7 Reversible Addition Reactions of Aldehydes and Ketones p. 855
- 19.8 Reduction of Aldehydes and Ketones to Alcohols p. 861
- 19.9 Reactions of Aldehydes and Ketones with Grignard and Related Reagents p. 865
- 19.10 Acetals and Their use as Protecting Groups p. 868
- 19.11 Reactions of Aldehydes and Ketones with Amines p. 874
- 19.12 Reduction of Carbonyl Groups to Methylene Groups p. 879
- 19.13 The Wittig Alkene Synthesis p. 881

- 19.14 Oxidation of Aldehydes to Carboxylic Acids p. 884
- 19.15 Manufacture and use of Aldehydes and Ketones p. 886
- Key Ideas in Chapter 19 p. 887
- Additional Problems p. 888
- Chapter 20 Chemistry of Carboxylic Acids p. 895
- 20.1 Nomenclature of Carboxylic Acids p. 895
- 20.2 Structure and Physical Properties of Carboxylic Acids p. 900
- 20.3 Spectroscopy of Carboxylic Acids p. 902
- 20.4 Acid-Base Properties of Carboxylic Acids p. 904
- 20.5 Fatty Acids, Soaps, and Detergents p. 908
- 20.6 Synthesis of Carboxylic Acids p. 910
- 20.7 Introduction to Carboxylic Acid Reactions p. 911
- 20.8 Conversion of Carboxylic Acids into Esters p. 913
- 20.9 Conversion of Carboxylic Acids into Acid Chlorides and Anhydrides p. 918
- 20.10 Reduction of Carboxylic Acids to Primary Alcohols p. 922
- 20.11 Decarboxylation of Carboxylic Acids p. 923
- Key Ideas in Chapter 20 p. 926
- Additional Problems p. 926
- Chapter 21 Chemistry of Carboxylic Acid Derivatives p. 934
- 21.1 Nomenclature and Classification of Carboxylic Acid Derivatives p. 934
- 21.2 Structures of Carboxylic Acid Derivatives p. 940
- 21.3 Physical Properties of Carboxylic Acid Derivatives p. 942
- 21.4 Spectroscopy of Carboxylic Acid Derivatives p. 944
- 21.5 Basicity of Carboxylic Acid Derivatives p. 949
- 21.6 Introduction to Reactions of Carboxylic Acid Derivatives p. 950
- 21.7 Hydrolysis of Carboxylic Acid Derivatives p. 951
- 21.8 Reactions of Carboxylic Acid Derivatives with Nucleophiles p. 963
- 21.9 Reduction of Carboxylic Acid Derivatives p. 969
- 21.10 Reactions of Carboxylic Acid Derivatives with Organometallic Reagents p. 977
- 21.11 Synthesis of Carboxylic Acid Derivatives p. 980
- 21.12 Use and Occurrence of Carboxylic Acids and Their Derivatives p. 982
- Key Ideas in Chapter 21 p. 986
- Additional Problems p. 987
- Chapter 22 Chemistry of Enolate Ions, Enols, and α,β -Unsaturated Carbonyl Compounds p. 997
- 22.1 Acidity of Carbonyl compounds p. 998
- 22.2 Enolization of Carbonyl Compounds p. 1003
- 22.3 α -Halogenation of Carbonyl Compounds p. 1007
- 22.4 Aldol Addition and Aldol Condensation p. 1014
- 22.5 Condensation Reactions Involving Ester Enolate Ions p. 1023
- 22.6 Biosynthesis of Fatty Acids p. 1032
- 22.7 Alkylation of Ester Enolate Ions p. 1035
- 22.8 Conjugate-Addition Reactions p. 1043
- 22.9 Reduction of α,β -Unsaturated Carbonyl Compounds p. 1052
- 22.10 Reactions of α,β -Unsaturated Carbonyl Compounds with Organometallic Reagents p. 1053

- 22.11 Organic Synthesis with Conjugate-Addition Reactions p. 1055
- Key Ideas in Chapter 22 p. 1057
- Additional Problems p. 1058
- Chapter 23 Chemistry of Amines p. 1069
- 23.1 Nomenclature of Amines p. 1070
- 23.2 Structure of Amines p. 1072
- 23.3 Physical Properties of Amines p. 1073
- 23.4 Spectroscopy of Amines p. 1074
- 23.5 Basicity and Acidity of Amines p. 1076
- 23.6 Quaternary Ammonium Salts p. 1083
- 23.7 Alkylation and Acylation Reactions of Amines p. 1083
- 23.8 Hofmann Elimination of Quaternary Ammonium Hydroxides p. 1088
- 23.9 Aromatic Substitution Reactions of Aniline Derivatives p. 1092
- 23.10 Diazotization: Reactions of Diazonium Ions p. 1094
- 23.11 Synthesis of Amines p. 1100
- 23.12 Use and Occurrence of Amines p. 1108
- Key Ideas in Chapter 23 p. 1110
- Additional Problems p. 1111
- Chapter 24 Chemistry of Naphthalene and the Aromatic Heterocycles p. 1120
- 24.1 Chemistry of Naphthalene p. 1122
- 24.2 Introduction to the Aromatic Heterocycles p. 1128
- 24.3 Chemistry of Furan, Pyrrole, and Thiophene p. 1135
- 24.4 Synthesis of Indoles p. 1140
- 24.5 Chemistry of Pyridine and Quinoline p. 1144
- 24.6 Occurrence of Heterocyclic Compounds p. 1161
- Key Ideas in Chapter 24 p. 1162
- Additional Problems p. 1163
- Chapter 25 Pericyclic Reactions p. 1172
- 25.1 Molecular Orbitals of Conjugated [pi]-Electron Systems p. 1175
- 25.2 Electrocyclic Reactions p. 1183
- 25.3 Cycloaddition Reactions p. 1183
- 25.4 Sigmatropic Reactions p. 1192
- 25.5 Summary of the Pericyclic Selection Rules p. 1203
- 25.6 Fluxional Molecules p. 1204
- 25.7 Formation of Vitamin D p. 1205
- Key Ideas in Chapter 25 p. 1207
- Additional Problems p. 1208
- Chapter 26 Amino Acids, Peptides, and Proteins p. 1215
- 26.1 Nomenclature of Amino Acids and Peptides p. 1216
- 26.2 Stereochemistry of the [alpha]-Amino Acids p. 1220
- 26.3 Acid-Base Properties of Amino Acids and Peptides p. 1221
- 26.4 Synthesis and Enantiomeric Resolution of [alpha]-Amino Acids p. 1229
- 26.5 Acylation and Esterification Reactions of Amino Acids p. 1232
- 26.6 Determination of Peptide Structure p. 1233
- 26.7 Solid-Phase Peptide Synthesis p. 1246
- 26.8 Combinatorial Chemistry p. 1255

- 26.9 Structures of Peptides and Proteins p. 1261
- 26.10 Enzymes: Biological Catalysts p. 1270
- 26.11 Occurrence of Peptides and Proteins p. 1279
- Key Ideas in Chapter 26 p. 1280
- Additional Problems p. 1281
- Chapter 27 Carbohydrates and Nucleic Acids p. 1291
- 27.1 Classification and Properties of Carbohydrates p. 1292
- 27.2 Structures of the Monosaccharides p. 1293
- 27.3 Mutarotation of Carbohydrates p. 1302
- 27.4 Base-Catalyzed Isomerization of Aldoses and Ketoses p. 1306
- 27.5 Glycosides p. 1308
- 27.6 Ether and Ester Derivatives of Carbohydrates p. 1311
- 27.7 Oxidation and Reduction Reactions of Carbohydrates p. 1314
- 27.8 Kiliani-Fischer Synthesis p. 1319
- 27.9 Proof of Glucose Stereochemistry p. 1320
- 27.10 Disaccharides and Polysaccharides p. 1326
- 27.11 Nucleosides, Nucleotides, and Nucleic Acids p. 1333
- 27.12 DNA, RNA, and the Genetic Code p. 1341
- Key Ideas in Chapter 27 p. 1345
- Additional Problems p. 1346
- Appendixes p. 1
- Appendix I Substitutive Nomenclature of Organic Compounds p. 1
- Appendix II Infrared Absorptions of Organic Compounds p. 2
- Appendix III Proton NMR Chemical Shifts in Organic Compounds p. 5
- Appendix IV [¹³C] NMR Chemical Shifts in Organic Compounds p. 7
- Appendix V Summary of Synthetic Methods p. 8
- Appendix VI Reactions Used to Form Carbon-Carbon Bonds p. 13
- Appendix VII Typical Acidities and Basicities of Organic Functional Groups p. 14
- Credits p. 1
- Index p. 1
