

- Preface p. xi
- Introduction p. xv
- Acknowledgements p. xvii
- 1 Engineering philosophy of EV development p. 1
- 1.1 Past, present and future of EVs p. 1
- 1.1.1 Past 30 years development p. 1
- 1.1.2 Present major issues p. 3
- 1.1.3 Development trends p. 4
- 1.2 Engineering philosophy of EVs p. 7
- 1.2.1 EV concept p. 7
- 1.2.2 EV engineering philosophy p. 8
- 1.2.3 Key EV technologies p. 9
- References p. 14
- 2 EV and HEV developments p. 16
- 2.1 Historical development p. 16
- 2.2 Recent development p. 18
- 2.3 State-of-the-art EVs and HEVs p. 22
- References p. 28
- 3 EV systems p. 29
- 3.1 EV configurations p. 29
- 3.1.1 Fixed and variable gearing p. 35
- 3.1.2 Single- and multiple-motor drives p. 37
- 3.1.3 In-wheel drives p. 38
- 3.2 EV parameters p. 40
- 3.2.1 Weight and size parameters p. 40
- 3.2.2 Force parameters p. 41
- 3.2.3 Energy parameters p. 42
- 3.2.4 Performance parameters p. 44
- References p. 48
- 4 HEV systems p. 49
- 4.1 HEV configurations p. 49
- 4.1.1 Series hybrid system p. 52
- 4.1.2 Parallel hybrid system p. 52
- 4.1.3 Series-parallel hybrid system p. 53
- 4.1.4 Complex hybrid system p. 53
- 4.2 Power flow control p. 53
- 4.2.1 Series hybrid control p. 55
- 4.2.2 Parallel hybrid control p. 55
- 4.2.3 Series-parallel hybrid control p. 55
- 4.2.4 Complex hybrid control p. 60
- 4.3 Example of HEV system performances p. 63
- References p. 66
- 5 Electric propulsion p. 67
- 5.1 EV considerations p. 67

- 5.1.1 Electric motors p. 69
- 5.1.2 Power electronics p. 77
- 5.1.3 Microelectronics p. 83
- 5.1.4 Control strategies p. 83
- 5.2 Dc motor drives p. 84
- 5.2.1 System configurations p. 84
- 5.2.2 Dc motors p. 85
- 5.2.3 Dc-dc converters p. 88
- 5.2.4 Speed control p. 91
- 5.3 Induction motor drives p. 94
- 5.3.1 System configurations p. 95
- 5.3.2 Induction motors p. 96
- 5.3.3 Inverters p. 97
- 5.3.4 Speed control p. 101
- 5.4 Permanent-magnet motor drives p. 114
- 5.4.1 PM materials p. 116
- 5.4.2 PM dc motor drives p. 117
- 5.4.3 PM brushless motor drives p. 118
- 5.5 Switched reluctance motor drives p. 133
- 5.5.1 Principle of operation p. 135
- 5.5.2 Design of SR motors p. 141
- 5.5.3 Control of SR motor drives p. 143
- References p. 147
- 6 Energy sources p. 151
- 6.1 Batteries p. 153
- 6.1.1 Lead-acid battery p. 155
- 6.1.2 Nickel-based batteries p. 157
- 6.1.3 Metal/air batteries p. 160
- 6.1.4 Sodium-[beta] batteries p. 162
- 6.1.5 Ambient-temperature lithium batteries p. 164
- 6.1.6 Evaluation of batteries p. 166
- 6.2 Fuel cells p. 168
- 6.2.1 Acid fuel cells p. 170
- 6.2.2 Alkaline fuel cells p. 171
- 6.2.3 Molten carbonate fuel cells p. 172
- 6.2.4 Solid oxide fuel cells p. 173
- 6.2.5 Solid polymer fuel cells p. 173
- 6.2.6 Direct methanol fuel cells p. 175
- 6.2.7 Evaluation of fuel cells p. 176
- 6.3 Ultracapacitors p. 178
- 6.3.1 Features of ultracapacitors p. 179
- 6.3.2 Design of ultracapacitors p. 179
- 6.3.3 Evaluation of ultracapacitors p. 181
- 6.4 Ultrahigh-speed flywheels p. 182

- 6.4.1 Features of ultrahigh-speed flywheels p. 183
- 6.4.2 Design of ultrahigh-speed flywheels p. 183
- 6.4.3 Evaluation of ultrahigh-speed flywheels p. 187
- 6.5 Hybridization of energy sources p. 187
- 6.5.1 Near-term hybrids p. 188
- 6.5.2 Long-term hybrids p. 190
- References p. 190
- 7 EV auxiliaries p. 192
- 7.1 Battery characteristics and chargers p. 193
- 7.1.1 Battery discharging characteristics p. 193
- 7.1.2 Battery charging characteristics p. 196
- 7.1.3 Battery chargers p. 202
- 7.2 Battery indication and management p. 207
- 7.2.1 Battery indicating methods and devices p. 208
- 7.2.2 Battery management methods and devices p. 214
- 7.3 Temperature control units p. 217
- 7.3.1 Air conditioners p. 217
- 7.3.2 Thermoelectric variable temperature seats p. 219
- 7.4 Power steering units p. 220
- 7.4.1 Electrohydraulic power steering p. 221
- 7.4.2 Electric power steering p. 222
- 7.5 Auxiliary power supplies p. 222
- 7.5.1 Auxiliary battery p. 224
- 7.5.2 Dc-dc converters p. 224
- 7.6 Navigation systems p. 225
- 7.6.1 Local navigation p. 226
- 7.6.2 Global navigation p. 226
- 7.7 Regenerative braking systems p. 227
- 7.7.1 System configuration p. 228
- 7.7.2 Braking control p. 230
- References p. 231
- 8 EV simulation p. 233
- 8.1 System level simulation p. 233
- 8.2 EV simulator p. 235
- 8.2.1 Simulator features p. 236
- 8.2.2 Simulator modules p. 240
- 8.2.3 Performance evaluation p. 242
- 8.3 System optimization p. 243
- 8.3.1 Transmission ratio p. 245
- 8.3.2 System voltage p. 246
- 8.3.3 Hybridization ratio p. 247
- 8.4 Case study p. 249
- References p. 253
- 9 EV infrastructure p. 254

- 9.1 Domestic charging infrastructure p. 255
- 9.2 Public charging infrastructure p. 256
 - 9.2.1 Normal charging stations p. 256
 - 9.2.2 Occasional charging stations p. 257
 - 9.2.3 Fast charging stations p. 257
 - 9.2.4 Battery swapping stations p. 258
 - 9.2.5 Move-and-charge zones p. 259
 - 9.2.6 Payment systems p. 260
- 9.3 Standardization and regulations p. 260
 - 9.3.1 Standards p. 261
 - 9.3.2 Regulations p. 264
- 9.4 Training and promotion p. 265
 - 9.4.1 Training p. 265
 - 9.4.2 Promotion p. 267
- 9.5 Impacts on power system p. 268
 - 9.5.1 Harmonic impact p. 268
 - 9.5.2 Harmonic compensation p. 269
 - 9.5.3 Current demand impact p. 272
 - 9.5.4 Current demand minimization p. 272
- References p. 276
- 10 Energy, environment and economy p. 278
 - 10.1 Energy p. 278
 - 10.1.1 Energy diversification p. 279
 - 10.1.2 Energy efficiency p. 283
 - 10.2 Environment p. 284
 - 10.2.1 Transportation pollution p. 284
 - 10.2.2 Environment-sound EVs p. 286
 - 10.3 Economy p. 291
 - References p. 295
 - Index p. 297
