

# Table of contents

- **Part 1 Introduction to the Chemical Reactions of the Cell**
- **1 Chemistry, energy, and metabolism**
- **2 Enzymes**
- **Part 2 Structure of Proteins and Membranes**
- **3 The structure of proteins**
- **4 The cell membrane**
- **Part 3 Metabolism**
- **5 Digestion and absorption of food**
- **6 Preliminary outline of fuel distribution and utilization by the different tissues of the body**
- **7 Biochemical mechanisms involved in food transport, storage, and mobilization**
- **8 Energy release from foodstuffs - a preliminary overview**
- **9 Glycolysis, the citric acid cycle, and the electron transport system: reactions involved in these pathways**
- **10 Energy release from fat**
- **11 A switch from catabolic to anabolic metabolism - first the synthesis of fat and related compounds in the body**
- **12 Synthesis of glucose in the body (gluconeogenesis)**
- **13 Strategies for metabolic control and their application to carbohydrate and fat metabolism**
- **14 Why should there be an alternative pathway of glucose oxidation? - the pentose phosphate pathway**
- **15 Raising electrons of water back up the energy scale - photosynthesis**
- **16 Amino acid metabolism**
- **17 Cellular disposal of unwanted molecules**
- **18 Enzymic protective mechanisms in the body**
- **19 Nucleotide metabolism**
- **Part 4 Information Storage and Utilization**
- **20 DNA - its structure and arrangement in cells**
- **21 DNA synthesis and repair**
- **22 Gene transcription - the first step in the mechanism by which genes direct protein synthesis**
- **23 Eukaryotic gene transcription and control**
- **24 Gene cloning, reProtein synthesis, intracellular transport, and degradation**
- **25 How are newly synthesised proteins delivered to their correct destinations - protein targeting**
- **26 Cell signalling**
- **27 The immune system**
- **28 Viruses and viroids**
- **29 Gene cloning, recombinant DNA technology, genetic engineering**
- **30 Molecular biology of cancer**
- **Part 5 Transport of Oxygen and Co<sub>2</sub>**
- **31 The red blood cell and role of hemoglobin**
- **Part 6 Mechanical Work by Cells**

- **32 Muscle contraction**
- **33 The cytoskeleton, molecular motors and intracellular transport answers to problems**
