

- Preface
- Unit I Ordinary Differential Equations - Part 1
- 1 First-Order Differential Equations
 - Introduction
 - Terminology
 - The Direction Field
 - Picard Iteration
 - Existence and Uniqueness for the Initial Value Problem
- 2 Models Containing ODEs
 - Exponential Growth and Decay
 - Logistic Models
 - Mixing Tank Problems-Constant and Variable Volumes
 - Newton's Law of Cooling
- 3 Methods for Solving First-Order ODEs
 - Separation of Variables
 - Equations with Homogeneous Coefficients
 - Exact Equations
 - Integrating Factors and the First-Order Equations
 - Variation of Parameters and the First-Order Linear Equation
 - The Bernoulli Equation
- 4 Numeric Methods for Solving First-Order ODEs
 - Fixed-Step Methods-Order and Error
 - The Euler Method
 - Taylor Series Methods
 - Runge-Kutta Methods
 - Adams-Bashforth Multistep Methods
 - Adams-Moulton Predictor-Corrector Methods
 - Milne's Method
 - RKF45, the Runge-Kutta-Fehlberg Method
- 5 Second-Order Differential Equations
 - Springs `n' Things
 - The Initial Value Problem
 - Overview of the Solution Process
 - Linear Dependence and Independence
 - Free Undamped Motion
 - Free Damped Motion
 - Reduction of Order and Higher-Order Equations
 - The Bobbing Cylinder
 - Forced Motion and Variation Of Parameters
 - Forced Motion and Undetermined Coefficients
 - Resonance
 - The Euler Equation
 - The Green's Function Technique for IVPS
- 6 The Laplace Transform
 - Definition and Examples
 - Transform of Derivatives

- First Shifting Law
- Operational Laws
- Heaviside Functions and the Second Shifting Law
- Pulses, and the Third Shifting Law
- Transforms of Periodic Functions
- Convolution and the Convolution Theorem
- Convolution Products by the Convolution Theorem
- The Dirac Delta Function
- Transfer Function, Fundamental Solution, and The Green's Function
- Unit II Infinite Series
- 7 Sequences and Series of Numbers
 - Sequences
 - Infinite Series
 - Series with Positive Terms
 - Series with Both Negative and Positive Terms
- 8 Sequences and Series of Functions
 - Sequences of Functions
 - Pointwise Convergence
 - Uniform Convergence
 - Convergence in the Mean
 - Series of Functions
- 9 Power Series
 - Taylor Polynomials
 - Taylor Series
 - Termwise Operations on Taylor Series
- 10 Fourier Series
 - General Formalism
 - Termwise Integration and Differentiation
 - Odd and Even Functions and Their Fourier Series
 - Sine Series and Cosine Series
 - Periodically Driven Damped Oscillator
 - Optimizing Property of Fourier Series
 - Fourier-Legendre Series
- 11 Asymptotic Series
 - Computing with Divergent Series
 - Definitions
 - Operations with Asymptotic Series
- Unit III Ordinary Differential Equations - Part 2
- 12 Systems of First-Order ODEs
 - Mixing Tanks-Closed Systems
 - Mixing Tanks-Open Systems
 - Vector Structure of Solutions
 - Determinants and Cramer's Rule
 - Solving Linear Algebraic Equations
 - Homogeneous Equations and the Null Space
 - Inverses

- Vectors and the Laplace Transform
- The Matrix Exponential
- Eigenvalues and Eigenvectors
- Solution by Eigenvalues and Eigenvectors
- Finding Eigenvalues and Eigenvectors
- System Versus Second-Order ODE. Co
