- The World Commission p. xv
- Chapter I. The Millennial Change p. 1
 - The First Urban Century p. 3
 - A Networked Urban World p. 5
 - The Urban Challenge p. 8
 - Forecasts of Urban Lives: 1900, 2000, 2025... p. 9
 - The World of the Urban Poor p. 13
 - Urban Needs and Urban Expectations p. 16
 - Urban Essentials: Dimensions of the Sustainable City p. 16
 - A sustainable urban economy: work and wealth p. 18
 - A sustainable urban society: social coherence and social solidarity p. 23
 - Sustainable urban shelter: decent affordable housing for all p. 25
 - A sustainable urban environment: stable ecosystems p. 26
 - Sustainable urban access: resource-conserving mobility p. 28
 - Sustainable urban life: building the liveable city p. 31
 - Sustainable urban democracy: empowering the citizenry p. 33
 - Summing Up: Key Dilemmas and Opportunities p. 35
 - The Central Problem: Balance and Trade-off p. 37
 - The Rest of this Book: A Quick Guide p. 39
- Chapter II. Trends and Outcomes: The Urban World of 2025 p. 41
 - Introduction: The Basic Driving Forces p. 43
 - Demographic Change p. 45
 - Demography and the urban explosion p. 45
 - The city of hypergrowth p. 47
 - Cities in demographic transition p. 48
 - Mature developed cities--ageing and implosion p. 49
 - The Urban Economic Base p. 51
 - Cities: engines of economic growth p. 51
 - Markets and the process of accumulation p. 52
 - The long march through the sectors: growth and structural change p. 55
 - Information, services and cities p. 60
 - Competition and non-competition among cities p. 62
 - Urban business cycles: boom and bust p. 62
 - Urban contrasts: winners and losers p. 63
 - Twin problems of a restructuring world: 'underuse' of people, 'overuse' of resources p. 65
 - The informal sector p. 68
 - Economic chances--economic risks p. 80
 - Social Change and Urban Development p. 80
 - The engines of social change p. 80
 - Economic change and social evolution p. 82
 - Environment p. 103
 - Nature as resource, space and environment p. 103

- Challenges to the urban environment p. 106
- An unsustainable present p. 110
- Environment and urban development p. 111
- Urban Growth and Change p. 113
- Cities in competition p. 113
- Global winners and losers p. 116
- Lessons from the developed world: urbanization, deurbanization and reurbanization p. 116
- Contrasted outcomes in the developing world: mega-cities and informalized urbanization p. 124
- The smaller cities: a neglected problem p. 130
- Urban form and urban transport p. 130
- Micro-patterns of urban growth: the problem of mega-scale development p. 132
- Conclusion: Markets and Planning p. 133
- Common Problems: Different Strategies p. 135
- Chapter III. Two Scenarios: The Urban World of 2025 p. 141
- The City Coping with Informal Hypergrowth p. 143
- The City Coping with Dynamism p. 148
- The Weakening Mature City, Coping with Ageing p. 153
- Chapter IV. Rising to the Urban Challenge: Governance and Policy p. 161
- Guiding Principles for Urban Governance p. 163
- Fundamental goals and requirements p. 163
- Sustainability: from concept to implementation p. 163
- Rules for good governance p. 165
- Good Governance in Practice p. 170
- The central concept: governance equals cooperation p. 170
- Governance in search of better results p. 171
- The Environment p. 201
- Meeting basic needs in the ecopolis p. 201
- Environmental efficiency p. 203
- Overcoming difficulties on the path to ecological efficiency p. 206
- Ecological incentive systems p. 208
- Environmental education and soft regulation p. 209
- Ecological urban management p. 211
- Economic Policy p. 213
- The relevance of local economic policy p. 213
- Urban economic policy for greater employment and equality p. 215
- Managing Social Change p. 227
- Fundamental social changes and types of city p. 227
- Managing the reduction of poverty p. 230
- Housing Policy p. 238
- Providing decent housing: an enabling strategy p. 238
- Types of intervention p. 239
- Housing finance p. 243
- Private rental housing--key sector of global urban housing markets p. 245

- Specific tasks for hypergrowth cities p. 246
- Finance: enabling the transition from informality to formality p. 250
- Conclusions p. 251
- Infrastructure p. 252
- The importance of physical infrastructure p. 252
- Financing infrastructure: general principles p. 255
- Private provision p. 255
- Informal provision of infrastructure and self-help solutions p. 258
- Conclusion p. 260
- Transportation p. 261
- Main policy solutions p. 263
- Bundling the solutions p. 274
- Alternative strategies: 'radical' and 'pragmatic' p. 279
- The social implications of policies p. 284
- The benefits of change p. 285
- Complementary paths p. 286
- Shaping Urban Space p. 287
- Managing urban space: the ultimate scarce resource p. 287
- Guiding physical development p. 288
- Universal principles, local variants p. 303
- Chapter V. Good Governance in Practice: An Action Plan p. 311
- The Basic Principles: Strong Urban Government for Sustainable Urban Development p. 313
- Local government matters: local tasks, local management p. 313
- Adequate distribution of responsibilities, adequate and fair distribution of revenues p. 314
- The Environment p. 316
- The city of hypergrowth: health and lower pollution p. 318
- The city of dynamism: higher standards p. 319
- The mature city: recycling and renewable energies p. 319
- The Competitive City: Promoting a Healthy Local Economy p. 319
