

- Foreword
- Preface
- About the Editors
- List of Contributors
- Part 1 Introduction: Fundamentals of Soft Computing
- 1 Soft computing for intelligent reservoir characterization and modeling M. Nikravesh and F. Aminzadeh
- 2 Fuzzy logic G.J.Klir
- 3 Introduction to using genetic algorithms J.N. Carter
- 4 Heuristic approaches to combinatorial optimization V.M. Johnson
- 5 Introduction to geostatistics R.J. Pawar
- 6 Geostatistics: From pattern recognition to pattern reproduction J. Caers
- Part 2 Geophysical Analysis and Interpretation
- 7 Mining and fusion of petroleum data with fuzzy logic and neural network agents M. Nikravesh and F.Aminzadeh
- 8 Time lapse seismic as a complementary tool for in-fill drilling M. Landro and L.K. Stroschl;nen, et al.
- 9 Improving seismic chimney detection using directional attributes K.M. Tingdahl
- 10 Modeling a fluvial reservoir with multipoint statistics and principal components P.M.Wong and S.A.R. Shibli
- Part 3 Computational Geology
- 11 The role of fuzzy logic in sedimentology and stratigraphic models R.V. Demicco and G.J.Klir and R. Belohlavek
- 12 Spatial contiguity analysis. A method for describing spatial structures of seismic data A. Faraj and F. Cailly
- 13 Litho-seismic data handling for hydrocarbon reservoir estimate: Fuzzy system modeling approach E.A. Shyllon
- 14 Neural vector quantization for geobody detection and static multivariate upscaling A. Chawatheacute; and M. Ye
- 15 High resolution reservoir heterogeneity characterization using recognition technology M. Hassibi and I. Ershaghi and F. Aminzadeh
- 16 Extending the use of linguistic petrographical descriptions to characterise core porosity T.D. Gedeon and P.M. Wong et al.
- Part 4 Reservoir and Production Engineering
- 17 Using genetic algorithms for reservoir characterisation C. Romero and J.N. Carter
- 18 Applying soft computing methods to improve the computational tractability of a subsurface simulation-optimization problem V.M. Johnson and L.L. Rogers
- 19 Neural network prediction of permeability in the El Garia formation, Ashtart oilfield, offshore Tunisia J.H. Ligtenberg and A.G. Wansink
- 20 Using RBF network to model the reservoir fluid behavior of black oil systems A.M. Elsharkawy
- 21 Enhancing gas storage wells deliverability using intelligent systems S.D. Mohaghegh
- Part 5 Integrated field studies
- 22 Soft computing: Tools for intelligent reservoir characterization and optimum well placement M. Nikravesh and R.D. Adams and R.A. Levey

- 23 Combining geological information with seismic and production data J. Caers and S. Srinivasan
- 24 Interpreting biostratigraphical data using fuzzy logic: The identification of regional mudstones within the Fleming field, UK North Sea M.I. Wakefield and R.J. Cook et al
- 25 Geostatistical characterization of the Carpinteria field, California R.J. Pawar and E.B. Edwards and E.M. Whitney
- 26 Integrated fractured reservoir characterization using neural networks and fuzzy logic: Three case studies A.M. Zellou and A. Quenes
- Part 6 General Applications
- 27 Virtual magnetic resonance logs, a low cost reservoir description tool S.D. Mohaghegh
- 28 Artificial neural networks linked to GIS Y. Yang and M.S. Rosenbaum
- 29 Intelligent computing techniques for complex systems M. Nikraves
- 30 Multivariate statistical techniques including PCA and rule based systems for well log correlation J.-S Lim
