

- Preface p. xv
- Foreword p. xvii
- 1 An Introduction to Web Engineering Gerti Kappel and Birgit Proll and Siegfried Reich and Werner Retschitzegger p. 1
 - 1.1 Motivation p. 1
 - 1.2 Categories of Web Applications p. 4
 - 1.3 Characteristics of Web Applications p. 7
 - 1.3.1 Product-related Characteristics p. 8
 - 1.3.2 Usage-related Characteristics p. 12
 - 1.3.3 Development-related Characteristics p. 14
 - 1.3.4 Evolution p. 16
 - 1.4 Objectives and Structure of the Book p. 17
- 2 Requirements Engineering for Web Applications Paul Grunbacher p. 23
 - 2.1 Introduction p. 23
 - 2.2 Fundamentals p. 24
 - 2.2.1 Where Do Requirements Come From? p. 24
 - 2.2.2 Requirements Engineering Activities p. 25
 - 2.3 RE Specifics in Web Engineering p. 26
 - 2.4 Principles for RE of Web Applications p. 30
 - 2.5 Adapting RE Methods to Web Application Development p. 32
 - 2.5.1 Requirement Types p. 32
 - 2.5.2 Notations p. 34
 - 2.5.3 Tools p. 36
 - 2.6 Outlook p. 37
- 3 Modeling Web Applications Wieland Schwinger and Nora Koch p. 39
 - 3.1 Introduction p. 39
 - 3.2 Fundamentals p. 40
 - 3.3 Modeling Specifics in Web Engineering p. 41
 - 3.3.1 Levels p. 41
 - 3.3.2 Aspects p. 42
 - 3.3.3 Phases p. 42
 - 3.3.4 Customization p. 43
 - 3.4 Modeling Requirements p. 43
 - 3.5 Content Modeling p. 45
 - 3.5.1 Objectives p. 45
 - 3.5.2 Concepts p. 45
 - 3.6 Hypertext Modeling p. 46
 - 3.6.1 Objectives p. 47
 - 3.6.2 Hypertext Structure Modeling Concepts p. 47
 - 3.6.3 Access Modeling Concepts p. 49
 - 3.6.4 Relation to Content Modeling p. 50
 - 3.7 Presentation Modeling p. 51
 - 3.7.1 Objectives p. 51
 - 3.7.2 Concepts p. 51

- 3.7.3 Relation to Hypertext Modeling p. 52
- 3.8 Customization Modeling p. 53
- 3.8.1 Objectives p. 54
- 3.8.2 Concepts p. 54
- 3.8.3 Relation to Content, Hypertext, and Presentation Modeling p. 58
- 3.9 Methods and Tools p. 58
- 3.9.1 Modeling Methods: An Overview p. 58
- 3.9.2 Model-Driven Development p. 61
- 3.9.3 Tool Support p. 61
- 3.10 Outlook p. 63
- 4 Web Application Architectures Christian Eichinger p. 65
- 4.1 Introduction p. 65
- 4.2 Fundamentals p. 66
- 4.2.1 What is an Architecture? p. 66
- 4.2.2 Developing Architectures p. 67
- 4.2.3 Categorizing Architectures p. 69
- 4.3 Specifics of Web Application Architectures p. 70
- 4.4 Components of a Generic Web Application Architecture p. 71
- 4.5 Layered Architectures p. 72
- 4.5.1 2-Layer Architectures p. 72
- 4.5.2 N-Layer Architectures p. 73
- 4.6 Data-aspect Architectures p. 79
- 4.6.1 Database-centric Architectures p. 80
- 4.6.2 Architectures for Web Document Management p. 80
- 4.6.3 Architectures for Multimedia Data p. 81
- 4.7 Outlook p. 84
- 5 Technology-aware Web Application Design Gerhard Austaller and Andreas Hartl and Markus Lauff and Fernando Lyardet and Max Muhlhauser p. 85
- 5.1 Introduction p. 86
- 5.2 Web Design from an Evolutionary Perspective p. 89
- 5.2.1 Background p. 89
- 5.2.2 Information Design: An Authoring Activity p. 90
- 5.2.3 Software Design: A Programming Activity p. 92
- 5.2.4 Merging Information Design and Software Design p. 93
- 5.2.5 Problems and Restrictions in Integrated Web Design p. 94
- 5.2.6 A Proposed Structural Approach p. 95
- 5.3 Presentation Design p. 95
- 5.3.1 Presentation of Nodes and Meshes p. 96
- 5.3.2 Device-independent Development Approaches p. 97
- 5.4 Interaction Design p. 98
- 5.4.1 User Interaction p. 98
- 5.4.2 User Interface Organization p. 100
- 5.4.3 Navigation Design p. 101
- 5.4.4 Designing a Link Representation: The Anchor p. 101

- 5.4.5 Designing Link Internals: The URL p. 102
- 5.4.6 Navigation and Orientation p. 102
- 5.4.7 Structured Dialog for Complex Activities p. 103
- 5.4.8 Interplay with Technology and Architecture p. 104
- 5.5 Functional Design p. 105
- 5.5.1 Integration p. 105
- 5.5.2 Communication Paradigms and Middleware p. 105
- 5.5.3 Distributed Cross-corporate Web Applications p. 106
- 5.6 Outlook p. 107
- 5.6.1 Context-aware Applications p. 107
- 5.6.2 Device-independent Applications p. 108
- 5.6.3 Reusability p. 109
- 5.7 Summary p. 110
- 6 Technologies for Web Applications Martin Nussbaumer and Martin Gaedke p. 111
- 6.1 Introduction p. 111
- 6.2 Fundamentals p. 112
- 6.2.1 Markup p. 112
- 6.2.2 Hypertext and Hypermedia p. 112
- 6.3 Client/Server Communication on the Web p. 113
- 6.3.1 SMTP - Simple Mail Transfer Protocol p. 113
- 6.3.2 RTSP - Real Time Streaming Protocol p. 113
- 6.3.3 HTTP - HyperText Transfer Protocol p. 113
- 6.3.4 Session Tracking p. 114
- 6.4 Client-side Technologies p. 116
- 6.4.1 Helpers and Plug-ins p. 116
- 6.4.2 Java Applets p. 116
- 6.4.3 ActiveX Controls p. 116
- 6.5 Document-specific Technologies p. 117
- 6.5.1 HTML - Hypertext Markup Language p. 117
- 6.5.2 SVG - Scalable Vector Graphics p. 117
- 6.5.3 SMIL - Synchronized Multimedia Integration Language p. 118
- 6.5.4 XML - eXtensible Markup Language p. 118
- 6.5.5 XSL - eXtensible Stylesheet Language p. 122
- 6.6 Server-side Technologies p. 126
- 6.6.1 URI Handlers p. 126
- 6.6.2 Web Services p. 129
- 6.6.3 Middleware Technologies p. 130
- 6.7 Outlook p. 132
- 7 Testing Web Applications Christoph Steindl and Rudolf Ramler and Josef Altmann p. 133
- 7.1 Introduction p. 133
- 7.2 Fundamentals p. 134
- 7.2.1 Terminology p. 134
- 7.2.2 Quality Characteristics p. 135
- 7.2.3 Test Objectives p. 136

- 7.2.4 Test Levels p. 136
- 7.2.5 Role of the Tester p. 137
- 7.3 Test Specifics in Web Engineering p. 138
- 7.4 Test Approaches p. 140
- 7.4.1 Conventional Approaches p. 140
- 7.4.2 Agile Approaches p. 140
- 7.5 Test Scheme p. 142
- 7.5.1 Three Test Dimensions p. 142
- 7.5.2 Applying the Scheme to Web Applications p. 143
- 7.5.3 Examples of Using the Test Scheme p. 145
- 7.6 Test Methods and Techniques p. 145
- 7.6.1 Link Testing p. 147
- 7.6.2 Browser Testing p. 147
- 7.6.3 Usability Testing p. 148
- 7.6.4 Load, Stress, and Continuous Testing p. 148
- 7.6.5 Testing Security p. 149
- 7.6.6 Test-driven Development p. 150
- 7.7 Test Automation p. 150
- 7.7.1 Benefits and Drawbacks of Automated Tests p. 150
- 7.7.2 Test Tools p. 151
- 7.7.3 Selecting Test Tools p. 152
- 7.8 Outlook p. 152
- 8 Operation and Maintenance of Web Applications Arno Ebner and Birgit Proll and Hannes Werthner p. 155
- 8.1 Introduction p. 155
- 8.2 Challenges Following the Launch of a Web Application p. 156
- 8.3 Promoting a Web Application p. 157
- 8.3.1 Newsletters p. 158
- 8.3.2 Affiliate Marketing p. 158
- 8.3.3 Search Engine Marketing p. 159
- 8.3.4 Content-related Marketing p. 162
- 8.3.5 Domain Management p. 162
- 8.4 Content Management p. 163
- 8.4.1 Content Update Rate and Demand on Currency p. 164
- 8.4.2 Content Syndication p. 165
- 8.5 Usage Analysis p. 165
- 8.5.1 Usage Analysis Techniques p. 165
- 8.5.2 Statistical Indicators p. 167
- 8.5.3 User Behavior Analysis p. 168
- 8.6 Outlook p. 169
- 9 Web Project Management Herwig Mayr p. 171
- 9.1 From Software Project Management to Web Project Management p. 171
- 9.1.1 Objectives of Software Project Management p. 171
- 9.1.2 The Tasks of Software Project Management p. 172

- 9.1.3 Conflicting Areas in Projects p. 173
- 9.1.4 Specifics of Web Project Management p. 173
- 9.2 Challenges in Web Project Management p. 175
- 9.2.1 General Challenges in Software Development p. 175
- 9.2.2 Development-related Challenges in Web Projects p. 176
- 9.2.3 Product-related Challenges in Web Projects p. 179
- 9.3 Managing Web Teams p. 182
- 9.3.1 Software Development: A Human-centered Task p. 182
- 9.3.2 The Web Project Team p. 183
- 9.3.3 The Web Project Manager p. 184
- 9.4 Managing the Development Process of a Web Application p. 185
- 9.4.1 Deploying the Tools p. 185
- 9.4.2 Measuring Progress p. 188
- 9.4.3 Project Risks p. 190
- 9.4.4 Risk Management p. 193
- 9.5 Outlook p. 194
- 10 The Web Application Development Process Gregor Engels and Marc Lohmann and Annika Wagner p. 197
- 10.1 Motivation p. 197
- 10.2 Fundamentals p. 198
- 10.3 Requirements for a Web Application Development Process p. 201
- 10.3.1 Handling Short Development Cycles p. 201
- 10.3.2 Handling Changing Requirements p. 201
- 10.3.3 Releases with Fixed Deadlines and Flexible Contents p. 203
- 10.3.4 Parallel Development of Different Releases p. 203
- 10.3.5 Reuse and Integration p. 204
- 10.3.6 Adapting to Web Application's Complexity Level p. 204
- 10.3.7 Summary p. 205
- 10.4 Analysis of the Rational Unified Process p. 205
- 10.4.1 Introduction p. 205
- 10.4.2 General Suitability for Web Application Development p. 208
- 10.4.3 Does RUP meet the Requirements of Web Applications? p. 209
- 10.5 Analysis of Extreme Programming p. 211
- 10.5.1 Introduction p. 211
- 10.5.2 Does XP meet the Requirements of Web Application Development? p. 214
- 10.6 Outlook p. 216
- 11 Usability of Web Applications Martin Hitz and Gerhard Leitner and Rudolf Melcher p. 219
- 11.1 Motivation p. 219
- 11.2 What is Usability? p. 220
- 11.3 What Characterizes the Usability of Web Applications? p. 222
- 11.4 Design Guidelines p. 225
- 11.4.1 Response Times p. 225
- 11.4.2 Interaction Efficiency p. 225
- 11.4.3 Colors p. 226

- 11.4.4 Text Layout p. 227
- 11.4.5 Page Structure p. 228
- 11.4.6 Navigation Structure p. 228
- 11.4.7 Multiculturalism p. 230
- 11.4.8 Confidence-generating Measures p. 231
- 11.4.9 Other Design Criteria p. 232
- 11.5 Web Usability Engineering Methods p. 232
- 11.5.1 Requirements Analysis p. 234
- 11.5.2 Design p. 237
- 11.5.3 Implementation p. 238
- 11.5.4 Operation p. 238
- 11.6 Web Usability Engineering Trends p. 239
- 11.6.1 Usability Patterns p. 239
- 11.6.2 Mobile Usability p. 241
- 11.6.3 Accessibility p. 243
- 11.7 Outlook p. 245
- 12 Performance of Web Applications Gabriele Kotsis p. 247
- 12.1 Introduction p. 247
- 12.2 What Is Performance? p. 248
- 12.3 What Characterizes the Performance of Web Applications? p. 250
- 12.4 System Definition and Indicators p. 251
- 12.5 Characterizing the Workload p. 252
- 12.6 Analytical Techniques p. 254
- 12.6.1 Operational Analysis p. 254
- 12.6.2 Queuing Networks and Simulation Models p. 255
- 12.6.3 Measuring Approaches p. 257
- 12.7 Representing and Interpreting Results p. 258
- 12.8 Performance Optimization Methods p. 259
- 12.8.1 Acceleration Within a Web Application p. 260
- 12.8.2 Reducing Transmission Time p. 261
- 12.8.3 Server Tuning p. 263
- 12.9 Outlook p. 263
- 13 Security for Web Applications Martin Wimmer and Alfons Kemper and Stefan Seltz p. 265
- 13.1 Introduction p. 265
- 13.2 Aspects of Security p. 266
- 13.3 Encryption, Digital Signatures and Certificates p. 268
- 13.3.1 Symmetric Cryptography p. 268
- 13.3.2 Asymmetric Cryptography p. 270
- 13.3.3 Digital Signatures p. 271
- 13.3.4 Certificates and Public Key Infrastructure p. 272
- 13.4 Secure Client/Server-Interaction p. 272
- 13.4.1 Point-to-Point Security p. 272
- 13.4.2 End-to-End Security p. 274

- 13.4.3 User Authentication and Authorization p. 276
- 13.4.4 Electronic Payment Systems p. 278
- 13.5 Client Security Issues p. 279
- 13.5.1 Preserving Privacy p. 279
- 13.5.2 Mobile Code Security p. 281
- 13.5.3 Phishing and Web Spoofing p. 282
- 13.5.4 Desktop Security p. 283
- 13.6 Service Provider Security Issues p. 285
- 13.6.1 Cross-Site Scripting p. 285
- 13.6.2 SQL Injection p. 287
- 13.6.3 Security of CGI Programs p. 289
- 13.6.4 Service Availability p. 290
- 13.6.5 Host Security p. 291
- 13.7 Outlook p. 292
- 14 The Semantic Web - The Network of Meanings in the Network of Documents Wernher Behrendt and Nitin Arora p. 293
- 14.1 Fundamentals of the Semantic Web p. 293
- 14.1.1 The Role of Software Agents p. 294
- 14.1.2 The Role of Semantic Markup p. 296
- 14.1.3 The Role of Ontologies p. 297
- 14.2 Technological Concepts p. 298
- 14.2.1 Agents According to the FIPA Standard p. 298
- 14.2.2 Ontologies p. 300
- 14.2.3 Semantic Markup on the Web p. 303
- 14.3 Specifics of Semantic Web Applications p. 308
- 14.3.1 Semantic Markup p. 308
- 14.3.2 Agents p. 309
- 14.3.3 Ontologies p. 309
- 14.3.4 Semantic Web Services p. 310
- 14.3.5 Integration into Web Engineering p. 313
- 14.4 Tools p. 314
- 14.5 Outlook p. 315
- Glossary p. 317
- Author Biographies p. 329
- Bibliography p. 337
- Credits p. 357
- Index p. 359
