

- **Contributors** (p. ix)
- **Preface** (p. xi)
- **1 Introduction** (p. 1)
- **1.1 Definition of Biomechanics** (p. 2)
- **1.2 Selected Historical Highlights** (p. 3)
 - **1.2.1 The Scientific Legacy of Antiquity** (p. 3)
 - **1.2.2 The Middle Ages** (p. 9)
 - **1.2.3 The Italian Renaissance** (p. 9)
 - **1.2.4 The Scientific Revolution** (p. 14)
 - **1.2.5 The Enlightenment** (p. 22)
 - **1.2.6 The Gait Century** (p. 25)
 - **1.2.7 The Twentieth Century** (p. 30)
 - **1.2.8 Final Comments** (p. 33)
- **1.3 Mechanics** (p. 36)
 - **1.3.1 Definitions and Comments** (p. 36)
 - **1.3.2 Selected Historical Highlights** (p. 37)
 - **1.3.3 Newton's Laws of Motion** (p. 37)
- **2 Biological Materials** (p. 49)
 - **1.3.4 Equations of Motion for a Rigid Body** (p. 39)
 - **1.3.5 General Comments** (p. 45)
- **1.4 References** (p. 46)
- **2.1 Definitions and Comments** (p. 50)
 - **2.1.1 Anatomy** (p. 50)
 - **2.1.2 Mechanics** (p. 55)
- **2.2 Selected Historical Highlights** (p. 58)
 - **2.2.1 Bone** (p. 58)
 - **2.2.2 Articular Cartilage** (p. 60)
 - **2.2.3 Ligament** (p. 61)
 - **2.2.4 Tendon** (p. 62)
 - **2.2.5 Muscle** (p. 63)
- **2.3 Bone** (p. 65)
 - **2.3.1 Morphology and Histology** (p. 65)
 - **2.3.2 Physical Properties** (p. 73)
 - **2.3.3 Bone Mechanics as Related to Function** (p. 80)
 - **2.3.4 Failure of Bone** (p. 91)
- **2.4 Articular Cartilage** (p. 95)
 - **2.4.1 Introduction** (p. 95)
 - **2.4.2 Structure** (p. 95)
 - **2.4.3 Composition** (p. 97)
 - **2.4.4 Mechanical Properties** (p. 102)
 - **2.4.5 Biomechanics** (p. 104)
 - **2.4.6 Osteoarthritis** (p. 107)
 - **2.4.7 Theoretical and Numerical Models** (p. 109)
- **2.5 Ligament** (p. 123)
 - **2.5.1 Morphology and Histology** (p. 123)
 - **2.5.2 Function** (p. 29)

- **2.5.3 Physical Properties and Mechanics** (p. 135)
- **2.5.4 Biology and Function** (p. 142)
- **2.5.5 Failure and Healing** (p. 144)
- **2.6 Tendon/Aponeurosis** (p. 146)
- **2.6.1 Morphology and Histology** (p. 146)
- **2.6.2 Physical Properties** (p. 151)
- **2.6.3 Physiological Properties and Adaptive Function** (p. 158)
- **2.6.4 Tendon-Muscle-Aponeurosis Interactions** (p. 162)
- **2.7 Muscle** (p. 169)
- **2.7.1 Introduction** (p. 169)
- **2.7.2 Morphology** (p. 169)
- **2.7.3 Muscular Contraction** (p. 177)
- **2.7.4 The Cross-Bridge Theory** (p. 182)
- **2.7.5 Physical Properties** (p. 197)
- **2.7.6 Applications** (p. 217)
- **2.8 Adaptation of Biological Materials to Exercise, Disuse, and Aging** (p. 226)
- **2.8.1 Introduction** (p. 226)
- **2.8.2 Bone** (p. 226)
- **2.8.3 Articular Cartilage** (p. 235)
- **2.8.4 Ligament** (p. 237)
- **2.8.5 Tendon** (p. 239)
- **2.8.6 Skeletal Muscle** (p. 240)
- **2.9 Joints** (p. 244)
- **2.9.1 Classification of Joints** (p. 244)
- **2.9.2 Function** (p. 245)
- **2.9.3 Degrees of Freedom of Joints** (p. 245)
- **2.9.4 The Human Ankle Joint Complex** (p. 247)
- **2.9.5 Joint Adaptation** (p. 252)
- **2.10 Additional Examples** (p. 260)
- **2.11 References** (p. 266)
- **3 Measuring Techniques** (p. 293)
- **3.1 Definitions and Comments** (p. 294)
- **3.2 Selected Historical Highlights** (p. 304)
- **3.3 Force** (p. 311)
- **3.3.1 Measuring Possibilities** (p. 311)
- **3.3.2 Applications** (p. 320)
- **3.4 Pressure Distribution** (p. 334)
- **3.4.1 Measuring Possibilities** (p. 334)
- **3.4.2 Applications** (p. 339)
- **3.5 Acceleration** (p. 343)
- **3.5.1 Measuring Possibilities** (p. 343)
- **3.5.2 Applications** (p. 354)
- **3.6 Optical Methods** (p. 362)
- **3.6.1 Cameras and Markers** (p. 362)
- **3.6.2 Determining Marker Positions** (p. 366)
- **3.6.3 Determining Rigid Body Kinematics** (p. 373)

- **3.7 Strain Measurement** (p. 392)
- **3.8.1 Introduction** (p. 409)
- **3.7.1 Measuring Possibilities** (p. 392)
- **3.7.2 Applications** (p. 406)
- **3.8 EMG** (p. 409)
- **3.8.2 EMG Signal** (p. 409)
- **3.8.3 EMG Signal Recording** (p. 415)
- **3.8.4 EMG Signal Processing** (p. 418)
- **3.8.5 EMG-Force Relation** (p. 430)
- **3.8.6 Examples of Wavelet EMG Analysis** (p. 448)
- **3.9 Inertial Properties of the Human or Animal Body** (p. 453)
- **3.9.1 Inertial Properties** (p. 453)
- **3.10 Additional Examples** (p. 476)
- **3.11 References** (p. 484)
- **4 Modelling** (p. 501)
- **4.1 Definitions and Comments** (p. 502)
- **4.2 Selected Historical Highlights** (p. 508)
- **4.3 A Nearly Possible Story** (p. 512)
- **4.4 General Comments About Modelling** (p. 513)
- **4.4.1 General Considerations** (p. 513)
- **4.4.2 Information Used to Construct a Model** (p. 513)
- **4.4.3 Simplification** (p. 514)
- **4.4.4 The Purpose of a Model** (p. 515)
- **4.4.5 The Validation of a Model** (p. 516)
- **4.4.6 Types of Models** (p. 518)
- **4.4.7 Descriptive, Experimental, and/or Analytical Research and Modelling** (p. 519)
- **4.4.8 General Procedures in Modelling** (p. 521)
- **4.5.3 Assumptions** (p. 524)
- **4.5 Force System Analysis** (p. 523)
- **4.5.1 Introduction** (p. 523)
- **4.5.2 The Mechanical System of Interest** (p. 523)
- **4.5.4 Free Body Diagram** (p. 525)
- **4.5.5 Equations of Motion** (p. 531)
- **4.5.6 Mathematical Solution** (p. 534)
- **4.6 Mathematically Determinate Systems** (p. 535)
- **4.6.1 Introduction** (p. 535)
- **4.6.2 Mechanical Models Using Particles** (p. 536)
- **4.6.3 Mechanical Models Using Rigid Bodies** (p. 574)
- **4.6.4 Comments for Section 4.6** (p. 608)
- **4.7 Mathematically Indeterminate Systems** (p. 609)
- **4.7.1 Introduction** (p. 609)
- **4.7.2 Basic Concepts** (p. 610)
- **4.7.3 Joint Equipollence Equations** (p. 611)
- **4.7.4 Solving Mathematically Underdetermined Systems Using Optimization Theory** (p. 612)
- **4.8 Simulation** (p. 622)

- **4.8.1 Introduction** (p. 622)
- **4.8.2 Differential Equations** (p. 623)
- **4.8.3 Numerical Solution Methods** (p. 624)
- **4.8.4 Equations of Motion for Mechanical Systems** (p. 628)
- **4.8.5 Muscle Models** (p. 631)
- **4.8.6 Simulation Using Musculo-Skeletal Models** (p. 634)
- **4.8.7 Modelling of External Forces** (p. 637)
- **4.8.8 Optimization Studies** (p. 639)
- **4.8.9 Simulation as a Scientific Tool** (p. 643)
- **4.8.10 Applications** (p. 644)
- **4.9 Additional Examples** (p. 645)
- **4.10 References** (p. 658)
- **Index** (p. 663)
