

- **Preface** (p. xvii)
- **List of Contributors** (p. xix)
- **1 On Offline Arabic Character Recognition** (p. 1)
- **1 Introduction** (p. 1)
- **2 Structure of the Proposed OCR System** (p. 4)
- **3 Preprocessing** (p. 6)
- **4 Segmentation** (p. 7)
- **4.1 Line Segmentation and Zoning** (p. 8)
- **4.2 Word Segmentation** (p. 8)
- **4.3 Segmentation of Words into Individual Characters** (p. 9)
- **5 Feature Extraction** (p. 10)
- **6 Recognition Strategy** (p. 11)
- **6.1 Recognition Using the Syntactic Approach** (p. 12)
- **6.2 Recognition Using the Neural Network Approach** (p. 13)
- **7 Experimental Results and Analysis** (p. 15)
- **7.1 System Training** (p. 15)
- **7.2 Experimental Set-up** (p. 15)
- **7.3 Results Achieved** (p. 15)
- **8 Conclusion** (p. 17)
- **Acknowledgement** (p. 17)
- **References** (p. 17)
- **2 License Plate Recognition System: Saudi Arabian Case** (p. 19)
- **1 Introduction** (p. 19)
- **2 Structure of a Typical LPR System** (p. 20)
- **3 Image Acquisition** (p. 21)
- **4 License Plate Extraction** (p. 21)
- **4.1 Vertical Edge Detection** (p. 23)
- **4.2 Filtering** (p. 23)
- **4.3 Vertical Edge Matching** (p. 24)
- **4.4 Black to White Ratio and Plate Extraction** (p. 26)
- **5 License Plate Segmentation** (p. 26)
- **6 Character Recognition** (p. 26)
- **6.1 Normalization** (p. 26)
- **6.2 Template Matching** (p. 27)
- **7 Experimental Analysis and Results** (p. 27)
- **8 Conclusion** (p. 32)
- **References** (p. 32)
- **3 Algorithms for Extracting Textual Characters in Color Video** (p. 33)
- **1 Introduction** (p. 33)
- **2 Prior and Related Work** (p. 34)
- **3 Our New Text Extraction Algorithm** (p. 35)
- **3.1 Step 1: Identify Potential Text Line Segments** (p. 36)
- **3.2 Step 2: Text Block Detection** (p. 38)
- **3.3 Step 3: Text Block Filtering** (p. 38)
- **3.4 Step 4: Boundary Adjustments** (p. 38)
- **3.5 Step 5: Bicolor Clustering** (p. 38)

- **3.6 Step 6: Artifact Filtering** (p. 39)
- **3.7 Step 7: Contour Smoothing** (p. 39)
- **4 Experimental Results and Performance** (p. 40)
- **5 Using Multiframe Edge Information to Improve Precision** (p. 47)
- **5.1 Step 3(b): Text Block Filtering Based on Multiframe Edge Strength** (p. 47)
- **6 Discussion and Concluding Remarks** (p. 47)
- **References** (p. 48)
- **4 Separation of Handwritten Touching Digits: A Multiagents Approach** (p. 51)
- **1 Introduction** (p. 51)
- **2 Previous Work** (p. 52)
- **3 Digitizing and Processing** (p. 56)
- **4 Segmentation Algorithm** (p. 56)
- **4.1 Extraction of Feature Points** (p. 56)
- **4.2 The Employed Agents** (p. 57)
- **5 Experimental Results** (p. 61)
- **6 Conclusions and Future Work** (p. 65)
- **References** (p. 65)
- **5 Prototype-based Handwriting Recognition Using Shape and Execution Prototypes** (p. 67)
- **1 Introduction** (p. 67)
- **2 A Handwriting Generation Process Model** (p. 68)
- **3 The First Stages of the Handwriting Recognition System** (p. 70)
- **3.1 Character Segmentation** (p. 70)
- **3.2 Feature Extraction** (p. 71)
- **4 The Execution of the Prototype Extraction Method** (p. 73)
- **4.1 Grouping Training Samples** (p. 74)
- **4.2 Refinement of the Prototypes** (p. 75)
- **4.3 Experimental Evaluation of the Prototype Extraction Method** (p. 76)
- **5 Prototype-based Classification** (p. 82)
- **5.1 The Prototype-based Classifier Architecture** (p. 82)
- **5.2 Experimental Evaluation of the Prototype Initialization** (p. 83)
- **5.3 Prototype Pruning to Increase Knowledge Condensation** (p. 84)
- **5.4 Discussion and Comparison to Related Work** (p. 85)
- **6 Conclusions** (p. 87)
- **Acknowledgement** (p. 87)
- **References** (p. 87)
- **6 Logo Detection in Document Images with Complex Backgrounds** (p. 89)
- **1 Introduction** (p. 89)
- **2 Detection of Potential Logos** (p. 90)
- **3 Verification of Potential Logos** (p. 91)
- **3.1 Feature Extraction by Geostatistics** (p. 91)
- **3.2 Neural Network-based Classifier** (p. 93)
- **4 Experimental Results** (p. 93)
- **5 Conclusions** (p. 97)
- **References** (p. 97)
- **7 An Intelligent Online Signature Verification System** (p. 99)

- **1 Introduction** (p. 99)
- **1.1 Process and System** (p. 100)
- **1.2 The Evaluation of an Online Signature Verification System** (p. 101)
- **2 Literature Overview** (p. 102)
- **2.1 Conventional Mathematical Approaches** (p. 102)
- **2.2 Dynamic Programming Approach** (p. 104)
- **2.3 Hidden Markov Model-Based Methods** (p. 105)
- **2.4 The Artificial Neural Networks Approach** (p. 106)
- **2.5 Signature Verification Product Market Survey** (p. 106)
- **3 A Typical Online Signature Verification System** (p. 107)
- **3.1 Data Acquisition** (p. 107)
- **3.2 Feature Extraction** (p. 110)
- **3.3 Feature Matching** (p. 111)
- **3.4 Verification** (p. 112)
- **5 Conclusions** (p. 116)
- **4 Proposed Online Signature Verification Applications** (p. 113)
- **4.1 System Password Authentication** (p. 113)
- **4.2 Internet E-commerce Application** (p. 114)
- **References** (p. 116)
- **8 Hybrid Fingerprint Recognition using Minutiae and Shape** (p. 119)
- **1 Introduction** (p. 119)
- **2 Elastic Deformations** (p. 120)
- **3 Elastic Minutiae Matching** (p. 122)
- **3.1 Local Minutiae Matching** (p. 122)
- **3.2 Global Minutiae Matching** (p. 123)
- **4 Shape Matching** (p. 126)
- **5 Results** (p. 126)
- **6 Conclusions** (p. 129)
- **Acknowledgement** (p. 129)
- **References** (p. 129)
- **9 Personal Authentication Using the Fusion of Multiple Palm-print Features** (p. 131)
- **1 Introduction** (p. 131)
- **2 Preprocessing** (p. 133)
- **2.1 Step 1: Image Thresholding** (p. 134)
- **2.2 Step 2: Border Tracing** (p. 134)
- **2.3 Step 3: Wavelet-based Segmentation** (p. 135)
- **2.4 Step 4: Region of Interest (ROI) Generation** (p. 135)
- **3 Feature Extraction** (p. 135)
- **4 Enrollment and Verification Processes** (p. 136)
- **4.1 Multitemplate Matching Approach** (p. 136)
- **4.2 Multimodal Authentication with PBF-based Fusion** (p. 137)
- **4.3 Adaptive Thresholding** (p. 139)
- **5 Experimental Results** (p. 140)
- **5.1 Experimental Environment** (p. 140)
- **5.2 Verification Using a Template Matching Algorithm** (p. 140)
- **10 Intelligent Iris Recognition Using Neural Networks** (p. 145)

- **5.3 Verification Using PBF-based Fusion** (p. 141)
- **6 Conclusions** (p. 142)
- **References** (p. 142)
- **1 Introduction** (p. 145)
- **2 Literature Review** (p. 147)
- **3 Some Groundbreaking Techniques** (p. 148)
 - **3.1 Daugman's Method** (p. 149)
 - **3.2 Boles's Method** (p. 150)
 - **3.3 Method of Dyadic Wavelet Transform Zero Crossing** (p. 151)
- **4 Neural Networks** (p. 154)
 - **4.1 Multilayer Feed-forward Neural Networks (MFNNs)** (p. 154)
 - **4.2 Radial Basis Function Neural Networks (RBFNNs)** (p. 156)
- **5 Proposed Method** (p. 158)
 - **5.1 Localizing the Iris** (p. 158)
 - **5.2 Finding the Contour** (p. 159)
 - **5.3 Feature Extraction** (p. 159)
 - **5.4 Iris Pattern Recognition** (p. 162)
- **6 Experimental Results** (p. 162)
 - **6.1 Results for an MFNN** (p. 162)
 - **6.2 Results for an RBFNN** (p. 162)
- **7 Graphic User Interface (GUI)** (p. 164)
- **8 Concluding Remarks** (p. 166)
- **References** (p. 166)
- **11 Pose-invariant Face Recognition Using Subspace Techniques** (p. 169)
 - **1 Introduction** (p. 169)
 - **1.1 Background** (p. 170)
 - **1.2 The Problem of Pose** (p. 171)
 - **2 Review of Biometric Systems** (p. 172)
 - **2.1 Summary of the Performance of Different Biometrics** (p. 173)
 - **2.2 Selecting the Right Biometric Technology** (p. 177)
 - **2.3 Multimodal Biometric Systems** (p. 177)
 - **3 Face Recognition Algorithms** (p. 178)
 - **3.1 Template-based Face Recognition** (p. 180)
 - **3.2 Appearance-based Face Recognition** (p. 180)
 - **3.3 Model-based Face Recognition** (p. 181)
 - **4 Linear Subspace Techniques** (p. 183)
 - **4.1 Principal Component Analysis** (p. 184)
 - **4.2 Linear Discriminant Analysis** (p. 185)
 - **4.3 Independent Component Analysis** (p. 189)
 - **5.3 Experimental Results for Pose Estimation using LDA and PCA** (p. 194)
 - **5 A Pose-invariant System for Face Recognition** (p. 191)
 - **5.1 The Proposed Algorithm** (p. 192)
 - **5.2 Pose Estimation using LDA** (p. 192)
 - **5.4 View-specific Subspace Decomposition** (p. 194)
 - **5.5 Experiments on the Pose-invariant Face Recognition System** (p. 195)
 - **6 Concluding Remarks** (p. 198)
