

- Preface p. xi
- 1 Objective and Motivation p. 1
- 1.1 Introduction p. 1
- 2 Principles of Modelling and Simulation p. 5
- 2.1 Introduction p. 5
- 2.2 Model Categories p. 8
- 2.3 Fields of Application p. 9
- 2.3.1 Introduction p. 9
- 2.3.2 Bottom-up design p. 9
- 2.3.3 Top-down design p. 10
- 2.3.4 Relationship of design strategies to modelling p. 12
- 2.3.5 Modelling for the specification p. 12
- 2.3.6 Modelling for the design p. 13
- 2.4 Model Development p. 14
- 2.4.1 Introduction p. 14
- 2.4.2 Structural modelling p. 16
- 2.4.3 Physical modelling p. 18
- 2.4.4 Experimental modelling p. 20
- 2.5 Model Verification and Validation p. 24
- 2.5.1 Introduction p. 24
- 2.5.2 Model verification p. 24
- 2.5.3 Model validation p. 27
- 2.6 Model Simplification p. 32
- 2.7 Simulators and Simulation p. 33
- 2.7.1 Introduction p. 33
- 2.7.2 Circuit simulation p. 33
- 2.7.3 Logic simulation p. 34
- 2.7.4 Multibody simulation p. 35
- 2.7.5 Block diagram simulation p. 36
- 2.7.6 Finite element simulation p. 36
- 2.7.7 Software simulation p. 36
- 2.8 Summary p. 37
- 3 Modelling and Simulation of Mixed Systems p. 39
- 3.1 Introduction p. 39
- 3.2 Electronics and Mechanics p. 40
- 3.2.1 Introduction p. 40
- 3.2.2 Analogies p. 41
- 3.2.3 Limits of the analogies p. 43
- 3.2.4 Differences between electronics and mechanics p. 44
- 3.3 Model Transformation p. 45
- 3.3.1 Introduction p. 45
- 3.3.2 Circuit simulation p. 45
- 3.3.3 Logic/Petri net simulation p. 47
- 3.3.4 Multibody simulation p. 50

- 3.3.5 Finite-element simulation p. 51
- 3.3.6 Evaluation of the model transformation p. 51
- 3.4 Domain-Independent Description Forms p. 52
- 3.4.1 Bond graphs p. 52
- 3.4.2 Block diagrams p. 54
- 3.4.3 Modelling languages for physical systems p. 55
- 3.4.4 Evaluation of domain-independent description forms p. 57
- 3.5 Simulator Coupling p. 58
- 3.5.1 Introduction p. 58
- 3.5.2 Simulator backplane p. 58
- 3.5.3 Examples of the simulator coupling p. 60
- 3.5.4 Evaluation p. 62
- 3.6 Summary p. 62
- 4 Modelling in Hardware Description Languages p. 63
- 4.1 Introduction p. 63
- 4.2 Fields of Application p. 65
- 4.2.1 Formulation of specification and design p. 65
- 4.2.2 Validation of specifications and verification of designs p. 65
- 4.2.3 Automatic synthesis p. 66
- 4.3 Characterisation of Hardware Description Languages p. 66
- 4.4 Languages p. 68
- 4.5 Modelling Paradigms p. 69
- 4.5.1 Introduction p. 69
- 4.5.2 Structural and behaviour-oriented modelling p. 70
- 4.5.3 Digital modelling p. 71
- 4.5.4 Analogue modelling p. 74
- 4.6 Simulation of Models in Hardware Description Languages p. 79
- 4.7 Summary p. 81
- 5 Software in Hardware Description Languages p. 83
- 5.1 Introduction p. 83
- 5.2 Simulation of Hardware for the Running of Software p. 85
- 5.3 Co-simulation by Software Interpretation p. 85
- 5.4 Co-simulation by Software Compilation p. 88
- 5.4.1 Introduction p. 88
- 5.4.2 Software representation p. 89
- 5.4.3 Synchronisation p. 90
- 5.4.4 Example of software modelling p. 92
- 5.4.5 Debugging of software p. 98
- 5.5 Summary p. 98
- 6 Mechanics in Hardware Description Languages p. 99
- 6.1 Introduction p. 99
- 6.2 Multibody Mechanics p. 100
- 6.2.1 Introduction p. 100
- 6.2.2 System-oriented modelling p. 104

- 6.2.3 Object-oriented modelling p. 108
- 6.2.4 Example: wheel suspension p. 111
- 6.2.5 Further applications p. 113
- 6.3 Continuum Mechanics p. 115
- 6.3.1 Introduction p. 115
- 6.3.2 Structural modelling p. 116
- 6.3.3 Physical modelling p. 125
- 6.3.4 Experimental modelling p. 130
- 6.4 Summary p. 132
- 7 Mechatronics p. 135
- 7.1 Modelling of Mechatronic Systems p. 135
- 7.2 Demonstrator 1: Semi-Active Wheel Suspension p. 136
- 7.2.1 System description p. 136
- 7.2.2 Modelling of software p. 138
- 7.2.3 Modelling of mechanics p. 139
- 7.2.4 Simulation p. 140
- 7.3 Demonstrator 2: Internal Combustion Engine with Drive Train p. 143
- 7.3.1 System description p. 143
- 7.3.2 Modelling p. 145
- 7.3.3 Simulation p. 147
- 7.4 Demonstrator 3: Camera Winder p. 148
- 7.4.1 Introduction p. 148
- 7.4.2 System description p. 148
- 7.4.3 Modelling p. 148
- 7.4.4 Simulation p. 152
- 7.5 Demonstrator 4: Disk Drive p. 152
- 7.5.1 Introduction p. 152
- 7.5.2 The disk drive p. 153
- 7.5.3 Circuit development for disk drives p. 154
- 7.5.4 The virtual disk drive p. 157
- 7.5.5 System modelling p. 158
- 7.5.6 Simulation and results p. 159
- 7.5.7 Conclusion p. 160
- 7.5.8 Acknowledgement p. 161
- 7.6 Summary p. 161
- 8 Micromechatronics p. 163
- 8.1 Modelling Micromechatronic Systems p. 163
- 8.1.1 Introduction p. 163
- 8.1.2 Component design p. 164
- 8.1.3 System design p. 165
- 8.2 Demonstrator 5: Capacitive Pressure Sensor p. 166
- 8.2.1 System description p. 166
- 8.2.2 Modelling p. 168
- 8.2.3 Simulation p. 176

- 8.3 Demonstrator 6: Micromirror p. 182
- 8.3.1 System description p. 183
- 8.3.2 Modelling p. 183
- 8.3.3 Simulation p. 186
- 8.4 Summary p. 186
- 9 Summary and Outlook p. 187
- Literature p. 189
- Appendix p. 217
- Symbols p. 217
- Abbreviations p. 220
- Registered Trademarks p. 220
- Index p. 221
