

- Preface
- Acknowledgements
- Glossary of Abbreviations
- Glossary of Symbols
- 1 An Introduction to Optical Communication Systems
- 2 Principles of Distributed Feedback Semiconductor Laser Diodes: Coupled Wave Theory
- 3 Structural Impacts on the Solutions of Coupled Wave Equations: An Overview
- 4 Transfer Matrix Modelling in DFB Semiconductor Lasers
- 8 Circuit and Transmission-Line Laser Modelling (TLLM) Techniques
- 5 Threshold Analysis and Optimization of Various DFB LDs Using the Transfer Matrix Method
- 6 Above-Threshold Characteristics of DFB Laser Diodes: A TMM Approach
- 7 Above-Threshold Analysis of Various DFB Laser Structures Using the TMM
- 9 Analysis of DFB Laser Diode Characteristics Based on the Transmission-Line Modelling (TLLM)
- 10 Wavelength Tunable Optical Filters Based on DFB Laser Structures
- 11 Other Wavelength Tunable Optical Filters Based on the DFB Laser Structure
- 12 Conclusion, Summary and Suggestions
- Index
