

- **Preface** (p. v)
- **List of Symbols** (p. ix)
- **1 Basic Concepts of Medical Instrumentation** (p. 1)
- **1.1 Terminology of Medicine and Medical Devices** (p. 4)
- **1.2 Generalized Medical Instrumentation System** (p. 5)
- **1.3 Alternative Operational Modes** (p. 7)
- **1.4 Medical Measurement Constraints** (p. 9)
- **1.5 Classifications of Biomedical Instruments** (p. 12)
- **1.6 Interfering and Modifying Inputs** (p. 12)
- **1.7 Compensation Techniques** (p. 13)
- **1.8 Biostatistics** (p. 16)
- **1.9 Generalized Static Characteristics** (p. 19)
- **1.10 Generalized Dynamic Characteristics** (p. 25)
- **1.11 Design Criteria** (p. 35)
- **1.12 Commercial Medical Instrumentation Development Process** (p. 35)
- **1.13 Regulation of Medical Devices** (p. 38)
- **Problems** (p. 39)
- **References** (p. 42)
- **2 Basic Sensors And Principles** (p. 44)
- **2.1 Displacement Measurements** (p. 44)
- **2.2 Resistive Sensors** (p. 45)
- **2.3 Bridge Circuits** (p. 51)
- **2.4 Inductive Sensors** (p. 53)
- **2.5 Capacitive Sensors** (p. 55)
- **2.6 Piezoelectric Sensors** (p. 57)
- **2.7 Temperature Measurements** (p. 61)
- **2.8 Thermocouples** (p. 62)
- **2.9 Thermistors** (p. 64)
- **2.10 Radiation Thermometry** (p. 67)
- **2.11 Fiber-Optic Temperature Sensors** (p. 72)
- **2.12 Optical Measurements** (p. 72)
- **2.13 Radiation Sources** (p. 73)
- **2.14 Geometrical and Fiber Optics** (p. 78)
- **2.15 Optical Filters** (p. 80)
- **2.16 Radiation Sensors** (p. 81)
- **2.17 Optical Combinations** (p. 84)
- **Problems** (p. 85)
- **References** (p. 87)
- **3 Amplifiers and Signal Processing** (p. 89)
- **3.1 Ideal Op Amps** (p. 89)
- **3.2 Inverting Amplifiers** (p. 91)
- **3.3 Noninverting Amplifiers** (p. 94)
- **3.4 Differential Amplifiers** (p. 95)
- **3.5 Comparators** (p. 98)
- **3.6 Rectifiers** (p. 100)
- **3.7 Logarithmic Amplifiers** (p. 101)

- **3.8 Integrators** (p. 102)
- **3.9 Differentiators** (p. 105)
- **3.10 Active Filters** (p. 106)
- **3.11 Frequency Response** (p. 108)
- **3.12 Offset Voltage** (p. 110)
- **3.13 Bias Current** (p. 111)
- **3.14 Input and Output Resistance** (p. 113)
- **3.15 Phase-Sensitive Demodulators** (p. 115)
- **3.16 Microcomputers in Medical Instrumentation** (p. 118)
- **Problems** (p. 118)
- **References** (p. 120)
- **4 The Origin of Biopotentials** (p. 121)
- **4.1 Electrical Activity of Excitable Cells** (p. 121)
- **4.2 Volume Conductor Fields** (p. 129)
- **4.3 Functional Organization of the Peripheral Nervous System** (p. 132)
- **4.4 The Electroneurogram (ENG)** (p. 134)
- **4.5 The Electromyogram (EMG)** (p. 138)
- **4.6 The Electrocardiogram (ECG)** (p. 139)
- **4.7 The Electroretinogram (ERG)** (p. 151)
- **4.8 The Electroencephalogram (EEG)** (p. 156)
- **4.9 The Magnetoencephalogram (MEG)** (p. 175)
- **Problems** (p. 176)
- **References** (p. 180)
- **5 Biopotential Electrodes** (p. 183)
- **5.1 The Electrode-Electrolyte Interface** (p. 183)
- **5.2 Polarization** (p. 186)
- **5.3 Polarizable and Nonpolarizable Electrodes** (p. 189)
- **5.4 Electrode Behavior and Circuit Models** (p. 194)
- **5.5 The Electrode-Skin Interface and Motion Artifact** (p. 196)
- **5.6 Body-Surface Recording Electrodes** (p. 200)
- **5.7 Internal Electrodes** (p. 206)
- **5.8 Electrode Arrays** (p. 211)
- **5.9 Microelectrodes** (p. 213)
- **5.10 Electrodes for Electric Stimulation of Tissue** (p. 222)
- **5.11 Practical Hints in Using Electrodes** (p. 225)
- **Problems** (p. 226)
- **References** (p. 230)
- **6 Biopotential Amplifiers** (p. 233)
- **6.1 Basic Requirements** (p. 233)
- **6.2 The Electrocardiograph** (p. 235)
- **6.3 Problems Frequently Encountered** (p. 245)
- **6.4 Transient Protection** (p. 253)
- **6.5 Common-Mode and Other Interference-Reduction Circuits** (p. 255)
- **6.6 Amplifiers for Other Biopotential Signals** (p. 258)
- **6.7 Example of a Biopotential Preamplifier** (p. 262)
- **6.8 Other Biopotential Signal Processors** (p. 264)

- **6.9 Cardiac Monitors** (p. 273)
- **6.10 Biotelemetry** (p. 277)
- **Problems** (p. 281)
- **References** (p. 285)
- **7 Blood Pressure and Sound** (p. 287)
- **7.1 Direct Measurements** (p. 289)
- **7.2 Harmonic Analysis of Blood-Pressure Waveforms** (p. 294)
- **7.3 Dynamic Properties of Pressure-Measurement Systems** (p. 295)
- **7.4 Measurement of System Response** (p. 302)
- **7.5 Effects of System Parameters on Response** (p. 303)
- **7.6 Bandwidth Requirements for Measuring Blood Pressure** (p. 305)
- **7.7 Typical Pressure-Waveform Distortion** (p. 305)
- **7.8 Systems for Measuring Venous Pressure** (p. 307)
- **7.9 Heart Sounds** (p. 308)
- **7.10 Phonocardiography** (p. 312)
- **7.11 Cardiac Catheterization** (p. 312)
- **7.12 Effects of Potential and Kinetic Energy on Pressure Measurements** (p. 316)
- **7.13 Indirect Measurements of Blood Pressure** (p. 317)
- **7.14 Tonometry** (p. 324)
- **Problems** (p. 328)
- **References** (p. 329)
- **8 Measurement of Flow and Volume of Blood** (p. 332)
- **8.1 Indicator-Dilution Method That Uses Continuous Infusion** (p. 332)
- **8.2 Indicator-Dilution Method That Uses Rapid Injection** (p. 335)
- **8.3 Electromagnetic Flowmeters** (p. 338)
- **8.4 Ultrasonic Flowmeters** (p. 344)
- **8.5 Thermal-Convection Velocity Sensors** (p. 355)
- **8.6 Chamber Plethysmography** (p. 357)
- **8.7 Electric-Impedance Plethysmography** (p. 359)
- **8.8 Photoplethysmography** (p. 366)
- **Problems** (p. 368)
- **References** (p. 369)
- **9 Measurements of the Respiratory System** (p. 372)
- **9.1 Modeling the Respiratory System** (p. 373)
- **9.2 Measurement of Pressure** (p. 380)
- **9.3 Measurement of Gas-Flow Rate** (p. 382)
- **9.4 Lung Volume** (p. 390)
- **9.5 Respiratory Plethysmography** (p. 399)
- **9.6 Some Tests of Respiratory Mechanics** (p. 406)
- **9.7 Measurement of Gas Concentration** (p. 417)
- **9.8 Some Tests of Gas Transport** (p. 427)
- **Problems** (p. 434)
- **References** (p. 437)
- **10 Chemical Biosensors** (p. 440)
- **10.1 Blood-Gas and Acid-Base Physiology** (p. 442)
- **10.2 Electrochemical Sensors** (p. 444)

- **10.3 Chemical Fibrosensors** (p. 450)
- **10.4 Ion-Selective Field-Effect Transistor (ISFET)** (p. 466)
- **10.5 Immunologically Sensitive Field-Effect Transistor (IMFET)** (p. 468)
- **10.6 Noninvasive Blood-Gas Monitoring** (p. 469)
- **10.7 Blood-Glucose Sensors** (p. 477)
- **10.8 Summary** (p. 482)
- **Problems** (p. 482)
- **References** (p. 483)
- **11 Clinical Laboratory Instrumentation** (p. 486)
- **11.1 Spectrophotometry** (p. 487)
- **11.2 Automated Chemical Analyzers** (p. 495)
- **11.3 Chromatology** (p. 502)
- **11.4 Electrophoresis** (p. 505)
- **11.5 Hematology** (p. 507)
- **Problems** (p. 515)
- **References** (p. 516)
- **12 Medical Imaging Systems** (p. 518)
- **12.1 Information Content of an Image** (p. 518)
- **12.2 Modulation Transfer Function** (p. 525)
- **12.3 Noise-Equivalent Bandwidth** (p. 527)
- **12.4 Photography** (p. 527)
- **12.5 Television Systems** (p. 530)
- **12.6 Radiography** (p. 532)
- **12.7 Computed Radiography** (p. 540)
- **12.8 Computed Tomography** (p. 543)
- **12.9 Magnetic Resonance Imaging** (p. 551)
- **12.10 Nuclear Medicine** (p. 555)
- **12.11 Single-Photon Emission Computed Tomography** (p. 561)
- **12.12 Positron Emission Tomography** (p. 562)
- **12.13 Ultrasonography** (p. 565)
- **Problems** (p. 573)
- **References** (p. 576)
- **13 Therapeutic and Prosthetic Devices** (p. 577)
- **13.1 Cardiac Pacemakers and Other Electric Stimulators** (p. 577)
- **13.2 Defibrillators and Cardioverters** (p. 591)
- **13.3 Mechanical Cardiovascular Orthotic and Prosthetic Devices** (p. 597)
- **13.4 Hemodialysis** (p. 600)
- **13.5 Lithotripsy** (p. 602)
- **13.6 Ventilators** (p. 604)
- **13.7 Infant Incubators** (p. 607)
- **13.8 Drug Delivery Devices** (p. 609)
- **13.9 Surgical Instruments** (p. 613)
- **13.10 Therapeutic Applications of the Laser** (p. 617)
- **Problems** (p. 618)
- **References** (p. 620)
- **14 Electrical Safety** (p. 623)

- **14.1 Physiological Effects of Electricity** (p. 624)
- **14.2 Important Susceptibility Parameters** (p. 626)
- **14.3 Distribution of Electric Power** (p. 630)
- **14.4 Macroshock Hazards** (p. 634)
- **14.5 Microshock Hazards** (p. 636)
- **14.6 Electrical-Safety Codes and Standards** (p. 640)
- **14.7 Basic Approaches to Protection Against Shock** (p. 642)
- **14.8 Protection: Power Distribution** (p. 643)
- **14.9 Protection: Equipment Design** (p. 646)
- **14.10 Electrical-Safety Analyzers** (p. 649)
- **14.11 Testing the Electric System** (p. 650)
- **14.12 Tests of Electric Appliances** (p. 654)
- **Problems** (p. 656)
- **References** (p. 658)
- **Appendix** (p. 659)
- **A.1 Physical Constants** (p. 659)
- **A.2 SI Prefixes** (p. 659)
- **A.3 SI Units** (p. 660)
- **Reference** (p. 660)
- **A.4 Abbreviations** (p. 661)
- **A.5 Chemical Elements** (p. 664)
- **Index** (p. 667)
