

- Preface p. xv
- Figures and Tables p. xvii
- Introduction p. 1
- 1 Introduction to High Integrity Die Casting Processes p. 3
  - 1.1 Origins of High Pressure Die Casting p. 3
  - 1.2 Conventional High Pressure Die Casting p. 5
  - 1.3 Problems with Conventional Die Casting p. 7
  - 1.4 Strategies to Improve Die Casting Capabilities p. 10
  - 1.5 High Integrity Die Casting Processes p. 10
  - References p. 11
- 2 Molten Metal Flow in High Integrity Die Casting Processes p. 13
  - 2.1 Introduction p. 13
  - 2.2 Flow within a Fluid p. 13
  - 2.3 Flow at the Metal Fill Front p. 15
  - 2.4 Metal Flow in Vacuum Die Casting p. 19
  - 2.5 Metal Flow in Squeeze Casting p. 21
  - 2.6 Metal Flow in Semi-Solid Metalworking p. 22
  - 2.7 Predicting Metal Flow in High Integrity Die Casting Processes p. 24
  - References p. 24
  - High Integrity Die Casting Processes p. 27
- 3 Vacuum Die Casting p. 29
  - 3.1 Vacuum Die Casting Defined p. 29
  - 3.2 Managing Gases in the Die p. 29
  - 3.3 Managing Shrinkage in the Die p. 34
  - 3.4 Elements of Vacuum Die Casting Manufacturing Equipment p. 35
  - 3.5 Applying Vacuum Die Casting p. 40
  - References p. 42
  - Case Studies: Vacuum Die Casting p. 42
    - Introduction p. 42
    - B Post p. 43
    - Transmission Cover p. 44
    - Engine Component Mounting Bracket p. 45
    - Marine Engine Lower Mounting Bracket p. 46
    - Reference p. 49
- 4 Squeeze Casting p. 51
  - 4.1 Squeeze Casting Defined p. 51
  - 4.2 Managing Gases in the Die p. 53
  - 4.3 Managing Shrinkage in the Die p. 54
  - 4.4 Elements of Squeeze Casting Manufacturing Equipment p. 56
  - 4.5 Applying Squeeze Casting p. 57
  - References p. 58
  - Case Studies: Squeeze Casting p. 58
    - Introduction p. 58
    - Steering Knuckle p. 60

- Valve Housing p. 61
- Steering Column Housing p. 62
- High Performance Engine Block p. 63
- References p. 65
- 5 Semi-Solid Metalworking p. 67
- 5.1 Semi-Solid Metalworking Defined p. 67
- 5.2 Managing Gases in the Die p. 70
- 5.3 Managing Shrinkage in the Die p. 70
- 5.4 Microstructures in Semi-Solid Metalworking p. 71
- 5.5 Semi-Solid Metalworking Equipment p. 72
- 5.5.1 Billet-Type Indirect Semi-Solid Metalworking p. 73
- 5.5.2 Thixomolding Direct Semi-Solid Metalworking p. 79
- 5.6 Applying Semi-Solid Metalworking p. 82
- References p. 83
- Case Studies: Aluminum Semi-Solid Metalworking p. 84
- Introduction p. 84
- Fuel Rails p. 84
- Control Arm p. 88
- Swivel Bracket p. 89
- Idler Housing p. 90
- References p. 91
- Case Studies: Magnesium Semi-Solid Metalworking p. 91
- Introduction p. 91
- Automotive Seat Frame p. 93
- Wireless Telephone Face Plates p. 95
- Video Projector Case p. 96
- Camera Housing p. 97
- Laptop Computer Case p. 97
- Power Hand Tool Housing p. 98
- References p. 100
- 6 Thermal Balancing and Powder Die Lubricant Processes p. 101
- 6.1 Thermal Cycling Inherent to High Integrity Die Casting Processes p. 101
- 6.2 Heat Checking and Soldering p. 102
- 6.3 Containing the Effects of Heat Checking and Soldering p. 103
- 6.4 Repercussion of Heat Checking and Soldering Containment Actions p. 105
- 6.5 Thermal Management of High Integrity Die Casting Process Tooling p. 105
- 6.6 Minimization of Thermal Cycling Effects with Powder Lubricants p. 106
- 6.7 Applying Thermal Management Methods in Real World Applications p. 108
- References p. 109
- Design Considerations for High Integrity Die Castings p. 111
- 7 Design for Manufacturability of High Integrity Die Castings p. 113
- 7.1 Introduction to Design for Manufacturability p. 113
- 7.2 High Integrity Die Casting Design for Manufacturability Guidelines p. 113
- 7.3 Automotive Fuel Rail Case Study Review p. 114

- 7.3.1 Fuel Rail Functional Requirements p. 115
- 7.3.2 Case Study Analysis Method p. 115
- 7.3.3 Review of the Z-1 Fuel Rail Design p. 116
- 7.3.4 Review of the Z-2 Fuel Rail Design p. 118
- 7.3.5 Further Design for Manufacturability Improvements p. 121
- 7.4 Conclusions of the Case Study p. 122
- References p. 123
- 8 Component Integration Using High Integrity Die Casting Processes p. 125
- 8.1 Introduction to Component Integration p. 125
- 8.2 Hidden Costs in Every Component p. 125
- 8.3 Analyzing Integration Potential p. 127
- 8.4 Component Integration Using High Integrity Die Casting Processes p. 127
- 8.5 Component Integration Case Study p. 129
- References p. 130
- 9 Value Added Simulations of High Integrity Die Casting Processes p. 131
- 9.1 Introduction to Applied Computer Simulations p. 131
- 9.2 Computer Simulations of High Integrity Die Casting Processes p. 134
- 9.3 Applying Simulations Effectively p. 136
- 9.3.1 Resources p. 138
- 9.3.2 Planning p. 139
- 9.3.3 Coupling Product and Process Simulations p. 140
- 9.4 Commitment p. 140
- 9.5 A Case for Sharing Simulation Data across Organizations p. 140
- References p. 141
- Controlling Quality in High Integrity Die Casting Processes p. 143
- 10 Applying Statistical Process Control to High Integrity Die Casting Processes p. 145
- 10.1 Introduction to Statistical Process Control p. 145
- 10.2 SPC Characteristic Types p. 148
- 10.3 SPC Applied to Dynamic Process Characteristics p. 149
- 10.4 Die Surface Temperature Case Study p. 151
- 10.5 Applying SPC to High Integrity Die Casting Processes p. 154
- References p. 155
- 11 Defects in High Pressure Casting Processes p. 157
- 11.1 Introduction p. 157
- 11.2 Conventional Die Casting Defects p. 157
- 11.2.1 Surface Defects p. 158
- 11.2.2 Internal Defects p. 159
- 11.2.3 Dimensional Defects p. 161
- 11.3 Defects Occurring during Secondary Processing p. 161
- 11.4 Defects Unique to Squeeze Casting and Semi-Solid Metalworking p. 162
- 11.4.1 Contaminant Veins p. 163
- 11.4.2 Phase Separation p. 165
- 11.5 Predicting Defects p. 167
- References p. 168

- Visions of the Future p. 169
- 12 Future Developments in High Integrity Die Casting p. 171
- 12.1 Continual Development p. 171
- 12.2 New High Integrity Die Casting Process Variants p. 171
- 12.3 Refinements of Magnesium Alloys p. 172
- 12.4 Emerging Alloys for Use with High Integrity Die Casting Processes p. 173
- 12.5 Metal Matrix Composites for Use with High Integrity Die Casting Processes p. 173
- 12.6 Reducing Tooling Lead Times p. 175
- 12.7 Lost-Core Technologies p. 176
- 12.8 Controlled Porosity p. 177
- 12.9 Innovations Continue p. 178
- References p. 178
- Study Questions p. 181
- Appendix A Common Nomenclature Related to High Integrity Die Casting Processes p. 201
- Appendix B Recommended Reading p. 207
- B.1 Books p. 207
- B.2 Papers p. 208
- B.3 Periodicals p. 209
- Appendix C Material Properties of Aluminum p. 211
- References p. 211
- Appendix D Die Cast Magnesium Material Properties p. 215
- Reference p. 218
- Index p. 219
