

Table of Contents

- Preface p. ix
- Acknowledgments p. xv
- Part I
- 1 Setting the Table p. 3
- 2 Building a Living Organism from Inanimate Parts p. 11
- 3 Molecular Biology and Recombinant DNA Technology p. 21
- 4 Transmitting the Genetic Information to Future Generations p. 63
- 5 Developmental Biology p. 89
- 6 Reproductive Biology and Assisted Reproductive Technologies p. 111
- 7 Methods and Strategies for Gene Transfer and Engineering of the Germ Line p. 121
- Part II
- 8 Introduction to the Ethics of Reproductive Genetic Technologies p. 153
- 9 Future Developments and Applications of Genetic Engineering Technology p. 189
- 10 What If? Ethical and Legal Aspects of Germ Line Genetic Manipulation p. 221
- A Brief Epilogue: Understanding Our Biases p. 263
- Index p. 271
