

- Acknowledgments p. xi
- Introduction p. xv
- Part 1 Building a Multisystem Tiger Box p. 1
- Chapter 1 Basic Windows 2000/Windows 2000 Server Installation and Configuration p. 11
 - Launching Windows 2000 Server p. 11
 - Basic Windows 2000/Windows 2000 Server Configuration p. 15
 - Active Directory p. 16
 - TCP/IP Customization p. 40
 - Domain Name Service p. 46
- Chapter 2 Basic Linux and Solaris Installations and Configurations p. 53
 - NIX Minimum System Requirements (Intel-Based) p. 53
 - Installing and Configuring Red Hat Linux p. 54
 - Installing and Configuring Solaris 8 p. 64
 - Installation Completion p. 69
- Chapter 3 Mac OS X Tiger Box Solutions p. 71
 - Minimum System Requirements: Step 1 p. 71
 - Installing Mac OS X: Step 2 p. 72
 - Installing OS X p. 72
 - Upgrading to OS X p. 73
 - Installing Developer Tools: Step 3 p. 73
 - Downloading the Software p. 73
 - Installing and Configuring a Port Scanner Infrastructure: Step 4 p. 76
 - Installing Netscape p. 81
 - Enabling the Root Account p. 81
 - Modifying the PATH p. 82
 - Nessus Security Scanner Example Configuration p. 83
 - Logging In with the Client p. 91
 - Conclusion p. 92
- Chapter 4 Installing and Configuring a Testing Target p. 93
 - Minimum Hardware Requirements p. 93
 - Installation Methods p. 94
 - Server Licensing p. 95
 - Server Types p. 96
 - Step-by-Step Installation p. 97
 - Logging In p. 99
 - Optional Services for Your Testing Target p. 100
 - Installing WINS p. 100
 - Setting Preferences for WINS Manager p. 102
 - Configuring a WINS Server p. 103
 - WINS Static Mappings p. 104
 - WINS Database p. 106
 - Installing DNS p. 106
 - DNS Zones, Hosts, and Records p. 108
 - Internet Information Server Step by Step p. 110

- IIS Installation and Configuration p. 110
- IIS Administration Utility p. 111
- Conclusion p. 120
- Part 2 Using Security Analysis Tools for Your Windows-Based Tiger Box Operating System p. 121
- Chapter 5 Cerberus Internet Scanner p. 135
 - System Requirements p. 136
 - Installation p. 136
 - Target Configuration p. 137
 - Vulnerability Scanning p. 146
 - Reporting p. 147
- Chapter 6 CyberCop Scanner p. 157
 - System Requirements p. 158
 - Installation p. 158
 - Initial Configuration and Product Update p. 159
 - Welcome to Update p. 163
 - Setup Configuration Options p. 164
 - Target Configuration p. 170
 - Selecting Modules for a Scan p. 170
 - Vulnerability Scanning p. 175
 - Performing Intrusion Detection System Software Tests p. 176
 - Advanced Software Utilities p. 179
 - CASL p. 180
 - Creating and Sending an Example Packet p. 182
 - Crack p. 184
 - SMB Grind p. 186
 - Reporting p. 188
 - Network Map p. 190
 - Output File p. 191
 - Example Report p. 192
- Chapter 7 Internet Scanner p. 199
 - System Requirements p. 199
 - Installation p. 200
 - Starting Internet Scanner for the First Time p. 200
 - Command-Line Option p. 201
 - Target Configuration p. 202
 - Vulnerability Scanning p. 209
 - Scanning from the GUI Mode p. 209
 - Scanning from the Console Mode p. 210
 - Scanning from the Command-Line Mode p. 211
 - Reporting p. 212
 - Sample Report p. 214
- Chapter 8 Security Threat Avoidance Technology Scanner p. 231
 - System Requirements p. 233

- Installation p. 233
- Starting STAT Scanner for the First Time p. 234
- Target Configuration p. 236
- Target Selection p. 237
- Vulnerability Selection p. 238
- Vulnerability Scanning p. 239
- Command-Line Usage p. 242
- Vulnerability Display p. 243
- Reporting p. 245
- Sample Report p. 246
- Chapter 9 TigerSuite 4.0 p. 257
 - Installation p. 257
 - Local Installation Method p. 258
 - Mobile Installation Method p. 261
 - Program Modules p. 261
 - System Status Modules p. 262
 - Hardware Modules p. 262
 - System Status Internetworking Modules p. 265
 - TigerBox Toolkit p. 269
 - TigerBox Tools p. 269
 - TigerBox Scanners p. 275
 - TigerBox Penetrators p. 277
 - TigerBox Simulators p. 281
 - Using the Session Sniffers p. 283
 - PortSpy Communication Sniffer p. 283
 - TigerWipe Active Processes p. 285
 - Practical Application p. 286
 - Tracing Back with TigerSuite p. 286
- Part 3 Using Security Analysis Tools for NIX and Mac OS X p. 291
 - Chapter 10 hping/2 p. 315
 - Idle Host Scanning and IP Spoofing p. 316
 - System Requirements p. 325
 - Linux Installation and Configuration p. 326
 - Other Installations p. 329
 - Using hping/2 p. 329
 - Chapter 11 Nessus Security Scanner p. 339
 - System Requirements p. 340
 - Installation and Configuration p. 341
 - Automatic Installation p. 346
 - Configuring Nessus Security Scanner p. 347
 - Starting the Server Daemon p. 350
 - Additional Notes for Linux and Solaris Users p. 354
 - For Mac OS X Users p. 355
 - Vulnerability Scanning p. 356

- Plugins p. 358
- Scan Options p. 359
- Target Configuration p. 360
- Reporting p. 362
- Chapter 12 Nmap p. 371
 - System Requirements p. 373
 - Installation and Configuration p. 373
 - Other Installations p. 380
 - For Mac OS X Users p. 380
 - Using Nmap p. 382
