

- Series Preface p. ix
- Preface p. xi
- Part I General Considerations p. 1
- 1 Tribology - Friction, Wear, and Lubrication p. 3
- 2 Lubricants and Lubrication p. 23
- 3 Surface Texture and Interactions p. 63
- 4 Bearing Materials p. 89
- Part II Fluid-Film Bearings p. 113
- 5 Fundamentals of Viscous Flow p. 115
- 6 Reynolds Equation and Applications p. 143
- 7 Thrust Bearings p. 173
- 8 Journal Bearings p. 201
- 9 Squeeze-Film Bearings p. 263
- 10 Hydrostatic Bearings p. 299
- 11 Gas Bearings p. 321
- 12 Dry and Starved Bearings p. 361
- Part III Rolling Element Bearings p. 389
- 13 Selecting Bearing Type and Size p. 391
- 14 Principles and Operating Limits p. 425
- 15 Friction, Wear and Lubrication p. 459
- Part IV Seals and Monitoring
- 16 Seal Fundamentals p. 487
- 17 Condition Monitoring and Failure Analysis p. 531
- Appendix A Unit Conversion Factors p. 551
- Appendix B Viscosity Conversions p. 555
- Index p. 557
