

Table of Contents

Preface p. x

Acknowledgements p. xiv

Section I. Introduction

Chapter 1 Animation, Art, and Technology in Context p. 3

Summary p. 3

1.1 A Digital Creative Environment p. 3

1.2 The Development of the Technology p. 4

1.3 Visual Milestones p. 13

1.4 A Bag of New Magic Tricks p. 28

1.5 Timeline Charts p. 33

Key Terms p. 40

Chapter 2 The Digital Production Process p. 41

Summary p. 41

2.1 Production Strategies p. 41

2.2 The Digital Computer Animation Studio p. 46

2.3 Creative and Production Teams p. 49

2.4 Overview of the Computer Animation Process p. 51

2.5 Ten Career Tips for Computer Animators and Digital Artists p. 61

Key Terms p. 74

Section II. Modeling

Chapter 3 Basic Modeling Concepts p. 77

Summary p. 77

3.1 Space, Objects, and Structures p. 77

3.2 Building with Numbers p. 80

3.3 Points, Lines, and Surfaces p. 82

3.4 Moving Things Around p. 83

3.5 File Formats for Modeling p. 89

3.6 Getting Ready p. 93

Key Terms p. 100

Chapter 4 Basic Modeling Techniques p. 101

Summary p. 101

4.1 Introduction p. 101

4.2 A Note About Lines p. 102

4.3 Geometric Primitives p. 105

4.4 Sweeping p. 108

4.5 Free-Form Objects p. 110

4.6 Basic Modeling Utilities p. 114

4.7 Groups and Hierarchical Structures p. 119

Key Terms p. 122

Chapter 5 Advanced Modeling Techniques p. 123

Summary p. 123

5.1 FreeForm Curved Surfaces p. 123

5.2 Subdivision Surfaces p. 131

5.3 Logical Operators and Trimmed Surfaces p. 131

5.4 Advanced Modeling Utilities p. 133

5.5 Procedural Descriptions and Physical Simulations p. 137

5.6 Photogrammetry and Image-Based Modeling p. 142

5.7 Getting Ready p. 143

Key Terms p. 148

Section III. Rendering

Chapter 6 Basic Rendering Concepts p. 151

Summary p. 151

6.1 Lights, Camera, and Materials p. 151

6.2 Color p. 154

6.3 Steps in the Rendering Process p. 157

6.4 Hidden Surface Removal p. 159

6.5 Z-Buffer p. 160

6.6 Ray Tracing p. 161

6.7 Radiosity p. 163

6.8 Image-Based Rendering p. 165

6.9 Nonrealistic Rendering p. 168

6.10 File Formats for Rendering p. 170

6.11 Getting Ready p. 171

Key Terms p. 179

Chapter 7 The Camera p. 181

Summary p. 181

7.1 Types of Cameras p. 181

7.2 The Pyramid of Vision p. 182

7.3 Types of Camera Shots p. 185

7.4 Types of Camera Lenses p. 190

7.5 Camera Animation p. 192

7.6 Getting Ready p. 193

Key Terms p. 196

Chapter 8 Lighting p. 197

Summary p. 197

8.1 Lighting Strategies and Mood p. 197

8.2 Types of Light Sources p. 202

8.3 Basic Components of a Light Source p. 206

8.4 Lighting the Scene p. 210

8.5 Basic Positions of Light Sources p. 216

8.6 Getting Ready p. 220

Key Terms p. 223

Chapter 9 Shading and Surface Characteristics p. 225

Summary p. 225

9.1 Surface Shading Techniques p. 225

9.2 Surface Shaders p. 228

9.3 Image Mapping p. 232

9.4 Surface Reflectivity p. 244

9.5 Surface Color p. 250

9.6 Surface Texture p. 252

9.7 Surface Transparency p. 256

9.8 Environment-Dependent Shading p. 257

9.9 Selected Rendering Hacks p. 261

9.10 Getting Ready p. 263

Key Terms p. 266

Section IV. Animation

Chapter 10 Basic Concepts of Animation p. 269

Summary p. 269

10.1 Types of Animation p. 269

10.2 Principles of Animation p. 272

10.3 Storytelling p. 279

10.4 Storyboarding p. 282

10.5 Character Development p. 285

10.6 Animation File Formats p. 292

10.7 Getting Ready p. 253

Key Terms p. 297

Chapter 11 Basic Computer Animation Techniques p. 299

Summary p. 299

11.1 Principles of Keyframe Interpolation p. 299

11.2 Model Animation p. 303

11.3 Camera Animation p. 310

11.4 Light Animation p. 315

11.5 Hierarchical Animation p. 320

11.6 Getting Ready p. 323

Key Terms p. 325

Chapter 12 Advanced Computer Animation Techniques p. 327

Summary p. 327

12.1 Inverse Kinematics p. 327

12.2 Performance Animation and Motion Capture p. 330

12.3 Motion Dynamics p. 338

12.4 Procedural Animation p. 346

12.5 Facial Animation p. 354

12.6 Crowd Animation p. 358

12.7 Location-Based and Interactive Entertainment p. 360

Key Terms p. 366

Section V. Post-Processing

Chapter 13 Retouching and Compositing p. 369

Summary p. 369

13.1 Basic Concepts of Image Manipulation p. 369

13.2 Image Retouching p. 375

13.3 Image Compositing and Blending p. 381

13.4 Image Sequencing p. 388

Key Terms p. 395

Chapter 14 Output p. 397

14.3 File Formats for Image Output p. 403

Summary p. 397

14.1 Basic Concepts of Digital Output p. 397

14.2 Image Resolution p. 398

14.4 Output on Paper p. 409

14.5 Output on Photographic Media p. 411

14.6 Output on Video p. 412

14.7 Output on Digital Media p. 414

14.8 Output on Three-Dimensional Media p. 418

Key Terms p. 420

Appendix www.artof3d.com p. 421

Index p. 422
