

- Pt. 1.
- Quantum noise in nonlinear optical phenomena -- Ryszard Tanaś
- Quantum interference in atomic and molecular systems -- Zbigniew Ficek
- Quantum-optical states in finite-dimensional Hilbert space : I. General formalism -- Adam Miranowicz, Wiesław Leoński, and Nobuyuki Imoto
- Quantum-optical states in finite-dimensional Hilbert space : II. State generation -- Wiesław Leoński and Adam Miranowicz
- Correlated superposition states in two-atom systems -- Zbigniew Ficek and Ryszard Tanaś
- Multipolar polarizabilities from interaction-induced Raman scattering -- Tadeusz Bancewicz, Yves Le Duff, and Jean-Luc Godet
- Nonstationary Casimir effect and analytical solutions for quantum fields in cavities with moving boundaries -- V.V. Dodonov
- Quantum multipole radiation -- Alexander S. Shumovsky
- Nonlinear phenomena in quantum optics -- Jiří Bajer ... [et al.] -- A
- quantum electrodynamical foundation for molecular photonics -- David L. Andrews and Philip Allcock
- Symmetry in electrodynamics : from special to general relativity, macro to quantum domains-- Mendel Sachs.
- Pt. 2.
- Optical effects of an extended electromagnetic theory -- B. Lehnert
- O(3) electrodynamics -- M.W. Evans
- Symmetry and exact solutions of the Maxwell SU(2) Yang-Mills equations -- R.Z. Zhdanov and V.I. Lahno
- Chaos in optical systems -- P. Szlachetka and K. Grygiel
- Non-Abelian Stokes theorem -- Bogusław Broda -- The
- link between the Sachs and O(3) theories of electrodynamics -- M.W. Evans -- The
- link between the topological theory of Rañada and Trueba, the Sachs theory, and O(3) electrodynamics -- M.W. Evans
- Beyond noncausal quantum physics -- J.R. Croca
- Electrodynamics and topology -- Patrick Cornille
- Quantum electrodynamics : potentials, guage invariance, and analogy to classical electrodynamics -- Carl E. Baum
- Extracting and using electromagnetic energy from the active vacuum -- Thomas E. Bearden
- Energy from the active vacuum : the motionless electromagnetic generator-- Thomas E. Bearden.
