

- Preface
- Contributors
- 1 Optical Wave Propagation A. Chan
- 2 Infrared Techniques A. Jha and P. Kupferman
- 3 Optical Lenses J. Rogers
- 4 Optical Resonators K. Iga
- 5 Spatial Filters and Fourier Optics F. Yu
- 6 Semiconductor Lasers J. Yang and B. Liang
- 7 Solid-State Lasers J. McMahon
- 8 Liquid Lasers B. Wilhelmi, et al.
- 9 Gas Lasers T. Lehecka, et al.
- 10 Optical Fiber Transmission Technology C. Lin
- 11 Optical Channel Waveguides and Waveguide Couplers T. Findakly
- 12 Planar Waveguide and Waveguide and Applications S. Yao
- 13 Optical Attenuations, Isolators, Circulators, and Polarizers F. Zhou and J. Pan
- 14 Optical Filters for Telecommunication Applications C. Madsen
- 15 Wavelength Division Multiplexers and Demultiplexers J. Capmany and S. Sales
- 16 Wide-Bandwidth Optical Intensity Modulators G. Li and P. Yu
- 17 Optical Modulation: Acousto-Optical Devices C. Tsai
- 18 Optical Modulation: Magneto-Optical Devices A. Craig
- 19 Optical Detectors P. Yu and H. Law
- 20 Acousto-Optical Modulators and Switches S. Yao
- 21 Optical Amplifiers C. Su
