- Preface
- Contributors
- 1 Transmission Lines I. Bahl
- 2 Transmission-Line Discontinuities K. Gupta
- Filters, Hybrids and Couplers, Power Combiners, and Matching Networks I. Bahl
- 4 Cavities and Resonators M. Dydyk
- 5 Ferrite Control Components W. Hord
- 6 Surface Acoustic Wave Devices D. Morgan
- 7 Quasi-Optical Techniques P. Goldsmith, et al.
- 8 Components for Surveillance and Electronic Receivers J. Tsui and C. Krueger
- 9 Antennas I: Fundamentals and Numerical Methods F. Schwering,et al.
- 10 Antennas II: Reflector, Lens, Horns, and Other Microwave Antennas of Conventional Configuration D. Bodnar, et al.
- 11 Antennas III: Array, Millimeter Wave, and Integrated Antennas R. Mailloux,et al.
- 12 Antennas IV: Microstrip Antennas Y. Lo,et al.
- 13 Antennas V: Active Integrated Antennas J. Fredrick and T. Itoh
- 14 Mixers and Detectors E. Kollberg
- 15 Multipliers and Parametric Devices J. Archer and R. Batchelor
- 16 Semiconductor Control Devices: PIN Diodes J. White
- 17 Semiconductor Control Devices: Phase Shifters and Switches A. Sreenivas
- 18 Transferred Electron Devices C. Sun
- 19 IMPATT and Related Transit-Time Devices K. Chang & and H. Kuno
- 20 Microwave Silicon Bipolar Transistors and Monolithic Integrated Circuits C. Snapp
- 21 FETs: Power Applications H. Hung
- 22 FETs: Low-Noise Applications T. Midford
- 23 High-Electron-Mobility Transistors: Principles and Applications J. Zimmermann and G. Salmer
- 24 Heterojunction Bipolar Transistors and Applications J. Yuan
- 25 Oscillators and Frequency Synthesizers U. Rohde
- 26 RF Components V. Nair
- 27 Microwave Superconductors C. Sans and G. Liang
- 28 Microwave MEMS and Micromachining H. De Los Santos,et al.
- Index
