

Table of contents provided by Syndetics

- **List of Symbols** (p. xix)
- **1. Introduction** (p. 1)
- **Learning Objectives** (p. 2)
- **1.1 Historical Perspective** (p. 2)
- **1.2 Materials Science and Engineering** (p. 2)
- **1.3 Why Study Materials Science and Engineering?** (p. 4)
- **1.4 Classification of Materials** (p. 5)
- **1.5 Advanced Materials** (p. 6)
- **1.6 Modern Materials' Needs** (p. 6)
- **References** (p. 7)
- **2. Atomic Structure and Interatomic Bonding** (p. 9)
- **Learning Objectives** (p. 10)
- **2.1 Introduction** (p. 10)
- **Atomic Structure** (p. 10)
- **2.2 Fundamental Concepts** (p. 10)
- **2.3 Electrons in Atoms** (p. 11)
- **2.4 The Periodic Table** (p. 17)
- **Atomic Bonding in Solids** (p. 18)
- **2.5 Bonding Forces and Energies** (p. 18)
- **2.6 Primary Interatomic Bonds** (p. 20)
- **2.7 Secondary Bonding or Van der Waals Bonding** (p. 24)
- **2.8 Molecules** (p. 26)
- **Summary** (p. 27)
- **Important Terms and Concepts** (p. 27)
- **References** (p. 28)
- **Questions and Problems** (p. 28)
- **3. Structures of Metals and Ceramics** (p. 30)
- **Learning Objectives** (p. 31)
- **3.1 Introduction** (p. 31)
- **Crystal Structures** (p. 31)
- **3.2 Fundamental Concepts** (p. 31)
- **3.3 Unit Cells** (p. 32)
- **3.4 Metallic Crystal Structures** (p. 33)
- **3.5 Density Computations--Metals** (p. 37)
- **3.6 Ceramic Crystal Structures** (p. 38)
- **3.7 Density Computations--Ceramics** (p. 45)
- **3.8 Silicate Ceramics** (p. 46)
- **The Silicates (CD-ROM)** (p. S-1)
- **3.9 Carbon** (p. 47)
- **Fullerenes (CD-ROM)** (p. S-3)
- **3.10 Polymorphism and Allotropy** (p. 49)
- **3.11 Crystal Systems** (p. 49)
- **Crystallographic Directions and Planes** (p. 51)
- **3.12 Crystallographic Directions** (p. 51)

- **3.13 Crystallographic Planes** (p. 54)
- **3.14 Linear and Planar Atomic Densities (CD-ROM)** (p. S-4)
- **3.15 Close-Packed Crystal Structures** (p. 58)
- **Crystalline and Noncrystalline Materials** (p. 62)
- **3.16 Single Crystals** (p. 62)
- **3.17 Polycrystalline Materials** (p. 62)
- **3.18 Anisotropy** (p. 63)
- **3.19 X-Ray Diffraction: Determination of Crystal Structures (CD-ROM)** (p. S-6)
- **3.20 Noncrystalline Solids** (p. 64)
- **Summary** (p. 66)
- **Important Terms and Concepts** (p. 67)
- **References** (p. 67)
- **Questions and Problems** (p. 68)
- **4. Polymer Structures** (p. 76)
- **Learning Objectives** (p. 77)
- **4.1 Introduction** (p. 77)
- **4.2 Hydrocarbon Molecules** (p. 77)
- **4.3 Polymer Molecules** (p. 79)
- **4.4 The Chemistry of Polymer Molecules** (p. 80)
- **4.5 Molecular Weight** (p. 82)
- **4.6 Molecular Shape** (p. 87)
- **4.7 Molecular Structure** (p. 88)
- **4.8 Molecular Configurations (CD-ROM)** (p. S-11)
- **4.9 Thermoplastic and Thermosetting Polymers** (p. 90)
- **4.10 Copolymers** (p. 91)
- **4.11 Polymer Crystallinity** (p. 92)
- **4.12 Polymer Crystals** (p. 95)
- **Summary** (p. 97)
- **Important Terms and Concepts** (p. 98)
- **References** (p. 98)
- **Questions and Problems** (p. 99)
- **5. Imperfections in Solids** (p. 102)
- **Learning Objectives** (p. 103)
- **5.1 Introduction** (p. 103)
- **Point Defects** (p. 103)
- **5.2 Point Defects in Metals** (p. 103)
- **5.3 Point Defects in Ceramics** (p. 105)
- **5.4 Impurities in Solids** (p. 107)
- **5.5 Point Defects in Polymers** (p. 110)
- **5.6 Specification of Composition** (p. 110)
- **Composition Conversions (CD-ROM)** (p. S-14)
- **Miscellaneous Imperfections** (p. 111)
- **5.7 Dislocations--Linear Defects** (p. 111)
- **5.8 Interfacial Defects** (p. 115)
- **5.9 Bulk or Volume Defects** (p. 118)
- **5.10 Atomic Vibrations** (p. 118)

- **Microscopic Examination** (p. 118)
- **5.11 General** (p. 118)
- **5.12 Microscopic Techniques (CD-ROM)** (p. S-17)
- **5.13 Grain Size Determination** (p. 119)
- **Summary** (p. 120)
- **Important Terms and Concepts** (p. 121)
- **References** (p. 121)
- **Questions and Problems** (p. 122)
- **6. Diffusion** (p. 126)
- **Learning Objectives** (p. 127)
- **6.1 Introduction** (p. 127)
- **6.2 Diffusion Mechanisms** (p. 127)
- **6.3 Steady-State Diffusion** (p. 130)
- **6.4 Nonsteady-State Diffusion** (p. 132)
- **6.5 Factors That Influence Diffusion** (p. 136)
- **6.6 Other Diffusion Paths** (p. 141)
- **6.7 Diffusion in Ionic and Polymeric Materials** (p. 141)
- **Summary** (p. 142)
- **Important Terms and Concepts** (p. 142)
- **References** (p. 142)
- **Questions and Problems** (p. 143)
- **7. Mechanical Properties** (p. 147)
- **Learning Objectives** (p. 148)
- **7.1 Introduction** (p. 148)
- **7.2 Concepts of Stress and Strain** (p. 149)
- **Elastic Deformation** (p. 153)
- **7.3 Stress-Strain Behavior** (p. 153)
- **7.4 Anelasticity** (p. 157)
- **7.5 Elastic Properties of Materials** (p. 157)
- **Mechanical Behavior--Metals** (p. 160)
- **7.6 Tensile Properties** (p. 160)
- **7.7 True Stress and Strain** (p. 167)
- **7.8 Elastic Recovery During Plastic Deformation** (p. 170)
- **7.9 Compressive, Shear, and Torsional Deformation** (p. 170)
- **Mechanical Behavior--Ceramics** (p. 171)
- **7.10 Flexural Strength** (p. 171)
- **7.11 Elastic Behavior** (p. 173)
- **7.12 Influence of Porosity on the Mechanical Properties of Ceramics (CD-ROM)** (p. S-22)
- **Mechanical Behavior--Polymers** (p. 173)
- **7.13 Stress-Strain Behavior** (p. 173)
- **7.14 Macroscopic Deformation** (p. 175)
- **7.15 Viscoelasticity (CD-ROM)** (p. S-22)
- **Hardness and Other Mechanical Property Considerations** (p. 176)
- **7.16 Hardness** (p. 176)
- **7.17 Hardness of Ceramic Materials** (p. 181)

- **7.18 Tear Strength and Hardness of Polymers** (p. 181)
- **Property Variability and Design/Safety Factors** (p. 183)
- **7.19 Variability of Material Properties** (p. 183)
- **Computation of Average and Standard Deviation Values (CD-ROM)** (p. S-28)
- **7.20 Design/Safety Factors** (p. 183)
- **Summary** (p. 185)
- **Important Terms and Concepts** (p. 186)
- **References** (p. 186)
- **Questions and Problems** (p. 187)
- **8. Deformation and Strengthening Mechanisms** (p. 197)
- **8.2 Historical** (p. 198)
- **Learning Objectives** (p. 198)
- **8.1 Introduction** (p. 198)
- **Deformation Mechanisms for Metals** (p. 198)
- **8.3 Basic Concepts of Dislocations** (p. 199)
- **8.4 Characteristics of Dislocations** (p. 201)
- **8.5 Slip Systems** (p. 203)
- **8.6 Slip in Single Crystals (CD-ROM)** (p. S-31)
- **8.7 Plastic Deformation of Polycrystalline Metals** (p. 204)
- **8.8 Deformation by Twinning (CD-ROM)** (p. S-34)
- **Mechanisms of Strengthening in Metals** (p. 206)
- **8.9 Strengthening by Grain Size Reduction** (p. 206)
- **8.10 Solid-Solution Strengthening** (p. 208)
- **8.11 Strain Hardening** (p. 210)
- **Recovery, Recrystallization, and Grain Growth** (p. 213)
- **8.12 Recovery** (p. 213)
- **8.13 Recrystallization** (p. 213)
- **8.14 Grain Growth** (p. 218)
- **Deformation Mechanisms for Ceramic Materials** (p. 219)
- **8.15 Crystalline Ceramics** (p. 220)
- **8.16 Noncrystalline Ceramics** (p. 220)
- **Mechanisms of Deformation and for Strengthening of Polymers** (p. 221)
- **8.17 Deformation of Semicrystalline Polymers** (p. 221)
- **8.18a Factors That Influence the Mechanical Properties of Semicrystalline Polymers [Detailed Version (CD-ROM)]** (p. S-35)
- **8.18b Factors That Influence the Mechanical Properties of Semicrystalline Polymers (Concise Version)** (p. 223)
- **8.19 Deformation of Elastomers** (p. 224)
- **Summary** (p. 227)
- **Important Terms and Concepts** (p. 228)
- **References** (p. 228)
- **Questions and Problems** (p. 228)
- **9. Failure** (p. 234)
- **Learning Objectives** (p. 235)
- **9.1 Introduction** (p. 235)
- **Fracture** (p. 235)

- **9.2 Fundamentals of Fracture** (p. 235)
- **9.3 Ductile Fracture** (p. 236)
- **Fractographic Studies (CD-ROM)** (p. S-38)
- **9.4 Brittle Fracture** (p. 238)
- **9.5a Principles of Fracture Mechanics [Detailed Version (CD-ROM)]** (p. S-38)
- **9.5b Principles of Fracture Mechanics (Concise Version)** (p. 238)
- **9.6 Brittle Fracture of Ceramics** (p. 248)
- **Static Fatigue (CD-ROM)** (p. S-53)
- **9.7 Fracture of Polymers** (p. 249)
- **9.8 Impact Fracture Testing** (p. 250)
- **Fatigue** (p. 255)
- **9.9 Cyclic Stresses** (p. 255)
- **9.10 The S-N Curve** (p. 257)
- **9.11 Fatigue in Polymeric Materials** (p. 260)
- **9.12a Crack Initiation and Propagation [Detailed Version (CD-ROM)]** (p. S-54)
- **9.12b Crack Initiation and Propagation (Concise Version)** (p. 260)
- **9.13 Crack Propagation Rate (CD-ROM)** (p. S-57)
- **9.14 Factors That Affect Fatigue Life** (p. 263)
- **9.15 Environmental Effects (CD-ROM)** (p. S-62)
- **Creep** (p. 265)
- **9.16 Generalized Creep Behavior** (p. 266)
- **9.17a Stress and Temperature Effects [Detailed Version (CD-ROM)]** (p. S-63)
- **9.17b Stress and Temperature Effects (Concise Version)** (p. 267)
- **9.18 Data Extrapolation Methods (CD-ROM)** (p. S-65)
- **9.19 Alloys for High-Temperature Use** (p. 268)
- **9.20 Creep in Ceramic and Polymeric Materials** (p. 269)
- **Summary** (p. 269)
- **Important Terms and Concepts** (p. 272)
- **References** (p. 272)
- **Questions and Problems** (p. 273)
- **10. Phase Diagrams** (p. 281)
- **Learning Objectives** (p. 282)
- **10.1 Introduction** (p. 282)
- **Definitions and Basic Concepts** (p. 282)
- **10.2 Solubility Limit** (p. 283)
- **10.3 Phases** (p. 283)
- **10.4 Microstructure** (p. 284)
- **10.5 Phase Equilibria** (p. 284)
- **Equilibrium Phase Diagrams** (p. 285)
- **10.6 Binary Isomorphous Systems** (p. 286)
- **10.7 Interpretation of Phase Diagrams** (p. 288)
- **10.8 Development of Microstructure in Isomorphous Alloys (CD-ROM)** (p. S-67)
- **10.9 Mechanical Properties of Isomorphous Alloys** (p. 292)
- **10.10 Binary Eutectic Systems** (p. 292)
- **10.11 Development of Microstructure in Eutectic Alloys (CD-ROM)** (p. S-70)
- **10.12 Equilibrium Diagrams Having Intermediate Phases or Compounds** (p. 297)

- **10.13 Eutectoid and Peritectic Reactions** (p. 298)
- **10.14 Congruent Phase Transformations** (p. 301)
- **10.15 Ceramic Phase Diagrams (CD-ROM)** (p. S-77)
- **10.16 Ternary Phase Diagrams** (p. 301)
- **10.17 The Gibbs Phase Rule (CD-ROM)** (p. S-81)
- **The Iron-Carbon System** (p. 302)
- **10.18 The Iron-Iron Carbide (Fe-Fe₃C) Phase Diagram** (p. 302)
- **10.19 Development of Microstructures in Iron-Carbon Alloys** (p. 305)
- **10.20 The Influence of Other Alloying Elements (CD-ROM)** (p. S-83)
- **Summary** (p. 313)
- **Important Terms and Concepts** (p. 314)
- **References** (p. 314)
- **Questions and Problems** (p. 315)
- **11. Phase Transformations** (p. 323)
- **Learning Objectives** (p. 324)
- **11.3 The Kinetics of Solid-State Reactions** (p. 325)
- **11.1 Introduction** (p. 324)
- **Phase Transformations in Metals** (p. 324)
- **11.2 Basic Concepts** (p. 325)
- **11.4 Multiphase Transformations** (p. 327)
- **Microstructural and Property Changes in Iron-Carbon Alloys** (p. 327)
- **11.5 Isothermal Transformation Diagrams** (p. 328)
- **11.6 Continuous Cooling Transformation Diagrams (CD-ROM)** (p. S-85)
- **11.7 Mechanical Behavior of Iron-Carbon Alloys** (p. 339)
- **11.8 Tempered Martensite** (p. 344)
- **11.9 Review of Phase Transformations for Iron-Carbon Alloys** (p. 346)
- **Precipitation Hardening** (p. 347)
- **11.10 Heat Treatments** (p. 347)
- **11.11 Mechanism of Hardening** (p. 349)
- **11.12 Miscellaneous Considerations** (p. 351)
- **Crystallization, Melting, and Glass Transition Phenomena in Polymers** (p. 352)
- **11.13 Crystallization** (p. 353)
- **11.14 Melting** (p. 354)
- **11.15 The Glass Transition** (p. 354)
- **11.16 Melting and Glass Transition Temperatures** (p. 354)
- **11.17 Factors That Influence Melting and Glass Transition Temperatures (CD-ROM)** (p. S-87)
- **Summary** (p. 356)
- **Important Terms and Concepts** (p. 357)
- **References** (p. 357)
- **Questions and Problems** (p. 358)
- **12. Electrical Properties** (p. 365)
- **Learning Objectives** (p. 366)
- **12.1 Introduction** (p. 366)
- **Electrical Conduction** (p. 366)
- **12.2 Ohm's Law** (p. 366)

- **12.3 Electrical Conductivity** (p. 367)
- **12.4 Electronic and Ionic Conduction** (p. 368)
- **12.5 Energy Band Structures in Solids** (p. 368)
- **12.6 Conduction in Terms of Band and Atomic Bonding Models** (p. 371)
- **12.7 Electron Mobility** (p. 372)
- **12.8 Electrical Resistivity of Metals** (p. 373)
- **12.9 Electrical Characteristics of Commercial Alloys** (p. 376)
- **Semiconductivity** (p. 376)
- **12.10 Intrinsic Semiconduction** (p. 377)
- **12.11 Extrinsic Semiconduction** (p. 379)
- **12.12 The Temperature Variation of Conductivity and Carrier Concentration** (p. 383)
- **12.13 The Hall Effect (CD-ROM)** (p. S-91)
- **12.14 Semiconductor Devices (CD-ROM)** (p. S-93)
- **Electrical Conduction in Ionic Ceramics and in Polymers** (p. 389)
- **12.15 Conduction in Ionic Materials** (p. 389)
- **12.16 Electrical Properties of Polymers** (p. 390)
- **Dielectric Behavior** (p. 391)
- **12.17 Capacitance (CD-ROM)** (p. S-99)
- **12.18 Field Vectors and Polarization (CD-ROM)** (p. S-101)
- **12.19 Types of Polarization (CD-ROM)** (p. S-105)
- **12.20 Frequency Dependence of the Dielectric Constant (CD-ROM)** (p. S-106)
- **12.21 Dielectric Strength (CD-ROM)** (p. S-107)
- **12.22 Dielectric Materials (CD-ROM)** (p. S-107)
- **Other Electrical Characteristics of Materials** (p. 391)
- **12.23 Ferroelectricity (CD-ROM)** (p. S-108)
- **12.24 Piezoelectricity (CD-ROM)** (p. S-109)
- **Summary** (p. 391)
- **Important Terms and Concepts** (p. 393)
- **References** (p. 393)
- **Questions and Problems** (p. 394)
- **13. Types and Applications of Materials** (p. 401)
- **Learning Objectives** (p. 402)
- **13.1 Introduction** (p. 402)
- **Types of Metal Alloys** (p. 402)
- **13.2 Ferrous Alloys** (p. 402)
- **13.3 Nonferrous Alloys** (p. 414)
