

- Chapter 1 Introduction to Statics p. 3
- 1/1 Mechanics p. 3
- 1/2 Basic Concepts p. 4
- 1/3 Scalars and Vectors p. 5
- Conventions for Equations and Diagrams p. 5
- Working with Vectors p. 6
- 1/4 Newton's Laws p. 8
- 1/5 Units p. 9
- SI Units p. 9
- U.S. Customary Units p. 9
- Primary Standards p. 10
- Unit Conversions p. 11
- 1/6 Law of Gravitation p. 12
- Gravitational Attraction of the Earth p. 12
- 1/7 Accuracy, Limits, and Approximations p. 13
- Differentials p. 14
- Small-Angle Approximations p. 14
- 1/8 Problem Solving in Statics p. 15
- Making the Appropriate Assumptions p. 15
- Using Graphics p. 15
- Formulating Problems and Obtaining Solutions p. 16
- The Free-Body Diagram p. 16
- Numerical Values versus Symbols p. 17
- Solution Methods p. 17
- Chapter Review p. 18
- Chapter 2 Force Systems p. 23
- 2/1 Introduction p. 23
- 2/2 Force p. 23
- External and Internal Effects p. 24
- Principle of Transmissibility p. 24
- Force Classification p. 24
- Action and Reaction p. 25
- Concurrent Forces p. 25
- Vector Components p. 26
- A Special Case of Vector Addition p. 26
- Section A. Two-Dimensional Force Systems p. 27
- 2/3 Rectangular Components p. 27
- Conventions for Describing Vector Components p. 27
- Determining the Components of a Force p. 28
- 2/4 Moment p. 37
- Moment about a Point p. 37
- The Cross Product p. 38
- Varignon's Theorem p. 38
- 2/5 Couple p. 48
- Vector Algebra Method p. 48
- Equivalent Couples p. 48

- Force-Couple Systems p. 49
- 2/6 Resultants p. 56
- Algebraic Method p. 56
- Principle of Moments p. 57
- Section B. Three-Dimensional Force Systems p. 64
- 2/7 Rectangular Components p. 64
- Dot Product p. 65
- Angle between Two Vectors p. 66
- 2/8 Moment and Couple p. 73
- Moments in Three Dimensions p. 73
- Evaluating the Cross Product p. 73
- Moment about an Arbitrary Axis p. 74
- Varignon's Theorem in Three Dimensions p. 74
- Couples in Three Dimensions p. 75
- 2/9 Resultants p. 85
- Chapter Review p. 95
- Chapter 3 Equilibrium p. 103
- 3/1 Introduction p. 103
- Section A. Equilibrium in Two Dimensions p. 104
- 3/2 System Isolation and the Free-Body Diagram p. 104
- Modeling the Action of Forces p. 105
- Construction of Free-Body Diagrams p. 108
- Examples of Free-Body Diagrams p. 109
- 3/3 Equilibrium Conditions p. 115
- Categories of Equilibrium p. 115
- Two- and Three-Force Members p. 116
- Alternative Equilibrium Equations p. 117
- Constraints and Statical Determinacy p. 118
- Adequacy of Constraints p. 119
- Approach to Solving Problems p. 120
- Section B. Equilibrium in Three Dimensions p. 138
- 3/4 Equilibrium Conditions p. 138
- Free-Body Diagrams p. 139
- Categories of Equilibrium p. 139
- Constraints and Statical Determinacy p. 141
- Chapter Review p. 156
- Chapter 4 Structures p. 165
- 4/1 Introduction p. 165
- 4/2 Plane Trusses p. 167
- Simple Trusses p. 167
- Truss Connections and Supports p. 168
- 4/3 Method of Joints p. 168
- Internal and External Redundancy p. 170
- Special Conditions p. 170
- 4/4 Method of Sections p. 179
- Illustration of the Method p. 179

- Additional Considerations p. 180
- 4/5 Space Trusses p. 188
- Statically Determinate Space Trusses p. 188
- Method of Joints for Space Trusses p. 189
- Method of Sections for Space Trusses p. 189
- 4/6 Frames and Machines p. 195
- Interconnected Rigid Bodies with Multiforce Members p. 195
- Force Representation and Free-Body Diagrams p. 196
- Chapter Review p. 215
- Chapter 5 Distributed Forces p. 225
- 5/1 Introduction p. 225
- Section A. Centers of Mass and Centroids p. 227
- 5/2 Center of Mass p. 227
- Determining the Center of Gravity p. 227
- Center of Mass versus Center of Gravity p. 229
- 5/3 Centroids of Lines, Areas, and Volumes p. 230
- Choice of Element for Integration p. 231
- 5/4 Composite Bodies and Figures; Approximations p. 246
- An Approximation Method p. 246
- Irregular Volumes p. 247
- 5/5 Theorems of Pappus p. 256
- Section B. Special Topics p. 264
- 5/6 Beams-External Effects p. 264
- Types of Beams p. 264
- Distributed Loads p. 265
- 5/7 Beams-Internal Effects p. 271
- Shear, Bending, and Torsion p. 271
- Shear-Force and Bending-Moment Diagrams p. 272
- General Loading, Shear, and Moment Relationships p. 272
- 5/8 Flexible Cables p. 283
- General Relationships p. 283
- Parabolic Cable p. 285
- Catenary Cable p. 287
- 5/9 Fluid Statics p. 297
- Fluid Pressure p. 297
- Hydrostatic Pressure on Submerged Rectangular Surfaces p. 298
- Hydrostatic Pressure on Cylindrical Surfaces p. 300
- Hydrostatic Pressure on Flat Surfaces of Any Shape p. 301
- Buoyancy p. 302
- Chapter Review p. 316
- Chapter 6 Friction p. 327
- 6/1 Introduction p. 327
- Section A. Frictional Phenomena p. 328
- 6/2 Types of Friction p. 328
- 6/3 Dry Friction p. 329
- Mechanism of Dry Friction p. 329

- Static Friction p. 330
- Kinetic Friction p. 330
- Friction Angles p. 331
- Factors Affecting Friction p. 332
- Types of Friction Problems p. 333
- Section B. Applications of Friction in Machines p. 348
- 6/4 Wedges p. 348
- 6/5 Screws p. 349
- Force Analysis p. 350
- Conditions for Unwinding p. 351
- 6/6 Journal Bearings p. 359
- 6/7 Thrust Bearings; Disk Friction p. 360
- 6/8 Flexible Belts p. 368
- 6/9 Rolling Resistance p. 369
- Chapter Review p. 376
- Chapter 7 Virtual Work p. 385
- 7/1 Introduction p. 385
- 7/2 Work p. 385
- Work of a Force p. 386
- Work of a Couple p. 387
- Dimensions of Work p. 388
- Virtual Work p. 388
- 7/3 Equilibrium p. 389
- Equilibrium of a Particle p. 389
- Equilibrium of a Rigid Body p. 389
- Equilibrium of Ideal Systems of Rigid Bodies p. 390
- Principle of Virtual Work p. 391
- Degrees of Freedom p. 392
- Systems with Friction p. 392
- Mechanical Efficiency p. 393
- 7/4 Potential Energy and Stability p. 405
- Elastic Potential Energy p. 405
- Gravitational Potential Energy p. 406
- Energy Equation p. 407
- Active-Force Diagrams p. 407
- Principle of Virtual Work p. 408
- Stability of Equilibrium p. 409
- Chapter Review p. 420
- Appendices
- Appendix A Area Moments of Inertia p. 427
- A/1 Introduction p. 427
- A/2 Definitions p. 428
- Rectangular and Polar Moments of Inertia p. 428
- Radius of Gyration p. 429
- Transfer of Axes p. 430
- A/3 Composite Areas p. 442

- A/4 Products of Inertia and Rotation of Axes p. 449
- Definition p. 449
- Transfer of Axes p. 449
- Rotation of Axes p. 450
- Mohr's Circle of Inertia p. 451
- Appendix B Mass Moments of Inertia p. 463
- Appendix C Selected Topics of Mathematics p. 465
- C/1 Introduction p. 465
- C/2 Plane Geometry p. 465
- C/3 Solid Geometry p. 466
- C/4 Algebra p. 466
- C/5 Analytic Geometry p. 467
- C/6 Trigonometry p. 467
- C/7 Vector Operations p. 468
- C/8 Series p. 471
- C/9 Derivatives p. 471
- C/10 Integrals p. 472
- C/11 Newton's Method for Solving Intractable Equations p. 475
- C/12 Selected Techniques for Numerical Integration p. 477
- Appendix D Useful Tables p. 481
- Table D/1 Physical Properties p. 481
- Table D/2 Solar System Constants p. 482
- Table D/3 Properties of Plane Figures p. 483
- Table D/4 Properties of Homogeneous Solids p. 485
- Photo Credits p. 489
- Index p. 490
