

- Preface p. ix
- Acknowledgements p. xiii
- 1. Introduction p. 1
- 1.1 Microwave Transmission Lines p. 4
- 2. Communication Systems p. 9
- 2.1 Terrestrial Communication p. 10
- 2.2 Satellite Communication p. 11
- 2.3 Radio Frequency Wireless Services p. 14
- 2.4 Antenna Systems p. 17
- 2.5 Noise and Distortion p. 34
- Suggested Reading p. 53
- Problems p. 53
- 3. Transmission Lines p. 57
- 3.1 Distributed Circuit Analysis of Transmission Lines p. 57
- 3.2 Sending End Impedance p. 68
- 3.3 Standing Wave and Standing Wave Ratio p. 81
- 3.4 Smith Chart p. 84
- Suggested Reading p. 97
- Problems p. 98
- 4. Resonant Circuits p. 105
- 4.1 Series Resonant Circuits p. 105
- 4.2 Parallel Resonant Circuits p. 115
- 4.3 Transformer-Coupled Circuits p. 119
- 4.4 Transmission Line Resonant Circuits p. 126
- 4.5 Microwave Resonators p. 134
- Suggested Reading p. 141
- Problems p. 142
- 5. Impedance Matching Networks p. 146
- 5.1 Single Reactive Element or Stub Matching p. 147
- 5.2 Double-Stub Matching p. 159
- 5.3 Matching Networks Using Lumped Elements p. 164
- Suggested Reading p. 183
- Problems p. 183
- 6. Impedance Transformers p. 189
- 6.1 Single-Section Quarter-Wave Transformers p. 190
- 6.2 Multisection Quarter-Wave Transformers p. 192
- 6.3 Transformer with Uniformly Distributed Section Reflection Coefficients p. 195
- 6.4 Binomial Transformers p. 200
- 6.5 Chebyshev Transformers p. 205
- 6.6 Exact Formulation and Design of Multisection Impedance Transformers p. 212
- 6.7 Tapered Transmission Lines p. 221
- 6.8 Synthesis of Transmission Line Tapers p. 228
- 6.9 Bode-Fano Constraints for Lossless Matching Networks p. 237
- Suggested Reading p. 240

- Problems p. 241
- 7. Two-Port Networks p. 243
 - 7.1 Impedance Parameters p. 244
 - 7.2 Admittance Parameters p. 249
 - 7.3 Hybrid Parameters p. 256
 - 7.4 Transmission Parameters p. 259
 - 7.5 Conversion of the Impedance, Admittance, Chain, and Hybrid Parameters p. 266
 - 7.6 Scattering Parameters p. 267
 - 7.7 Conversion From Impedance, Admittance, Chain, and Hybrid Parameters to Scattering Parameters or Vice Versa p. 286
 - 7.8 Chain Scattering Parameters p. 287
 - Suggested Reading p. 289
 - Problems p. 289
- 8. Filter Design p. 295
 - 8.1 Image Parameter Method p. 296
 - 8.2 Insertion Loss Method p. 314
 - 8.3 Microwave Filters p. 342
 - Suggested Reading p. 352
 - Problems p. 352
- 9. Signal-Flow Graphs and Applications p. 354
 - 9.1 Definitions and Manipulation of Signal-Flow Graphs p. 358
 - 9.2 Signal-Flow Graph Representation of a Voltage Source p. 363
 - 9.3 Signal-Flow Graph Representation of a Passive Single-Port Device p. 364
 - 9.4 Power Gain Equations p. 373
 - Suggested Reading p. 381
 - Problems p. 381
- 10. Transistor Amplifier Design p. 385
 - 10.1 Stability Considerations p. 385
 - 10.2 Amplifier Design for Maximum Gain p. 393
 - 10.3 Constant Gain Circles p. 404
 - 10.4 Constant Noise Figure Circles p. 424
 - 10.5 Broadband Amplifiers p. 434
 - 10.6 Small-Signal Equivalent Circuit Models of Transistors p. 438
 - 10.7 DC Bias Circuits for Transistors p. 440
 - Suggested Reading p. 445
 - Problems p. 445
- 11. Oscillator Design p. 449
 - 11.1 Feedback and Basic Concepts p. 449
 - 11.2 Crystal Oscillators p. 460
 - 11.3 Electronic Tuning of Oscillators p. 463
 - 11.4 Phase-Locked Loop p. 465
 - 11.5 Frequency Synthesizers p. 485
 - 11.6 One-Port Negative Resistance Oscillators p. 489
 - 11.7 Microwave Transistor Oscillators p. 492

- Suggested Reading p. 508
- Problems p. 509
- 12. Detectors and Mixers p. 513
- 12.1 Amplitude Modulation p. 514
- 12.2 Frequency Modulation p. 525
- 12.3 Switching-Type Mixers p. 531
- 12.4 Conversion Loss p. 537
- 12.5 Intermodulation Distortion in Diode-Ring Mixers p. 539
- 12.6 FET Mixers p. 543
- Suggested Reading p. 548
- Problems p. 548
- Appendix 1. Decibels and Neper p. 551
- Appendix 2. Characteristics of Selected Transmission Lines p. 553
- Appendix 3. Specifications of Selected Coaxial Lines and Waveguides p. 560
- Appendix 4. Some Mathematical Formulas p. 563
- Appendix 5. Properties of Some Materials p. 566
- Appendix 6. Common Abbreviations p. 567
- Appendix 7. Physical Constants p. 572
- Index p. 573
