

- Preface p. xiii
- 1. Light and Blackbody Emission p. 1
  - 1.1 Emission of Thermal Light p. 1
  - 1.2 Electromagnetic Spectrum p. 2
  - 1.3 Blackbody Radiation and the Stefan-Boltzmann Law p. 2
  - 1.4 Wein's Law p. 4
  - 1.5 Cavity Radiation and Cavity Modes p. 6
  - 1.6 Quantum Nature of Light p. 9
  - 1.7 Electromagnetic Spectrum Revisited p. 10
  - 1.8 Absorption and Emission Processes p. 10
  - 1.9 Boltzmann Distribution and Thermal Equilibrium p. 13
  - 1.10 Quantum View of Blackbody Radiation p. 14
  - 1.11 Blackbodies at Various Temperatures p. 15
  - 1.12 Applications p. 17
  - 1.13 Absorption and Color p. 18
  - 1.14 Efficiency of Light Sources p. 18
  - Problems p. 19
- 2. Atomic Emission p. 21
  - 2.1 Line Spectra p. 21
  - 2.2 Spectroscope p. 22
  - 2.3 Einstein and Planck:  $E = h\nu$  p. 26
  - 2.4 Photoelectric Effect p. 27
  - 2.5 Atomic Models and Light Emission p. 28
  - 2.6 Franck-Hertz Experiment p. 31
  - 2.7 Spontaneous Emission and Level Lifetime p. 34
  - 2.8 Fluorescence p. 35
  - 2.9 Semiconductor Devices p. 37
  - 2.10 Light-Emitting Diodes p. 44
  - Problems p. 48
- 3. Quantum Mechanics p. 49
  - 3.1 Limitations of the Bohr Model p. 50
  - 3.2 Wave Properties of Particles (Duality) p. 50
  - 3.3 Evidence of Wave Properties in Electrons p. 52
  - 3.4 Wavefunctions and the Particle-in-a-Box Model p. 53
  - 3.5 Reconciling Classical and Quantum Mechanics p. 55
  - 3.6 Angular Momentum in Quantum States p. 56
  - 3.7 Spectroscopic Notation and Electron Configuration p. 57
  - 3.8 Energy Levels Described by Orbital Angular Momentum p. 60
  - 3.9 Magnetic Quantum Numbers p. 62
  - 3.10 Direct Evidence of Momentum: The Stern-Gerlach Experiment p. 63
  - 3.11 Electron Spin p. 65
  - 3.12 Summary of Quantum Numbers p. 67
  - 3.13 Example of Quantum Numbers: The Sodium Spectrum p. 69
  - 3.14 Multiple Electrons: The Mercury Spectrum p. 71

- 3.15 Energy Levels and Transitions in Gas Lasers p. 72
- 4. Lasing Processes p. 83
- 3.16 Molecular Energy Levels p. 73
- 3.17 Infrared Spectroscopy Applications p. 77
- Problems p. 79
- 4.1 Characteristics of Coherent Light p. 84
- 4.2 Boltzmann Distribution and Thermal Equilibrium p. 86
- 4.3 Creating an Inversion p. 87
- 4.4 Stimulated Emission p. 90
- 4.5 Rate Equations and Criteria for Lasing p. 92
- 4.6 Laser Gain p. 98
- 4.7 Linewidth p. 101
- 4.8 Thresholds for Lasing p. 104
- 4.9 Calculating Threshold Gain p. 106
- Problems p. 113
- 5. Lasing Transitions and Gain p. 117
- 5.1 Selective Pumping p. 117
- 5.2 Three- and Four-Level Lasers p. 119
- 5.3 CW Lasing Action p. 124
- 5.4 Thermal Population Effects p. 127
- 5.5 Depopulation of Lower Energy Levels in Four-Level Lasers p. 128
- 5.6 Rate Equation Analysis for Atomic Transitions p. 130
- 5.7 Rate Equation Analysis for Three- and Four-Level Lasers p. 136
- 5.8 Gain Revisited p. 143
- 5.9 Saturation p. 146
- 5.10 Required Pump Power and Efficiency p. 149
- 5.11 Output Power p. 154
- Problems p. 156
- 6. Cavity Optics p. 159
- 6.1 Requirements for a Resonator p. 159
- 6.2 Gain and Loss in a Cavity p. 160
- 6.3 Resonator as an Interferometer p. 162
- 6.4 Longitudinal Modes p. 164
- 6.5 Wavelength Selection in Multiline Lasers p. 166
- 6.6 Single-Frequency Operation p. 169
- 6.7 Characterization of a Resonator p. 174
- 6.8 Gaussian Beam p. 176
- 6.9 Resonator Stability p. 178
- 6.10 Common Cavity Configurations p. 180
- 6.11 Spatial Energy Distributions: Transverse Modes p. 185
- 6.12 Limiting Modes p. 186
- 6.13 Resonator Alignment: A Practical Approach p. 187
- Problems p. 190
- 7. Fast-Pulse Production p. 193

- 7.1 Concept of Q-Switching p. 193
- 7.2 Intracavity Switches p. 195
- 7.3 Energy Storage in Laser Media p. 196
- 7.4 Pulse Power and Energy p. 198
- 7.5 Electrooptic Modulators p. 202
- 7.6 Acoustooptic Modulators p. 206
- 7.7 Cavity Dumping p. 211
- 7.8 Modelocking p. 212
- 7.9 Modelocking in the Frequency Domain p. 215
- Problems p. 217
- 8. Nonlinear Optics p. 219
- 8.1 Linear and Nonlinear Phenomena p. 219
- 8.2 Phase Matching p. 223
- 8.3 Nonlinear Materials p. 227
- 8.4 SHG Efficiency p. 229
- 8.5 Sum and Difference Optical Mixing p. 230
- 8.6 Higher-Order Nonlinear Effects p. 231
- 8.7 Optical Parametric Oscillators p. 232
- Problems p. 233
- 9. Visible Gas Lasers p. 235
- 9.1 Helium-Neon Lasers p. 235
- 9.2 Lasing Medium p. 236
- 9.3 Optics and Cavities p. 237
- 9.4 Laser Structure p. 239
- 9.8 Ion Lasers p. 247
- 9.5 HeNe Power Supplies p. 241
- 9.6 Output Characteristics p. 245
- 9.7 Applications p. 246
- 9.9 Lasing Medium p. 247
- 9.10 Optics and Cavities p. 251
- 9.11 Laser Structure p. 252
- 9.12 Power Supplies p. 256
- 9.13 Output Characteristics p. 258
- 9.14 Applications and Operation p. 259
- 10. UV Gas Lasers p. 261
- 10.1 Nitrogen Lasers p. 261
- 10.2 Lasing Medium p. 262
- 10.3 Gain and Optics p. 264
- 10.4 Nitrogen Laser Structure p. 265
- 10.5 Output Characteristics p. 269
- 10.6 Applications and Practical Units p. 269
- 10.7 Excimer Lasers p. 270
- 10.8 Lasing Medium p. 271
- 10.9 Gain and Optics p. 274

- 10.10 Excimer Laser Structure p. 274
- 10.11 Applications p. 277
- 10.12 Practical and Commercial Units p. 278
- 11. Infrared Gas Lasers p. 283
- 11.1 Carbon Dioxide Lasers p. 283
- 11.2 Lasing Medium p. 283
- 11.3 Optics and Cavities p. 285
- 11.4 Structure of a Longitudinal CO<sub>2</sub> Laser p. 286
- 11.5 Structure of a Transverse CO<sub>2</sub> Laser p. 289
- 11.6 Alternative Structures p. 290
- 11.7 Power Supplies p. 290
- 11.8 Output Characteristics p. 292
- 11.9 Applications p. 292
- 11.10 Far-IR Lasers p. 293
- 12. Solid-State Lasers p. 295
- 12.1 Ruby Lasers p. 295
- 12.2 Lasing Medium p. 296
- 12.3 Optics and Cavities p. 297
- 12.4 Laser Structure p. 298
- 12.5 Power Supplies p. 299
- 12.6 Output Characteristics p. 300
- 12.7 Applications p. 301
- 12.8 YAG (Neodymium) Lasers p. 301
- 12.9 Lasing Medium p. 302
- 12.10 Optics and Cavities p. 302
- 12.11 Laser Structure p. 303
- 12.12 Power Supplies p. 306
- 12.13 Applications, Safety, and Maintenance p. 308
- 12.14 Fiber Amplifiers p. 309
- 13.3 Optics p. 319
- 13. Semiconductor Lasers p. 313
- 13.1 Lasing Medium p. 313
- 13.2 Laser Structure p. 315
- 13.4 Power Supplies p. 320
- 13.5 Output Characteristics p. 321
- 13.6 Applications p. 324
- 14. Tunable Dye Lasers p. 327
- 14.1 Lasing Medium p. 327
- 14.2 Laser Structure p. 330
- 14.3 Optics and Cavities p. 334
- 14.4 Output Characteristics p. 334
- 14.5 Applications p. 335
- Index p. 337
