

- Preface p. xvii
- 1 Concepts and Skills in Environmental Chemistry p. 1
- 1.1 Introduction p. 1
- 1.2 The Importance of Units p. 1
- 1.2.1 Conversions between units p. 3
- 1.3 Relative Atomic Mass p. 3
- 1.4 The Mole p. 5
- 1.5 Relative Molecular Mass p. 5
- 1.6 Molar Mass p. 5
- 1.7 Chemical Reactions and Equations p. 6
- 1.7.1 Balancing chemical equations p. 8
- 1.8 Stoichiometry p. 10
- 1.9 Types of Reactions p. 12
- 1.9.1 Acid--base reactions p. 12
- 1.9.2 Oxidation--reduction reactions p. 12
- 1.9.3 Precipitate formation p. 13
- 1.9.4 Complex formation p. 13
- 1.10 Solutions p. 14
- 1.10.1 Molar solutions p. 14
- 1.10.2 Standard solutions p. 15
- 1.10.3 Preparation of standard solutions p. 15
- 1.11 Weighing Chemicals p. 16
- 1.12 Diluting Samples and Standards p. 17
- 1.13 Performing a Titration p. 19
- 1.14 Calibration Procedures p. 20
- 1.15 Blank Determinations p. 22
- 1.16 Precision and Accuracy p. 22
- 1.17 Errors p. 23
- 1.18 Sensitivity p. 24
- 1.19 Detection Limits p. 25
- 1.20 Significant Figures and Rounding p. 25
- 1.21 Summary p. 27
- Self-Study Exercises p. 27
- Challenging Exercises p. 33
- 2 Laboratories for Environmental Chemistry p. 35
- 2.1 Introduction p. 35
- 2.2 A Typical Laboratory for Environmental Chemistry p. 36
- 2.3 Laboratory Equipment p. 39
- 2.4 Health and Safety in the Laboratory p. 39
- 2.4.1 Introduction p. 39
- 2.4.2 Laboratory safety p. 43
- 2.5 Laboratory Technicians p. 48
- 2.6 Emergency First Aid p. 48
- 2.7 The Laboratory Notebook p. 49
- 2.7.1 The purpose of your notebook p. 50
- 2.7.2 Keeping your laboratory notebook p. 50

- 2.8 Summary p. 53
- Self-Study Exercises p. 53
- Challenging Exercises p. 54
- 3 Laboratory Report Writing p. 57
- 3.1 Introduction p. 57
- 3.2 Effective Scientific Writing p. 58
- 3.3 Grammar and Style p. 59
- 3.4 Presentation and Format p. 59
- 3.5 Units, Symbols and Quantities p. 60
- 3.6 Scientific Nomenclature p. 60
- 3.7 Pagination p. 60
- 3.8 Structure of the Laboratory Report p. 60
- 3.8.1 Aims and objectives of the experiment p. 61
- 3.8.2 General introduction p. 61
- 3.8.3 Materials and methods p. 62
- 3.8.4 Reporting results p. 73
- 3.8.5 General discussion p. 74
- 3.8.6 Conclusions p. 74
- 3.8.7 References p. 74
- 3.9 Plagiarism p. 76
- 3.10 Deadlines p. 77
- 3.11 Summary p. 77
- Self-Study Exercises p. 77
- Challenging Exercises p. 78
- References p. 79
- 4 The Structure and Composition of the Earth
- 4.1 Introduction p. 81
- 4.2 Structure of the Earth p. 82
- 4.2.1 The solid material (The internal structure of the earth) p. 82
- 4.2.2 The hydrosphere p. 86
- 4.2.3 The atmosphere p. 86
- 4.2.4 Air pollutants p. 89
- 4.2.5 The biosphere p. 91
- 4.3 Chemical Bonds p. 91
- 4.3.1 Ionic bonding p. 93
- 4.3.2 Covalent bonding p. 95
- 4.3.3 Complex ions p. 98
- 4.3.4 Metallic bonding p. 99
- 4.4 Electronegativity p. 100
- 4.5 The Shapes of Molecules and Ions p. 101
- 4.6 The Structures of Metallic Crystals p. 105
- 4.7 The Structures of Ionic Crystals p. 108
- 4.8 Bonding in Silicates, Aluminates and Aluminosilicates p. 109
- 4.9 Isomorphism and Polymorphism p. 111
- 4.10 Classification of Silicate Structures p. 112
- 4.10.1 Orthosilicates p. 112

- 4.10.2 Disilicates p. 114
- 4.10.3 Ring structures (meta-silicates or cyclosilicates) p. 115
- 4.10.4 Single chains of indefinite extent (pyroxenes or chain silicates) p. 115
- 4.10.5 Double chains of indefinite extent (amphiboles or band silicates) p. 117
- 4.10.6 Layer or sheet silicate structures (phyllosilicates) p. 118
- 4.10.7 Framework silicates (tektosilicates) p. 122
- 4.11 Ion-Exchange Processes in Clay Minerals and Soil p. 123
- 4.12 Weathering Processes p. 125
- 4.12.1 Physical (or mechanical) weathering p. 125
- 4.12.2 Chemical weathering p. 126
- 4.12.3 Chemical weathering mechanisms p. 126
- 4.13 The Composition and Properties of Soil p. 130
- 4.13.1 Soil solutions p. 133
- 4.13.2 Soil erosion p. 134
- 4.13.3 Soil fertility p. 134
- 4.13.4 Soil contamination p. 135
- 4.14 Summary p. 136
- Experiment 4.1 Determination of Soil pH p. 136
- Experiment 4.2 Determination of the Organic Matter Content of Soil p. 139
- Experiment 4.3 Study of the Cation Exchange Capacity of Soil p. 146
- Self-Study Exercises p. 151
- Challenging Exercises p. 155
- Further Sources of Information p. 156
- 5 Earth's Vital Resources--Minerals, Metals and Fossil Fuels p. 159
- 5.1 Introduction p. 159
- 5.2 Mineral, Metal and Fuel Resources p. 161
- 5.3 The Chemistry of Metal Ore Formation p. 163
- 5.3.1 Cooling and heating processes p. 163
- 5.3.2 Weathering processes p. 164
- 5.3.3 Oxidation and reduction processes p. 164
- 5.4 The Chemistry of Metal Extraction Processes p. 165
- 5.4.1 Chemical reduction p. 171
- 5.5 Extraction Technology for Selected Metals p. 176
- 5.5.1 Extraction of s-block metals p. 176
- 5.5.2 Extraction of d-block elements p. 179
- 5.5.3 Extraction of aluminium p. 185
- 5.5.4 Extraction of manganese p. 187
- 5.6 Environmental Warfare--the Corrosion of Metals p. 188
- 5.6.1 Corrosion chemistry p. 189
- 5.6.2 Corrosion protection p. 192
- 5.7 Fossil Fuels p. 197
- 5.7.1 The formation and classification of coal p. 197
- 5.7.2 Formation and accumulation of oil (petroleum) p. 200
- 5.7.3 Formation and accumulation of natural gas p. 202
- 5.7.4 Uses of coal, oil and natural gas p. 202
- 5.7.5 Crude oil and the environment p. 203

- 5.8 Summary p. 205
- Experiment 5.1 Spectrophotometric Determination of Iron in Water p. 206
- Experiment 5.2 Determination of Sodium and Potassium in Water Samples by Flame Photometry p. 209
- Experiment 5.3 Determination of Phenols in River Water by UV--Visible Spectrophotometry p. 211
- Self-Study Exercises p. 215
- Challenging Exercises p. 219
- Further Sources of Information p. 220
- 6 Natural Cycles p. 223
- 6.1 Introduction p. 223
- 6.2 Iron p. 225
- 6.2.1 Abundance and properties p. 225
- 6.2.2 Cycling of iron p. 227
- 6.2.3 Iron in biological and environmental systems p. 230
- 6.2.4 Uses of iron p. 232
- 6.3 Carbon p. 232
- 6.3.1 Abundance and properties p. 232
- 6.3.2 Cycling of carbon p. 233
- 6.3.3 Anthropogenic effects on the carbon cycle p. 236
- 6.3.4 Uses of carbon p. 237
- 6.4 Nitrogen p. 238
- 6.4.1 Abundance and properties p. 238
- 6.4.2 Cycling of nitrogen p. 239
- 6.4.3 Nitrogen and the environment p. 241
- 6.5 Oxygen p. 243
- 6.5.1 Abundance and properties p. 243
- 6.5.2 Cycling of oxygen p. 244
- 6.5.3 Uses of oxygen p. 250
- 6.6 Phosphorus p. 250
- 6.6.1 Abundance and properties p. 250
- 6.6.2 Cycling of phosphorus p. 252
- 6.6.3 Phosphorus in biological and environmental systems p. 254
- 6.6.4 Uses of phosphorus p. 256
- 6.7 Sulfur p. 256
- 6.7.1 Abundance and properties p. 256
- 6.7.2 Cycling of sulfur p. 258
- 6.7.3 Sulfur and the environment p. 260
- 6.7.4 Uses of sulfur p. 263
- 6.8 Summary p. 263
- Experiment 6.1 Determination of Ammonia by Nessler's Method p. 264
- Experiment 6.2 Determination of the Phosphate Levels in Clean and Polluted Waters p. 266
- Experiment 6.3 Biochemical Oxygen Demand using Winkler's Method p. 270
- Experiment 6.4 Determination of Chemical Oxygen Demand in Water Samples p. 276
- Self-Study Exercises p. 280

- Challenging Exercises p. 285
- Further Sources of Information p. 286
- 7 Water--The Lifeblood of the Earth p. 289
- 7.1 Introduction p. 289
- 7.2 Types of Water p. 291
- 7.2.1 Surface water p. 292
- 7.2.2 Groundwater p. 294
- 7.2.3 Precipitation p. 295
- 7.3 The Water Cycle p. 296
- 7.3.1 Impurities in water p. 298
- 7.4 Properties of Water p. 299
- 7.4.1 Solvent ability p. 299
- 7.4.2 Hydrogen bonding p. 300
- 7.4.3 Surface tension p. 302
- 7.4.4 Self-ionization of water p. 303
- 7.5 Properties of Solutions p. 303
- 7.5.1 Dependence of solubility on temperature p. 303
- 7.5.2 Dependence of solubility on the nature of a solvent p. 304
- 7.6 Colligative Properties of Solutions p. 305
- 7.6.1 Lowering of vapour pressure p. 306
- 7.6.2 Depression of freezing point p. 308
- 7.6.3 Elevation of boiling point p. 309
- 7.6.4 Osmotic pressure p. 309
- 7.7 Solution Equilibria p. 311
- 7.8 Solubility Product p. 316
- 7.9 Acids and Bases p. 319
- 7.10 Buffer Solutions p. 320
- 7.11 Water Pollution p. 323
- 7.11.1 Acid precipitation p. 324
- 7.11.2 The effects of acid precipitation p. 327
- 7.12 Water Quality p. 331
- 7.12.1 Inland waters p. 331
- 7.12.2 Coastal and marine water quality p. 332
- 7.13 Summary p. 334
- Experiment 7.1 Determination of Hardness in Water p. 335
- Experiment 7.2 Investigation of the Carbonate--Bicarbonate System (Alkalinity of Aqueous Systems) p. 338
- Experiment 7.3 Cation Concentration of River Water by Ion Exchange p. 344
- Experiment 7.4 Methods of Chloride Determination p. 348
- Self-Study Exercises p. 352
- Challenging Exercises p. 357
- References p. 357
- Further Sources of Information p. 357
- Glossary p. 359
- Useful Addresses p. 371
- Index p. 375
