

- Preface
- List of Figures
- List of Tables
- Introduction John Wainwright and Mark Mulligan
- Part I Modelling and Model Building.
- 1 Modelling and Model Building Mark Mulligan and John Wainwright
- Part II The State of the Art in Environmental Modelling.
- 2 Climate and Climate-System Modelling L. D. Danny Harvey
- 3 Soil and Hillslope Hydrology Andrew Baird
- 4 Modelling Catchment Hydrology Mark Mulligan
- 5 Modelling Fluvial Processes and Interactions Katerina Michaelides and John Wainwright
- 6 Modelling the Ecology of Plants Colin P. Osbourne
- 7 Spatial Population Models for Animals George L. W. Perry and Nick R. Bond
- 8 Ecosystem Modelling: Vegetation and Disturbance Stefano Mazzoleni and Francisco Rego and Francesco Giannino and Colin Legg
- 9 Erosion and Sediment Transport John N. Quinton
- 10 Modelling Slope Instability Andrew Collison and James Griffiths
- 11 Finding simplicity in complexity in biogeochemical modelling Harald Sverdrup and Hördur Haraldsson
- 12 Modelling human decision making John Wainwright and Mark Mulligan
- 13 Modelling land-use change Eric F. Lambin).
- Part III Models for Management.
- 14 Models in Policy Formulation and Assessment: The WADBOS decision support system Guy Engelen
- 15 Decision Support Systems for Managing Water Resources Sophia Burke
- 16 Soil Erosion and Conservation Mark A. Nearing
- 17 Modelling in Forest Management Mark J. Twery
- 18 Stability and Instability in the Management of Mediterranean Desertification John B. Thornes
- Part IV Current and Future Developments.
- 19 Scaling Issues in Environmental Modelling Xiaoyang Zhang and Nick A. Drake and John Wainwright
- 20 Environmental Applications of Computational Fluid Dynamics Nigel G. Wright and Chris J. Baker
- 21 Self-Organization and Cellular Automata Models David Favis-Mortlock
- 22 Data-Based Mechanistic Modelling and the Simplification of Environmental Systems Peter C. Young and Arun Chotai and Keith J. Beven
- 23 Pointers for the Future John Wainwright and Mark Mulligan
