

- Volume 1 Fundamentals And Survey Of Systems
  - Contributors to Volume 1
  - Foreword
  - Preface
  - Abbreviations and Acronyms
  - Part 1 Thermodynamics and kinetics of fuel cell reactions
  - Part 2 Mass transfer in fuel cells
  - Part 3 Heat transfer in fuel cells
  - Part 4 Fuel cell principles, systems and applications
  - Contents for Volumes 2, 3 and 4
  - Subject
  - Index
- Volume 2 Electro-catalysis
  - Contributors to Volume 2
  - Foreword
  - Preface
  - Abbreviations and Acronyms
  - Part 1 Introduction
  - Part 2 Theory of electrocatalysis
  - Part 3 Methods in electrocatalysis
  - Part 4 The hydrogen oxidation/evolution reaction
  - Part 5 The oxygen reduction/evolution reaction
  - Part 6 Oxidation of small organic molecules
  - Part 7 Other energy conversion related topics
  - Contents for Volumes 1, 3 and 4
  - Subject
  - Index
- Volume 3 Fuel Cell Technology And Applications
  - Part 1
    - Contributors to Volumes 3 and 4
    - Foreword
    - Preface
    - Abbreviations and Acronyms
  - Part 1 Sustainable energy supply
  - Part 2 Hydrogen storage and hydrogen generation
    - Development prospects for hydrogen storage
    - Chemical hydrogen storage devices
    - Reforming of methanol and fuel processor development
    - Fuel processing from hydrocarbons to hydrogen
    - Well-to-wheel efficiencies
    - Hydrogen safety, codes and standards
  - Part 3 Polymer electrolyte membrane fuel cell systems (PEMFC)
    - Bipolar plate materials and flow field design
    - Membrane materials
    - Electro-catalysts
    - Membrane-electrode-assembly (MEA)

- State-of-the-art performance and durability
- Volume 4 Fuel Cell Technology and Applications Fuel Cell Technology and Applications
- Contributors to Volume 3 and 4
- Foreword
- Preface
- Abbreviations and Acronyms
- Part 3 Polymer electrolyte membrane fuel cells and systems (PEMFC) (Continued from previous volume)
  - System design and system-specific aspects
  - Air-supply components
  - Applications based on PEM-technology
- Part 4 Alkaline fuel cells and systems (AFC)
- Part 5 Phosphoric acid fuel cells and systems (PAFC)
- Part 6 Direct methanol fuel cells and systems (DMFC)
- Part 7 Molten carbonate fuel cells and systems (MCFC)
- Part 8 Solid oxide fuel cells and systems (SOFC)
  - Materials
  - Stack and system design
  - New concepts
- Part 9 Primary and secondary metal/air cells
- Part 10 Portable fuel cell systems
- Part 11 Current fuel cell propulsion systems
  - PEM fuel cell systems for cars/buses
  - PEM fuel cell systems for submarines
  - AFC fuel cell systems
- Part 12 Electric utility fuel cell systems
- Part 13 Future prospects of fuel cell systems
- Contents for Volumes 1 and 2
- Subject
- Index
