

Table of contents

- **1 The Concept of Microstructure**
- **1.1 Microstructural Features**
- **1.2 Crystallography & Crystal Structure**
- **1.3 Summary**
- **1.4 Bibliography**
- **1.5 Worked Examples**
- **1.6 Problems**
- **2 Diffraction Analysis of Crystal Structure**
- **2.1 Scattering Of Radiation By Crystals**
- **2.2 Reciprocal Space**
- **2.3 X-Ray Diffraction Methods**
- **2.4 Diffraction Analysis**
- **2.5 Electron Diffraction**
- **2.6 Summary**
- **2.7 Bibliography**
- **2.8 Worked Examples**
- **2.9 Problems**
- **3 Optical Microscopy**
- **3.1 Geometrical Optics**
- **3.2 Construction Of The Microscope**
- **3.3 Specimen Preparation**
- **3.4 Image Contrast**
- **3.5 Working With Digital Images**
- **3.6 Resolution, contrast & image interpretation**
- **3.7 Summary**
- **3.8 Bibliography**
- **3.9 Worked Examples**
- **3.10 Problems**
- **4 Transmission Electron Microscopy**
- **4.1 Basic Principles**
- **4.2 Specimen Preparation**
- **4.3 The Origin of Contrast**
- **4.4 Kinematic Interpretation of Diffraction Contrast**
- **4.5 Dynamic Diffraction & Absorption Effects**
- **4.6 Lattice Imaging at High Resolution**
- **4.7 Scanning Transmission Electron Microscopy**
- **4.8 Summary**
- **4.9 Bibliography**
- **4.10 Worked Examples**
- **4.11 Problems**
- **5 Scanning Electron Microscopy**
- **5.1 Components of The Scanning Electron Microscope**
- **5.2 Electron Beam - Specimen Interactions**
- **5.3 Electron Excitation of X-Rays**

- 5.4 Back-Scattered Electrons
- 5.5 Secondary Electron Emission
- 5.6 Alternative Imaging Modes
- 5.7 Specimen Preparation & Topology
- 5.8 Focused Ion Beam Microscopy
- 5.9 Summary
- 5.10 Bibliography
- 5.11 Worked Examples
- 5.12 Problems
- 6 Microanalysis in Electron Microscopy
- 6.1 X-Ray Microanalysis
- 6.2 Electron Energy-Loss Spectroscopy
- 6.3 Summary
- 6.4 Bibliography
- 6.5 Worked Examples
- 6.6 Problems
- 7 Scanning Probe Microscopy & Related Techniques
- 7.1 Surface Forces & Surface Morphology
- 7.2 Scanning Probe Microscopes
- 7.3 Field-ion Microscopy & Atom-Probe Tomography
- 7.4 Summary
- 7.5 Bibliography
- 7.6 Problems
- 8 Chemical Analysis of Surface Composition
- 8.1 X-Ray Photoelectron Spectroscopy
- 8.2 Auger Electron Spectroscopy
- 8.3 Secondary-Ion Mass Spectrometry
- 8.4 Summary
- 8.5 Bibliography
- 8.6 Worked Examples
- 8.7 Problems
- 9 Quantitative & Tomographic Analysis of Microstructure
- 9.1 Basic Stereological Concepts
- 9.2 Accessible & Inaccessible Parameters
- 9.3 Optimizing Accuracy
- 9.4 Automated Image Analysis
- 9.5 Tomography & 3-D Reconstruction
- 9.6 Summary
- 9.7 Bibliography
- 9.8 Worked Examples
- 9.9 Problems
- Appendices
- Index
