

- Foreword
- Introduction
- 1 Dimensional analysis and physical similarity
- 2 Self-similarity and intermediate asymptotics
- 3 Scaling laws and self-similar solutions which cannot be obtained by dimensional analysis
- 4 Complete and incomplete similarity
- 5 Scaling and transformation groups and the renormalisation group
- 6 Self-similar solutions and traveling waves
- 7 Scaling laws and fractals
- 8 Scaling laws for turbulent wall-bounded shear flows at very large Reynolds numbers
