

Table of Contents

- Part I Basic Relationships
- 1 Size and properties of particles
- 2 Collision mechanics of solids
- 3 Momentum transfer and charge transfer
- 4 Basic heat and mass transfer
- 5 Basic equations
- 6 Intrinsic phenomena in a gas-solid flow
- Part II System Characteristics
- 7 Gas-solid separation
- 8 Hopper and stand pipe flows
- 9 Dense-phase fluidized beds
- 10 Circulating fluidized beds
- 11 Pneumatic conveying of solids
- 12 Heat and mass transfer phenomena in fluidization systems
- Appendix
- Summary of scalar, vector, and tensor notations
