

Table of contents

- **Preface** (p. ix)
- **1 Introduction** (p. 1)
- **1.1 Structural criteria** (p. 3)
- **1.2 Modern analysis** (p. 5)
- **1.3 The elastic solution** (p. 8)
- **1.4 Plastic theory** (p. 10)
- **2 Structural Theory of Masonry** (p. 12)
- **2.1 The voussoir arch** (p. 15)
- **2.2 The geometrical factor of safety** (p. 20)
- **2.3 The master 'safe' theorem** (p. 22)
- **2.4 Settlement and cracking** (p. 23)
- **2.5 Time scale for settlement** (p. 24)
- **2.6 Models** (p. 25)
- **3 Domes** (p. 27)
- **3.1 The dome as a membrane** (p. 28)
- **3.2 Stresses in shells** (p. 30)
- **3.3 The uniform hemispherical dome** (p. 31)
- **3.4 Cracking of domes** (p. 35)
- **3.5 The minimum thickness of a hemispherical dome** (p. 39)
- **3.6 Incomplete hemispheres** (p. 41)
- **3.7 Segmental domes** (p. 46)
- **4 The Masonry Vault** (p. 48)
- **4.1 The barrel vault** (p. 48)
- **4.2 The cross-vault** (p. 51)
- **4.3 Vault thrusts** (p. 55)
- **4.4 Ungewitter's tables** (p. 62)
- **4.5 The pathology of the quadripartite vault** (p. 66)
- **4.6 Superimposed loads on vaulting** (p. 71)
- **4.7 The sexpartite vault** (p. 73)
- **4.8 The fan vault** (p. 75)
- **5 Some Structural Elements** (p. 83)
- **5.1 The wall** (p. 83)
- **5.2 The pier** (p. 86)
- **5.3 The pinnacle** (p. 88)
- **5.4 The flying buttress** (p. 91)
- **5.5 The tas de charge** (p. 106)
- **6 Towers and Bells** (p. 109)
- **6.1 The Campanile in Venice** (p. 109)
- **6.2 Collapses at Beauvais, 1284 and 1573** (p. 111)
- **6.3 The crossing tower** (p. 118)
- **6.4 The effects of bell-ringing** (p. 121)
- **6.5 Wind loads** (p. 125)
- **7 Spires** (p. 127)
- **7.1 The spire tip** (p. 129)

- **7.2 The spire as a conical shell** (p. 131)
- **7.3 The octagonal spire** (p. 133)
- **7.4 Leaning spires** (p. 136)
- **7.5 Timber spires** (p. 137)
- **8 Some Historical Notes** (p. 139)
- **8.1 Villard de Honnecourt(1)** (p. 139)
- **8.2 Before Villard** (p. 141)
- **8.3 Villard(2)** (p. 143)
- **8.4 The expertises at Milan** (p. 143)
- **8.5 The Renaissance** (p. 150)
- **Bibliography** (p. 155)
- **Index** (p. 159)
